What is this product?

Type

BEL CANTO ERNANI (the "Sub-Fund") is sub-fund of BEL CANTO SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to build a diversified portfolio of securities issued by companies or by governments or their local authorities established, listed or traded worldwide, providing exposure to a portfolio of assets comprising global equities and equity related securities, bonds, cash and alternative investments.

Investment policy: The Sub-Fund will invest directly, or indirectly through third party investment funds, in global fixed income securities and equities of public or private issuers quoted or traded on official stock exchanges or other regulated markets while seeking to control economic and monetary risks, but not excluding investments in other OECD and emerging countries.

The Sub-Fund will primarily seek to achieve its investment objective by investing its net assets in third party UCITS and UCIs (including ETFs) which may represent up to 100% of the Sub-Fund's net assets.

Under normal circumstances, the Sub-Fund's investments in equities will be 45% of the Sub-Fund's net assets.

The Sub-Fund's exposure to equities will not exceed 70% of the Sub-Fund's net assets.

The maximum exposure to fixed income instruments will be 97% with a minimum of 25% of the Sub-Fund's net assets.

Notwithstanding the above, the Sub-Fund may only invest up to 20% of its net assets in securities whose ratings are lower than Baa3/BBB- or even without credit rating.

The Sub-Fund may invest up to 30% of its net assets in alternative investments.

Participation in emerging markets will be limited to 30% of the Sub-Fund's net assets.

The Sub-Fund does not invest in asset-backed securities (ABS), mortgage backed securities (MBS), distressed securities and contingent convertible bonds. However, indirect investments in these assets via UCITS and ETFs are limited to up to 10% of the Sub-Fund's net assets. In case of a rating downgrade of any debt securities that the Sub-Fund may have invested in, the Sub-Fund could be exposed to distressed securities. In this case, the Management Company and the Investment Manager would make reasonable efforts so that this exposure will not exceed 10% of the Sub-Fund's net assets and that the distressed securities are liquidated in the best interests of shareholders.

The Sub-Fund's portfolio may be exposed to non-EUR currencies with no restrictions. The Sub-Fund may invest up to 10% of its net assets in ETCs.

In case of adverse equity market conditions, the Sub-Fund might temporarily be invested in cash and money market instruments up to 75% of its net assets. The sub-fund will not invest more than 20% of its net assets in cash and deposits for liquidity purposes.

The Sub-Fund is actively managed and it is not managed in reference to a benchmark.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in EUR.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Sub-Fund's capacity to pay you.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		EUR 10 000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment using a suitable benchmark between 2021 and 2023.

Moderate scenario: this type of scenario occurred for an investment using a suitable benchmark between 2016 and 2019.

Favourable scenario: this type of scenario occurred for an investment using a suitable benchmark between 2018 and 2021.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 115	EUR 380
Annual cost impact (*)	1.2%	1.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.7% before costs and 4.6% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
