## What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000 per year is invested.

	<b>If you exit after 1 year</b>	<b>If you exit after 3 years</b>
Total costs	USD 207	USD 670
Annual cost impact (*)	2.1%	2.1% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.0% before costs and 2.9% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
