What is this product?

Type

Giselle (the "Sub-Fund") is sub-fund of a SICAV BEL CANTO SICAV, a UCITs incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to build a diversified portfolio of equity (including closed-ended REITs) and fixed income securities issued by companies or by governments or their local authorities established, listed or traded worldwide.

Investment policy: The Sub-Fund will invest directly, or indirectly through third party investment funds, in fixed income securities and equities of European and North American companies but not excluding investments in other OECD and emerging countries. Under normal circumstances, the Sub-Fund's investments in equities will be 20% of the Sub-Fund's net assets, although the Fund's equity exposure may vary significantly from this level, depending on market conditions.

Companies that the Sub-Fund may invest in will be mainly large caps (market cap >10bn) with a focus on value and quality companies, mainly in the USA and Europe but investments will be made at the Investment Manager's discretion.

The Sub-Fund will not invest more than 20% of its net assets in cash and deposits at sight (such as cash held in current accounts) for ancillary liquidity purposes in normal market conditions. Under exceptional unfavourable market conditions and on a temporary basis, this limit may be increased up to 100% of its net assets, if justified in the interest of the investors, and the Sub-Fund may also invest in these circumstances in money market instruments, short term treasury bonds with an investment grade minimum rating and short-term fixed income mutual funds up to 75% of its net assets, if justified in the interest of the investors.

The Sub-Fund's exposure to equities will not exceed 60% of its net assets.

The maximum exposure to fixed income instruments will be 100% with a minimum of 25% of the Sub-Fund's net assets. The Sub-Fund may invest up to 50% of its net assets in securities whose ratings are lower than Baa3/BBB-.

Under normal circumstances the average rating of the fixed income will be BBB- with a minimum rating of B+.

In case of a rating downgrade of any debt securities that the Sub-Fund may have invested in, the Sub-Fund could be exposed to distressed/defaulted securities. In this case, the Management Company and the Investment Manager would make reasonable efforts so that this exposure will not exceed 10% of the Sub-Fund's net assets and that the distressed/defaulted securities are liquidated in the best interests of shareholders. The Sub-Fund may invest up to 100% of its net assets in UCITS and UCIs (including Eligible ETFs and money market funds).

Investments in emerging markets will be limited to 50% of the Sub-Fund's net assets. The Sub-Fund may invest up to 30% of its net assets in alternative investments.

Alternative investments are considered investment funds or asset classes that are not classified under traditional asset classes. It includes absolute return funds (always UCITS), investment funds allowing indirect exposure to basic materials (ETFs/funds) and investment funds allowing indirect exposure to real estate (ETFs/funds).

The Sub-Fund's portfolio may be exposed to non-USD currencies up to 20% of its net assets. To mitigate volatility due to the periodic fluctuations in foreign exchange markets, the Sub-Fund may engage in derivative transactions for the purpose of hedging its currency risk.

The Sub-Fund may invest up to 10% of its net assets in exchange-traded commodities (ETCs), in eligible financial derivative instruments on commodities indices or on indices based on financial derivatives on commodities qualifying as eligible financial indices.

The Sub-Fund may also invest in financial derivative instruments such as options, futures and forwards within the limits stated in the Prospectus to achieve the exposure to the asset classes as well as for hedging purposes.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

 The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the share performance:

Market, Interest Rate, Credit, Emerging Markets, Currency, Liquidity, Operational, Derivatives risks. Please refer to the Prospectus for full details about the risks associated with this fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		\$10,000	
		If you exit after 1 year	If you exit after 3 years
Scenarios

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	\$124	\$393
Annual cost impact (*)	1.2%	1.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.3% before costs and 2.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
