What is this product?

Type

Isolda Quality US Equities (the "Sub-Fund") is sub-fund of a SICAV BEL CANTO SICAV, a UCITs incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to build a diversified portfolio of securities focused on the US equity market with an aim to purchase high quality assets. The Sub-Fund will invest directly in equity securities, including American and European depository receipts and closed-ended REITs, while seeking to control idiosyncratic risk by analysing fundamental and technical metrics.

Investment policy: The Sub-fund will primarily seek to achieve its investment objective by identifying several quality characteristics in US companies using a proprietary model, considering among other factors, strong balance sheet, high quality earnings complemented with some technical indicators to enhance the quality of the signals and momentum indicators to select the best prospects.

The Sub-Fund is a high conviction strategy with a range of 30-45 names concentrated in the large cap space.

The Sub-Fund will seek to achieve its investment objective by investing directly its net assets in shares of the above-mentioned companies.

The Sub-Fund's investments in equities will be a minimum of 90% of the Sub Fund's net assets, and a maximum of 100%.

The Sub-Fund might temporarily be invested up to 10% of its net assets in money market instruments, short term treasury bonds with an investment grade minimum rating and short-term fixed income mutual funds.

The Sub-Fund will not invest more than 20% of its net assets in cash and deposits at sight (such as cash held in current accounts) for ancillary liquidity purposes in normal market conditions. Under exceptional unfavourable market conditions and on a temporary basis, this limit may be increased up to 100% of its net assets, if justified in the interest of the investors.

The Sub-Fund's portfolio may be exposed to non-USD currencies up to 10% of the Sub-Fund's net assets. To mitigate volatility due to the periodic fluctuations in foreign exchange markets, the Sub-Fund may engage in derivative transactions for the purpose of hedging its currency risk.

The Sub-Fund may also invest in financial derivative instruments such as options, futures and forwards within the limits stated in the Prospectus to achieve the exposure to the asset classes as well as for hedging purposes.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

 The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the share performance:

Market, Currency, Liquidity, Operational, Derivatives risks. Please refer to the Prospectus for full details about the risks associated with this fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	\$228	\$792
Annual cost impact (*)	2.3%	2.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.7% before costs and 6.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
