## What is this product?

### Type

SANTANDER AM EURO CORPORATE BOND (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

### Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

**Objective:** The objective of the Sub-Fund is to provide a total return of income and/or capital growth primarily by investing in a portfolio of investment grade bonds denominated in, or hedged to, Euros issued by corporate, supra-national, government and government agency issuers, or in any other security or instrument the Investment Manager deems suitable for the Sub-Fund such as, but not limited to, money market instruments, cash and convertible bonds. The Sub-Fund may invest, on an ancillary basis, in other instruments such as hybrids, high yield, exchange-traded UCITS or other UCIs and emerging market debt. The Sub-Fund may also invest up to 20% of its portfolio in asset-backed securities (ABS).

**Investment policy:** A minimum of 75% of the portfolio will be invested in issuers for which any credit ratings are investment grade (rated above BBB- or Baa3 by major rating agencies or market benchmarks at the time of the investment).

The Sub-Fund will not invest more than 20% of its net assets in ancillary liquid assets, being cash and deposits at sight (such as cash held in current accounts) for ancillary liquidity purposes in normal market conditions. Under exceptionally unfavourable market conditions and on a temporary basis, this limit may be exceeded, if justified in the interest of the investors.

The Sub-Fund is permitted to use financial derivatives for the purposes of risk control and active investment including, but not limited to, over-the-counter and exchange-traded forward contracts, futures, swaps (including interest-rate swaps and credit-default swaps), options and warrants. The

use of derivative instruments in the Sub-Fund may lead to higher volatility and counterparty risk than would otherwise be the case.

**SFDR Classification:** The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR").

**Benchmark:** The Sub-Fund is actively managed and aims to outperform the 100% BOFA ML EURO CORPORATE BOND (the "Benchmark"). The Investment Manager uses the Benchmark as a reference to build the portfolio. The majority of the Sub-Fund's holdings are included in the Benchmark. Nevertheless, investments outside the Benchmark universe are permitted in order to take advantage of specific opportunities. Although the deviation from the Benchmark could be relatively low in terms of tracking error if the Sub-Fund is neutral in terms of duration, the Investment Manager will take views on various issuers, sectors, countries, ratings and duration, which differ from the Benchmark positioning. These views are based on both a top down / bottom up approach based on fundamental and technical analysis of each component.

**Net asset value calculation frequency:** Daily, any Luxembourg Business day.

This is a EUR distribution share class. Unless specifically decided by the Board of Directors, dividends will be paid to shareholders at least on an annual basis.

### Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 2 years.

**Depositary:** J.P. Morgan SE, Luxembourg Branch.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 2 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the Sub-Fund's capacity to pay you.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		2 years	
Example Investment:		EUR 10 000	
		If you exit after 1 year	If you exit after 2 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 8 010	EUR 8 340
	Average return each year	-19.90%	-8.68%
Unfavourable	What you might get back after costs	EUR 8 360	EUR 8 340
	Average return each year	-16.40%	-8.68%
Moderate	What you might get back after costs	EUR 10 080	EUR 10 070
	Average return each year	0.80%	0.35%
Favourable	What you might get back after costs	EUR 10 890	EUR 11 140
	Average return each year	8.90%	5.55%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2020 and 2022.

Moderate scenario: this type of scenario occurred for an investment between 2017 and 2019.

Favourable scenario: this type of scenario occurred for an investment between 2022 and 2024.

## What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 per year is invested.

	If you exit after 1 year	If you exit after 2 years
Total costs	EUR 126	EUR 254
Annual cost impact (*)	1.3%	1.3% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.6% before costs and 0.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of Costs
