What is this product?

Type

SANTANDER AM LATIN AMERICAN EQUITY OPPORTUNITIES (the "Sub-Fund") is a sub-fund of a SICAV, SANTANDER SICAV, a UCiTs incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The objective of the Sub-Fund (whose reference currency is USD) is to maximise long term capital growth.

Investment policy: This Sub-Fund offers a diversified exposure to equities of the Latin American Markets.

An integrated investment team uses a disciplined locally-based investment approach that relies on proprietary fundamental company research. Teams on the ground in Brazil, Mexico, Chile and Argentina follow this approach in each of their own markets, relying on their deep local knowledge and applying slight adjustments where required to react to nuances in each country. This process allows for prompt stock picking at the overall portfolio level. Research is complemented by a macro overlay in order to maximize portfolio value in a sustainable manner. Portfolio diversification is sought across countries and sectors in the region.

The Sub-Fund is unconstrained regarding company size, country, or sector.

The investment style of the Sub-Fund focuses on companies which the investment team see as offering growth at reasonable price.

This Sub-Fund invests mainly in equities directly or through other funds. Other investments may also include convertible bonds, warrants, related options, financial futures or derivative instruments and other Undertakings for Collective Investment.

The Sub-Fund may use derivatives with a view to reduce the risk of investment positions or for efficient portfolio management or as a part of the investment strategy.

The Sub-Fund will continuously invest at least 51% of its net assets directly or indirectly via funds in equity assets, excluding depository receipts and financial derivatives. In the case of indirect investments, the Sub-Fund will take into account the effective equity ratio of the underlying fund.

The Sub-Fund is actively managed in reference to the MSCI EM Latin America 10-40 Net Total Return USD Index (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and valuations. As such, the Investment Manager will not hold all of the Benchmark constituents.

Net asset value calculation frequency: Daily, any full Business day.

This is an accumulation share class in GBP.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the share performance:

Liquidity, Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		£10,000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	£184	£539
Annual cost impact (*)	1.8%	1.8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.3% before costs and -2.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
