What is this product?

Type

SANTANDER EUROPEAN DIVIDEND (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg S.A. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The objective of the Sub-Fund (whose reference currency is EUR) is to maximise medium to long term returns.

Investment policy: This Sub-Fund invests in a diversified portfolio of equity securities of European issuers quoted or traded on European official stock exchanges or Regulated Markets.

This Sub-Fund invests mainly in equity securities of issuers in developed European countries (most of which will pay dividends on those securities) and up to 5% of its net assets in equity securities of issuers in Eastern European countries and Turkey.

Other investments may also include convertible bonds, warrants or derivative instruments.

In case of adverse market conditions this Sub-Fund may temporarily be invested in cash and money market instruments.

The Sub-Fund will continuously invest at least 51% of its net assets directly or indirectly via funds in equity assets, excluding depository receipts and financial derivatives. In the case of indirect investments, the Sub-Fund will take into account the effective equity ratio of the underlying fund.

The Sub-Fund may use derivatives with a view to reduce the risk of investment positions or for efficient portfolio management or as a part of the investment strategy.

During adverse equity market conditions, the Sub-Fund may temporarily invest up to 49% in cash and money market instruments in order to protect investors. The Sub-Fund is actively managed in reference to the MSCI EUROPE HIGH DIVIDEND (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and valuations. As such, the Investment Manager will not hold all of the Benchmark constituents.

SFDR Classification: The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR").

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is a EUR distribution share class. Unless specifically decided by the Board of Directors, dividends will be paid to shareholders at least on an annual basis.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depositary: Caceis Bank, Luxembourg Branch.

What happens if Santander Asset Management Luxembourg S.A. is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 per year is invested.

	If you exit after 1 year	**If you exit after 3 years**
Total costs	€246	€801
Annual cost impact (*)	2.4%	2.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.7% before costs and 4.3% after costs.
