What is this product?

Type

Santander GO Dynamic Bond (the "Sub-Fund") is a sub-fund of a SICAV, SANTANDER SICAV, a UCITs incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to seek maximum long-term return and preservation of capital.

Investment policy: The Sub-Fund seeks to invest at least two-thirds of its assets in a diversified portfolio of fixed income instruments of varying maturities with an average portfolio duration ranging from negative 2 years to positive 6 years.

The Sub-Fund may invest in both investment-grade and high yield fixed income debt securities, subject to a maximum of 50% of its net assets in securities rated lower than Baa3. The Sub-Fund may invest up to 15% of its net assets in unrated fixed income debt securities. The Sub-Fund may invest up to 50% of its net assets in fixed income debt securities economically tied to emerging market countries and may invest up to 25% in fixed income debt securities traded on the China Interbank Bond Market.

The Sub-Fund may invest up to 10% in UCITS and other UCIs as defined in the prospectus.

The Sub-Fund may hold both non-USD denominated fixed income instruments and non-USD denominated currency positions, the latter limited to 35% of assets.

The Sub-Fund may invest up to 50% of its net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS). Non-agency MBS will be limited to 25% of its net assets. The MBS may be loss-taking tranches up to 20% of the net assets of the Sub-Fund. Any investment in loss-taking MBS, which the Management Company believes should be classified as distressed at the time of purchase or as a result of a rating downgrade, may not exceed 10% of the Sub-Fund's net assets.

The Sub-Fund may not invest in securitisations which were issued on or after 1 January 2019 and which are therefore in scope of Article 5 of the Regulation (EU) 2017/2402.

The Sub-Fund may invest up to 10% of its net assets in preferred stock or bonds that are usually exchangeable for another type of security at a pre stated price. No more than 10% may be invested in equity securities and up to 10% of its net assets may be invested in other securities such as fixed term deposits, inverse floaters and credit linked notes.

The Sub-Fund may also invest up to 10% of its net assets in contingent convertible bonds and up to 15% in collateralised debt obligations ("CDOs") and collateralised loan obligations ("CLOs"). Apart from what is provided regarding loss-taking MBS, the Sub-Fund does not invest in distressed securities. However, in case of a rating downgrade of any debt securities that the Sub-Fund may have invested in, the Management Company and the Investment Manager will take reasonable efforts so that this exposure will not exceed 10% of the Sub-Fund's net assets and that the distressed securities are liquidated in the best interests of shareholders.

The Sub-Fund may also invest in financial derivative instruments.

The Sub-Fund is actively managed and it is not managed in reference to a benchmark.

Net asset value calculation frequency: Daily, any full Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 4 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the share performance:

Liquidity, Counterparty, Sustainability, Currency, Derivatives, Market, Interest Rate, Emerging Markets, Credit, China, CIBM Direct Access risks. Please refer to the Prospectus for full details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Favourable scenario: this type of scenario occurred for an investment using a suitable benchmark between 2017 and 2021.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of the PRIIP Manufacturer.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 per year is invested.

| | If you exit after 1 year | If you exit after 4 years |
|------------------------|--------------------------|---------------------------|
| Total costs | \$170 | \$687 |
| Annual cost impact (*) | 1.7% | 1.7% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.3% before costs and -0.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year |
