What is this product?

Type

Santander GO Global Equity (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg S.A. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of this Sub-Fund is to invest mainly in equities of companies operating in developed countries all over the world, with the objective of outperforming the MSCI World Net Total Return USD Index over a three to five year period.

Investment policy: The Sub-Fund will invest at least two-thirds of its net assets in equities of companies that mainly operate in mature economies (developed countries). The Sub-Fund may also invest in American Depository Receipts (ADRs) and Global Depository Receipts (GDRs). The Sub-Fund may invest up to 20% of its net assets in emerging market countries as defined by MSCI and that are included in the MSCI Emerging Markets Index.

During the investment process, the Sub-Fund will apply an ESG approach, seeking to assess the impact of environmental, social and governance factors on the cash flows of the companies in which it may invest.

The Sub-Fund will continuously invest at least 51% of its net assets directly or indirectly via funds in equity assets, excluding depository receipts and financial derivative instruments. In the case of indirect investments the Sub-Fund will take into account the effective equity ratio of the underlying fund.

The Sub-Fund may invest up to 10% of its assets in UCITS and other UCIs.

In order to achieve its investment objective, this Sub-Fund will mainly invest its assets in equities although depending on the opportunities of the markets it could invest as well in convertible bonds or derivative instruments such as options, swaps, futures and forwards within the limits stated in the Prospectus to achieve the exposure to equity markets as well as for hedging purposes. Furthermore, in case of adverse equity market conditions, this Sub-Fund may temporarily be invested up to 49% of its net assets in money market instruments in order to protect investors' interests. The Sub-Fund will not invest more than 20% of its net assets in ancillary liquid assets, being cash and deposits at sight for ancillary liquidity purposes in normal market conditions. Under exceptionally unfavourable market conditions and on a temporary basis, this limit may be exceeded, if justified in the interest of the investors.

These financial derivative instruments may be traded on either a regulated market as mentioned in the Sub-Fund's Prospectus and entered into with highly rated financial institutions specialising in this type of transactions and participating actively in the relevant market. In this case this Sub-Fund may hold money market instruments, bonds or cash in order to finance the margin calls.

The Sub-Fund is actively managed in reference to the MSCI World Net Total Return USD Index (the "Benchmark"), seeking to outperform it. While the Benchmark serves as a reference point, portfolio construction may be only partially based on its constituents, so it may significantly deviate from the Benchmark. The Investment Manager retains full discretion to select holdings based on an analysis of market conditions and an analysis of a company´s prospects and valuations, aiming to deliver returns above the Benchmark. The Sub-Fund does not use a specific currency strategy but may use currency instruments for hedging and efficient portfolio management.

SFDR Classification: The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR"). The Sub-Fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depositary: Caceis Bank, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

Lower risk — Higher risk

The risk indicator assumes you keep the product for 3 years.
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Sub-Fund's capacity to pay you.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		$10,000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	$4,290	$4,670
	Average return each year	-57.11%	-22.40%
Unfavourable	What you might get back after costs	$7,940	$8,010
	Average return each year	-20.57%	-7.14%
Moderate	What you might get back after costs	$10,890	$12,530

Favourable	What you might get back after costs	$14,540	$17,300
	Average return each year	45.44%	20.04%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2017 and 2020.

Moderate scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2020 and 2023.

Favourable scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2022 and 2025.

What happens if Santander Asset Management Luxembourg S.A. is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 per year is invested.

	If you exit after 1 year	**If you exit after 3 years**
Total costs	$204	$713
Annual cost impact (*)	2.0%	2.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.0% before costs and 8.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs
