Jensen Alpha (%)	-10.75	
Correlation	0.76	
Treynor Ratio	0.11	
Tracking Error (%)	17.61	

** Calculation period 3 years. Data calculated using daily values.

Investment Policy

The investment objective of the Sub-Fund is to invest its assets in a diversified portfolio of securities issued by US and Canadian companies seeking long term capital appreciation. The Sub-Fund will be actively managed with the objective of outperforming the S&P 500® Index (the "Benchmark") net of fees over a three-to-five-year period. This is a target only and not a guaranteed outcome. Under normal market conditions the Sub-Fund will primarily invest in equities of established large-capitalization companies, seeking attractive investment opportunities on an individual company basis, with a bottom-up stock selection process. This will also include American Depository Receipts (ADRs) and Global Depository Receipt (GDRs).

GLOSSARY

Volatility

Measurement of the risk of a fund. Indicates how the fund's performance has deviated from its average over a given period. High volatility means higher risk. Usually compared to the benchmark's volatility.

Sharpe Ratio

Indicates the risk-adjusted return on investment. The higher this ratio, the better the fund's performance relative to the risk taken in the investment. A negative Sharpe ratio does not necessarily imply that the portfolio has recorded a negative return, but that the return recorded is lower than that of a risk-free investment.

Information Ratio

It measures the relationship between the excess return of a fund over its benchmark, whether positive or negative, and the differential in the volatilities of the fund and the benchmark (also called Tracking Error). This ratio is often used to measure how well or poorly a fund performs relative to its benchmark by taking into account the difference in the risk it has taken on relative to its benchmark, whether higher or lower. For example, a higher positive excess return or a lower relative risk taken (or both) would result in a better Information Ratio.

Beta

Measures the relationship between fluctuations in the fund's net asset values and fluctuations in the levels of its benchmark. The benchmark has a beta of 1, so if the beta is 1 the fund has the same volatility, i.e., it is moving in line with the index. If less than 1, the fund is less volatile than the benchmark. If it is greater than 1, it has greater volatility.

R2

Also called the 'coefficient of determination', it measures how well the movements of the market (or benchmark) explain the fund's movements. In simple terms, it is a measure of how well the fund's returns are explained by market returns, indicating how much of the fund's performance can be explained by market movements. The higher it is, the greater the fund's correlation with the market.

Alpha

It measures the additional return a fund generates compared to its benchmark, adjusted for the risk taken. It is essentially a measure of 'value added' by the fund manager. The interpretation would be: Alpha positive when the fund has outperformed the expected return based on its level of risk. Alpha negative when the fund has underperformed the expected return. Alpha zero when the fund has matched the expected return.

Jensen Alpha

A ratio that measures the ability of an investment portfolio manager to outperform the benchmark on a risk-adjusted basis.
A positive alpha implies that the fund has performed better than its index and a negative alpha implies that the fund has underperformed against its index.

Correlation

Shows the linear dependence between two assets: a perfect correlation exists when two investments move in exactly the same way. A perfect positive correlation is represented by 1, a negative perfect correlation is represented by -1, and zero correlation by 0. The key to diversification is to use assets with low correlation.

Treynor Ratio

It measures the return spread over risk-free assets per unit of systematic or non-diversifiable risk of the fund, represented by its Beta. Taking systematic risk as a measure of risk implies the assumption that fund managers manage funds efficiently, i.e. they cancel out asset-specific risk through diversification. The higher the Treynor ratio, the better the fund has been managed in the past.

Tracking Error

This is a ratio that measures the performance differential between an investment fund and its benchmark for a given period of time. The higher the Tracking Error of a fund, the greater the difference between the portfolio's behaviour and its benchmark, while the lower it is, the more the fund's evolution will be linked to the benchmark.

Total Expense Ratio (TER)

The Total Expense Ratio (TER) is a measure calculated as a percentage of the fund's net asset value of the total annual costs associated with managing and operating an investment fund. These costs include management fees, depositary fees, administrative fees, audit fees, and other operational expenses, but exclude transaction costs and performance fees. Where a fund invests a proportion of its assets in other funds it includes the impact of the charges made in those other funds.

Important Information

* Benchmark Disclaimer(s):

The Sub-fund is actively managed in reference to the Benchmark, seeking to outperform it. While the Benchmark serves as a reference point, portfolio construction is may be only partially based on its constituents, so it may deviate from the Benchmark. The Investment Manager retains full discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and valuations, aiming to deliver returns above the benchmark.

Important Information

This document has been prepared by Santander Asset Management Luxembourg S.A. in relation to one or more Luxembourg undertakings for collective investment in transferable securities ("UCITS") under its management, under and in accordance with the UCITS Directive, and is provided solely in confidence for the recipient for the specific purpose of evaluating a potential investment or an existing investment in a UCITS managed by Santander Asset Management Luxembourg S.A.

This document is a marketing communication. Please refer to the prospectus of the UCITS and to the key information document ("KID") or for UK investors the key investor information document ("KIID") before making any final investment decisions, purchasing or converting shares or redeeming investments, together with the list of countries where the UCITS is registered for sale, available at www.santanderassetmanagement.lu or via authorized intermediaries in your country of residence.

This document is intended to provide information that summarizes the main characteristics of the UCITS and under no circumstances constitutes a contractual agreement or an information document required by any legislative provision. It is not a recommendation, personalized investment advice, an offer or solicitation to buy or sell any shares in the UCITS described in this document. Likewise, the distribution of this document to a client, or to a third party, should not be regarded as a provision or an offer of investment advisory services.

This document contains economic forecasts and information gathered from several sources. The information contained in this document may have also been gathered from third parties. All these sources are believed to be reliable, although the accuracy, completeness or update of this information is not guaranteed, either implicitly or explicitly, and is subject to change without notice. Any opinions included in this document may not be considered as irrefutable and could differ or be, in any way, inconsistent or contrary to opinions expressed, either verbally or in writing, advice, or investment decisions taken by other areas of Santander Asset Management Luxembourg S.A.

The UCITS described in this document may not be notified and registered for marketing in all EEA Member States under the UCITS Directive marketing passport and Santander Asset Management Luxembourg S.A and/or the UCITS has the right to terminate the arrangements made for marketing of the UCITS in certain jurisdictions and to certain investors in accordance with applicable laws and regulations, including the UCITS Directive provisions.

It has not been proven that the data contained in this document meet marketing requirements of all countries of sale. The UCITS described in this document may not be eligible for sale or distribution in certain jurisdictions or to certain categories or types of investors. This UCITS may not be directly or indirectly offered or sold to or for the benefit of a United States Person as defined in the applicable regulation, in line with the selling restrictions of the prospectus of the UCITS.

Past performance does not predict future returns. The returns may increase or decrease as a result of currency fluctuations relative to the respective investors' currency.

Investment in the UCITS may be subject to investment risks, including but not limited to, market risk, credit risk, issuer and counterparty risk, liquidity risk, foreign currency risk and, where applicable, risks pertaining to emerging markets. Additionally, there is a risk of fraud derived from investing in unregulated or unsupervised markets or unlisted assets. Complete information on the risks can be found in the relevant "Risk Factors" section of the UCITS prospectus and KID (or KIID for UK investors), which should be consulted and read by the investors.

This UCITS has a prospectus (which is drafted in English), a KID (drafted in English and other languages depending on the country of registration of the UCITS) and a KIID for UK investors (drafted in English), which can be obtained from www.santanderassetmanagement.lu.

For product information, please contact Santander Asset Management Luxembourg S.A. (43, Avenue John F. Kennedy L-1855 Luxembourg - Grand Duchy of Luxembourg), management company of the UCITS under the supervision of the Commission de Surveillance du Secteur Financier (CSSF). The depositary and administrator of the UCITS is CACEIS Bank, Luxembourg Branch (5, Allée Scheffer, L-2520 Luxembourg - Grand Duchy of Luxembourg).

Prior to investment in the UCITS it is advisable that the investor seeks personalized advice regarding taxation as it depends on the individual circumstances of each investor and may change in the future.

Investors can obtain a summary of investor rights in English from www.santanderassetmanagement.lu.
