## What is this product?

### Type

SANTANDER GO SHORT DURATION DOLLAR (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

### Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

**Objective:** The Sub-Fund seeks to achieve a return in excess of US money markets by investing primarily in USD-denominated short-term debt securities.

**Investment policy:** The Sub-Fund may invest in government bonds (US Treasury securities, securities issued or guaranteed by the US government or its agencies), corporate debt securities and cash.

The weighted average duration of the portfolio will not exceed one year, and the initial or remaining maturity of each debt security will not exceed three years from the date of settlement.

The investments in this Sub-Fund will have at least an investment grade rating by major rating agencies or market benchmarks. All long term securities will be rated at least A- or A3 (or the equivalent) at the time of purchase and all short term securities will be rated at least A-2/P-2 (or the equivalent) at the time of purchase. For split rated securities, the lowest rating shall prevail.

For efficient portfolio management and for hedging purposes, the Sub-Fund may also invest in financial derivative instruments, such as interest rate futures, government bond futures and currency forwards, within the limits stated in its prospectus.

The Sub-Fund may invest up to 10% of its assets in UCITS and other UCIs on an ancillary basis.

This Sub-Fund does not qualify as a money market fund within the meaning of the Money Market Fund Regulation and should not be treated as a substitute for a money market fund.

The Investment Manager will seek to achieve this excess return by taking a comprehensive view according to its own economic outlook in order to

determine appropriate interest rate and sector positioning. The Investment Manager will also undertake fundamental analysis on companies to identify suitable investment opportunities in the corporate credit universe.

The Sub-Fund will not invest more than 20% of its net assets in ancillary liquid assets, being cash and deposits at sight (such as cash held in current accounts) for ancillary liquidity purposes in normal market conditions.

**SFDR Classification:** The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR").

The Sub-Fund is actively managed in reference to the ICE BofA 0-3 Month US Treasury Bill Index (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and valuations. As such, the Investment Manager will not hold all of the Benchmark constituents.

**Net asset value calculation frequency:** Daily, any Luxembourg Business day.

This is an accumulation share class in EUR.

### Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 1 year.

**Depository:** J.P. Morgan SE, Luxembourg Branch.

## What are the risks and what could I get in return?

### Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Sub-Fund's capacity to pay you.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

<b>Recommended holding period:</b>	1 years
<b>Example Investment:</b>	EUR 10 000
	<b>If you exit after 1 year</b>

Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	EUR 7 360
	Average return each year	-26.40%
Unfavourable	What you might get back after costs	EUR 8 640
	Average return each year	-13.60%
Moderate	What you might get back after costs	EUR 10 270
	Average return each year	2.70%
Favourable	What you might get back after costs	EUR 11 730
	Average return each year	17.30%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2017 and 2018.

Moderate scenario: this type of scenario occurred for an investment between 2023 and 2024.

Favourable scenario: this type of scenario occurred for an investment between 2021 and 2022.

## What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 per year is invested.

	If you exit after 1 year
Total costs	EUR 58
Annual cost impact (*)	0.6%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.3% before costs and 2.7% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of Costs
