SANTANDER SICAV

Information to the Shareholders

Notices concerning SANTANDER SICAV (the “SICAV”), if prescribed by law, are published in the "*Recueil Electronique des Sociétés et Associations*" (the "RESA"), the official gazette of Luxembourg, and are lodged with the trade and companies Register.

The current Articles of incorporation of the SICAV are lodged with the trade and companies Register, from which copies may be obtained.

The SICAV shall make available to the Shareholders within 4 months after the year-end an annual report including audited financial statements describing the assets, operations and results of the SICAV and its Sub-Fund, and, after the end of the first semi-annual period of each financial year, it shall make available to the Shareholders within 2 months an unaudited semi-annual report describing the net assets and operations of the SICAV during such period.

The annual report, including audited financial statements, the semi-annual report and all other periodical reports of the SICAV are made available to the Shareholders at the registered office of the Administrative, corporate and domiciliary agent of the SICAV and on the following website: www.santanderassetmanagement.lu.

The Net Asset Value (the “NAV”), the issue price and the redemption and conversion price are also made public at the registered office of the SICAV and on the following website: www.santanderassetmanagement.lu.

Investors should consult their professional advisers on the possible tax or other consequences of buying, holding, converting, transferring or selling any of the shares under the laws of their countries of citizenship, residence or domicile.

Investment Managers' report

SANTANDER ASSET MANAGEMENT, SANTANDER ASSET MANAGEMEMENT S.G.I.I.C, S.A. and SANTANDER ASSET MANAGEMENT S.A. AGF

Throughout 2025, the strategy evolved under a more complex macro and political regime, marked by heightened political risk—particularly around U.S. trade policy—the emergence of European fiscal expansion, and a gradual shift toward monetary easing in the second half of the year. From the start of the second quarter, the strategy maintained a cautious stance, which improved progressively from the summer as macro data, earnings resilience, and policy visibility evolved more favorably. As the rate-cutting cycle resumed and inflation eased, monetary support reinforced a soft-landing scenario, allowing for a more constructive positioning toward year-end.

Equities

In the first quarter, markets operated under a dual regime, with U.S. equities affected by tariff-related shocks and AI concentration risks, while Europe benefited from a fiscal pivot following the German elections. By March, our equity overweight was closed and the strategy adopted a more cautious stance, reducing U.S. exposure amid elevated political and trade uncertainty. The second quarter marked the peak of trade-related risk, particularly in April, with sharp but short-lived sell-offs. From the summer onward, improving macro data, easing geopolitical tensions, and greater policy visibility supported a gradual improvement in the outlook. From August, equity exposure was increased progressively.

Fixed Income

Fixed income in 2025 was shaped by fiscal policy, political risk, and the timing of monetary easing. Throughout most of the year, the strategy favoured carry over duration amid fiscal concerns and delayed central bank easing. Early exposure was tilted toward high yield, shifting toward investment grade from the end of the first quarter. As labor market data softened and central bank communication evolved, an inflection point emerged. From September, the resumption of the Fed’s rate-cutting cycle supported a more constructive backdrop, with bonds rallying in the second half of the year.

Currencies and Commodities

Currency markets reflected the evolving policy mix. Early in the year, positioning was adjusted toward a weaker U.S. dollar and a more favorable euro stance, supported by European fiscal expansion and later by broad-based dollar weakness as U.S. growth risks increased. In commodities, gold remained a core conviction throughout the year, benefiting from political uncertainty, fiscal risks, and declining real rates. Energy prices were more volatile, while industrial commodities reflected lingering uncertainty around global trade and growth.

RBC

Market Review

After two years of nearly double-digit returns for global high-yield (HY) markets, 2025 marked a return to normalized conditions as the "beta trade" momentum of prior years faded. Despite significant tariff policy changes, spread widening and volatility following Liberation Day proved short-lived, reflecting market adaptability.

Sentiment in Europe was bolstered by announcements of increased investment and defense spending. However, industrial firms criticized the slow pace of implementation. As 2025 progressed, greater macroeconomic certainty and robust technical support propelled spreads toward the tighter end of historical ranges.

The ICE BofA Global High Yield Constrained Index (hedged to US dollars) returned +8.45% over 2024. Spreads tightened by 15bps (from 307bps to 292bps) over the period, peaking at 456bps (April 2025) and troughing at 276bps (February 2025). Yields declined 73bps (from 7.19% to 6.46%). From a ratings perspective, higher-rated credit outperformed, with BB, B and CCC & below rated credit returning +8.76%, +8.45% and +4.27%, respectively. In terms of sector performance, all sectors delivered positive performance, with telecommunications, automotives and banking the top performers. The transportation sector posted the smallest gain weighed down by the bankruptcy of Brazilian airline, Azul.

In terms of technicals, issuance volumes modestly exceeded the pace in the previous year, with USD332.0 billion across US HY and EUR169 billion across European HY. Inflows into US and European HY over 2024 were USD18.3 billion and EUR9.5 billion, respectively, amid persistent demand for the asset class.

In terms of fixed-rate bonds, the 12-month trailing par-weighted default rate (including distressed exchanges) for US HY was 1.88%, while the European HY default rate was higher at 3.2%. The latter was skewed higher by Altice France, a large index constituent.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

Activity & Performance

The portfolio returned +8.36% over the year, underperforming the benchmark return of +8.45% by 10bps. Equity positioning was the top contributor, a small equity position in Echostar contributed positively, which performed well after agreeing to sell all its spectrum licenses to AT&T for USD 22.65bn. Altice France equity was another contributor as the company emerged from restructuring.
From a sector perspective, overweight allocation and credit selection in the banking sector was aided by an off-benchmark allocation to AT1 bonds. These bonds outperformed non-financial corporates due to their higher yield premiums. Top single-name contributors included bonds from Commerzbank and Deutsche Bank. Within financial services, credit selection was bolstered by the repricing of Credit Suisse's Additional Tier 1 (AT1) claims following the Swiss Federal Administrative Court's ruling in mid-October. Additionally, the overweight and selection to utility issuers outperformed, led by Edison International perpetual bonds which reacted positively to the indication that management is studying tax-efficient options to refinance both perpetual bonds before year-end.

In terms of detractors, credit selection in services was weak due to the overweight to Brazilian waste management firm, Ambipar. Its bonds fell sharply in September due to governance concerns and scepticism about the company's liquidity position. There was a modest recovery in Ambipar bonds when the company filed its US-listed Ambipar Emergency Response business for Chapter 11 in the US. Within healthcare, the main single-name detractor was French issuer, Cerba. There was a sharp decline in prices for Cerba earlier in the year as news that the company had engaged Houlihan Lokey to review its balance sheet took the market by surprise, as the company does not have any bond maturities until 2028. We sold the subordinated bond in June but continue to hold the secured bond.

Additionally, the overweight to Energy bonds especially ahead of the Liberation Day announcements underperformed led by Petroleos Mexicanos, Ecopetrol SA and PBF Holdings.
From a ratings perspective, underweight allocation to BBs was partially offset by the off-benchmark allocation to IG corporate bonds. Regionally, weak credit selection to emerging market corporates was the main detractor while the credit allocation and selection to European corporates outperformed.

Outlook

While 2025 may have appeared uneventful on the surface, it offered ample alpha opportunities that we expect to extend into 2026. The failures of Tricolor and First Brands sparked fears of a broader credit cycle deterioration, though these concerns were overblown, particularly given the high-yield asset class's higher proportion of BB-rated bonds and fewer CCC-rated names. However, these events underscored the importance of rigorous underwriting standards and thorough due diligence.

The HY market is increasingly bifurcated, with performing issuers trading strongly while lower-rated entities struggle. This is especially the case in European HY and, to a lesser extent, in US HY. This dispersion across sectors and individual names presents enhanced opportunities for alpha generation. We favour sectors and issuers with pricing power, benefitting from increased mergers and acquisitions (M&A) activity and potential mergers of equals that strengthen balance sheets.

Artificial intelligence (AI) remains a key theme, both as a source of capital expenditure funding and as a driver of opportunities and challenges across industries. The best of private credit will continue to transition into public markets as companies seek to diversify their lender base. Overall, both macro and micro factors are aligned to provide abundant opportunities, positioning HY for another solid year of mid to high-single-digit returns in 2026.

Within our global HY strategies, the largest sector overweights are in banking, tilted to large European banks. We hold Additional Tier 1 (AT1) bonds and media where we have identified companies with improving performance and potential takeover candidates. In energy, we are still overweight but focussed on lower-beta energy names, which are less affected by commodity spot prices. We remain underweight in real estate, basic industry, and consumer-facing sectors such as consumer goods and leisure.

ROBECO

Annual Review

2025

The year 2025 stands out as one of the most volatile and eventful years in recent memory. It began with strong optimism, driven by expectations of deregulation and business-friendly policies in the US. This confidence was abruptly challenged when the US announced sweeping Liberation Day tariffs on 2 April, triggering the sharpest global equity correction since 2020. The S&P 500 fell by almost 10% in just two days, before a partial pause in tariff escalation sparked a rapid rebound.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

- Despite persistent political and policy uncertainty, US equities once again demonstrated notable resilience over the remainder of the year. After a weak start, markets rallied strongly through the summer, supported by robust earnings growth and continued momentum in AI-related investments. Market leadership, however, remained narrow, with a small group of large technology companies driving a disproportionate share of index returns. European equities initially benefited from fiscal stimulus expectations and increased defense spending, but lost momentum as the year progressed, weighed down by political uncertainty and a lack of exposure to the dominant AI theme. Asia and emerging markets showed periods of strong performance, supported by a weaker dollar and improving domestic fundamentals, but were also marked by heightened volatility as sentiment shifted during the year.

Overall, 2025 was characterized by the relentless surge of AI stocks and sharp rotations. After a difficult first half for the portfolio, relative performance stabilized during the second half of the year, with the strategy regaining part of the lost ground in the final quarter. While markets ended the year at elevated valuation levels, uncertainty around policy, inflation and growth remains high as we move into 2026.
The portfolio underperformed the benchmark, the MSCI World Developed Index, by 5.8% (USD, gross) over the year. Financials, Information Technology and Industrials detracted. Communication Services contributed strongly to performance, while Real Estate and Materials also supported performance.

2025 (in USD, gross)

Portfolio	15.33%
Benchmark	21.09%
Excess Return	-5.77%

While the portfolio benefited from several holdings delivering solid fundamental progress, this was more than offset by a number of larger detractors, particularly in sectors where market leadership became increasingly concentrated and sentiment-driven. In hindsight, several positions failed to keep pace with the narrow group of stocks that dominated index returns during the year.
Marsh & McLennan was among the top detractors. It was sold from the portfolio in the second half of 2025 due to concerns over moderating organic growth, pricing headwinds in brokerage markets, and sector rotation away from defensive industries.
Cheniere Energy, which experienced a volatile year, was another detractor. While the company achieved several operational milestones, the stock price was weighed down by a combination of macroeconomic headwinds and a significant year-end sell-off.
PayPal was initially added as a turnaround story with attractive free cash flow and new management driving innovation and cost control. However, slow growth in the core Branded Checkout business remained an overhang, while expectations were priced for perfection. We therefore decided to exit the position.
On the positive side, the largest contributor was Siemens Energy as the company announced very robust results, supported by a strong order book that materially lifts its growth, margin and cash flow prospects.
Alphabet was another strong contributor. It surged over the course of the year and is positioning itself as an AI leader, with Gemini growing to 650 million monthly active users, driven by app adoption and deep integration across Google services. The company posted excellent results and recorded its first-ever USD 100 billion quarter. Additionally, the favorable ruling in its antitrust case boosted sentiment.
Banco Bilbao Vizcaya Argentaria (BBVA) also contributed well over the year. It was one of the top-performing financial stocks in Europe. It posted historic earnings throughout the year, leveraging strong lending growth in its core markets, Spain and Mexico. The business's strong digital leadership and exposure to high-growth emerging markets underpin growth potential.
While there have been notable challenges over the year, the strategy's cumulative outperformance over time remains very compelling and attests to the strength of the investment team as well as its consistently applied philosophy.

JP MORGAN

Market review

2025 was an eventful year for markets and the economy, marked by larger-than-expected tariffs, the passage of the One Big Beautiful Bill Act (OBBBA), and the longest government shutdown in history. Despite headwinds from tariffs, the shutdown and restrictive immigration policies, strong investment in artificial intelligence (AI) and resilient consumer spending continued to support the U.S. economy.

At its final meeting of the year, the Federal Reserve (Fed) voted to cut the federal funds rate by 25 basis points (bps), setting a new target range of 3.50% to 3.75%. While the "dot plot" saw some changes, the median interest rate outlook remained unchanged, with one cut expected in 2026 and another in 2027. Since beginning its easing cycle in September 2024, the Fed has cut rates by a total of 175 bps.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

The Treasury yield curve steepened in December as short-term Treasury yields generally declined following the December rate cut, while long-term yields moved higher. Three-month and six-month Treasury yields fell by 31 bps and 23 bps, to 3.63% and 2.61%, respectively. One- and two-year Treasury yields fell by 14 bps and 13 bps, to 3.48%. Treasury yields moved lower over the year and credit spreads ended 2025 broadly flat.

Performance

The inception date of the Fund was 3rd April 2019. The cumulative gross performance of the fund since inception (as at 31/12/2025) was 20.56% vs. 18.70% for the benchmark (ICE BofA 3-Month US Treasury Bill Index). In the reporting period (i.e. full year 2025), the total gross return of the fund was 4.83% vs 4.18% for the benchmark.

Portfolio Changes

Portfolio Statistics	31/12/2024	31/12/2025

Agency	0.00%	0.00%
Non-Corporate Credit	0.00%	0.00%
Corporate	68.08%	72.62%

Outlook

Although growth likely slowed in the fourth quarter due to the shutdown, the OBBBA is expected to inject stimulus into the economy through larger income tax refunds, which should boost activity in early 2026. However, as the effects of fiscal stimulus fade and higher tariffs and lower immigration persist, growth could moderate again in the second half of the year.

Amid this backdrop, during the press conference following the December FOMC meeting, Chairman Powell emphasized a measured approach, stating that “further adjustments are far from a foregone conclusion” and acknowledging the wide range of views within the committee, given the tension between their employment and inflation mandates. While the December Fed dot plot indicated one rate cut for 2026, we believe the Fed may proceed with one to two cuts this year, especially with a dovish Fed chair likely to be appointed by President Trump

MORGAN STANLEY

PERFORMANCE REVIEW

For the year, the portfolio returned 17.80% (gross of fees), while the S&P 500 benchmark returned 17.88% and the Lipper Large Cap Growth returned 17.78%.

Counterpoint Global seeks high quality companies, which we define primarily as those with sustainable competitive advantages. We manage concentrated portfolios that are highly differentiated from the benchmark, with securities weighted on our assessment of the quality of the company and our conviction. The value added or detracted in any period of time will typically result from stock selection, given our philosophy and process.

The long-term investment horizon and conviction weighted, highly active investment approach embraced by Counterpoint Global can result in periods of performance deviation from the benchmark and peers. The portfolio underperformed the S&P 500 index as sector allocation more than offset favorable stock selection.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

U.S. large cap equities, as measured by S&P 500 Index, advanced during the year. Communication Services, Information Technology, and Industrials led benchmark gains, while Real Estate, Consumer Staples, and Consumer Discretionary underperformed the benchmark.

Tariff and policy uncertainty remained elevated during the year, alongside a government shutdown in the fourth quarter, while additional Federal Reserve easing and continued artificial intelligence (AI)-related capital expenditures supported broader market performance. Investor sentiment grew more cautious amid rising scrutiny around AI monetization with signs of slowing momentum across select parts of the economy.

Against this backdrop, our investment approach remains unchanged. We continue to invest in high quality businesses that have sustainable competitive advantages and strong secular growth potential, and that operate in large and growing end markets where the penetration rate for their goods/services can be much higher over time. Companies we own tend to be asset light, have little financial leverage, strong pricing power, attractive unit economics, high margins, solid cash generation capability and the ability to succeed through different market/macro environments. While we have opportunistically added to some positions and initiated new ones, overall, we have made few changes as we remain confident in the long-term prospects for the businesses we own. We will continue to carefully consider and monitor fundamental variables, while managing overall portfolio risk and exposures.

Underperformance has been primarily driven by unfavorable stock selection in Communication Services, Information Technology, and an average overweight position in Consumer Discretionary.

Top detractors include:
- Digital advertising software platform, The Trade Desk Inc.
- Global technology platform Alphabet, Inc, due to average underweight position
- Enterprise analytics platform and Bitcoin development company, Strategy Inc.
- Hard surface flooring retailer, Floor & Décor
- Online retailing and cloud computing platform, Amazon.com, due to average underweight position

Top detractor Trade Desk (0.00% of the portfolio), which sells a software suite enabling digital marketers to better manage their advertising spend across channels, underperformed. Its shares remained pressured this year due to slower growth and ongoing execution challenges related to the rollout of its new buying platform, Kokai. The company also experienced leadership turnover, including the departure of its CFO and Chief Commercial Officer, which contributed to investor concerns.

Detractor Strategy (3.59%), formerly known as MicroStrategy, is a business intelligence and data analytics software provider and bitcoin development company. The company has used cash flow from its core software business, alongside capital markets activity such as equity and convertible debt issuance, to pursue a digital asset treasury strategy centered on accumulating bitcoin. Over 2025, its shares were a top detractor, reflecting heightened volatility in bitcoin prices and fluctuations in the premium at which its shares traded relative to net asset value following periods of strong appreciation. While the long-term thesis remains tied to bitcoin adoption and the company’s ability to access capital markets, share price performance during the year was driven primarily by sentiment and valuation dynamics rather than changes in underlying strategy.

Conversely, stock selection in Information Technology, Consumer Discretionary, and Health Care contributed to relative performance.

Top contributors include:
- Web performance and security company, Cloudflare Inc.
- Biopharmaceutical royalties acquirer, Royalty Pharma Plc
- Food delivery company, DoorDash Inc.
- Cloud data platform, Snowflake, Inc.
- Videogame platform, Roblox Corp.

Top contributor Cloudflare (9.67%) offers a global cloud platform that provides security, performance, and reliability services to the applications of its customers. The company’s proprietary network architecture enables rapid scaling and allows customers to deploy services easily without managing complex network hardware. We believe Cloudflare benefits primarily from intellectual property and efficient scale related competitive advantages and is well positioned as enterprises seek high-performance, secure, and cost-effective internet infrastructure, while developers build an increasing number of applications on its platform. Over the course of 2025, its shares outperformed, supported by continued execution, strong enterprise customer adoption, and improving sales productivity.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

Contributor Royalty Pharma (5.86%) is one of the largest buyers of biopharmaceutical royalties and a leading funder of innovation across academic institutions, non-profits, biotechnology, and pharmaceutical companies. We believe the company benefits from intellectual property and brand-related competitive advantages, supported by its scale, deep industry relationships, and long track record in structuring royalty transactions. By acquiring diversified royalty interests in approved or late-stage products, we believe Royalty Pharma captures the upside of pharmaceutical innovation while remaining more insulated from binary research and development risk. Its shares advanced due to continued strong execution, solid financial results, upward revisions to outlook, and improving investor confidence in the depth and durability of its developmental portfolio pipeline and future royalty opportunities.

OUTLOOK

Counterpoint Global looks to own a portfolio of unique companies with diverse business drivers, strong competitive advantages and positioning, and healthy secular growth prospects whose market value we believe can increase significantly over the long-term for underlying fundamental reasons, independent of the macro or market environment. We find these companies through fundamental research. Our emphasis is on secular growth, and as a result short-term market events are not as meaningful in the stock selection process.

Counterpoint Global believes having a market outlook can be an anchor. We focus on assessing company prospects over a five year investment horizon. Current portfolio positioning reflects what we believe are the best long-term investment opportunities.

PIMCO

2025 was a year of broad-based gains across asset classes, underpinned by renewed easing from the Federal Reserve and diverging global policy paths. U.S. yield curves steepened while corporate credit spreads remained tight. Despite intermittent policy uncertainty—including tariff volatility and a late-year restart of official data—disinflation persisted, labor conditions softened, and long-end yields remained sensitive to term premium dynamics. By year end, risk-on sentiment was widespread, and all major asset classes posted positive returns.

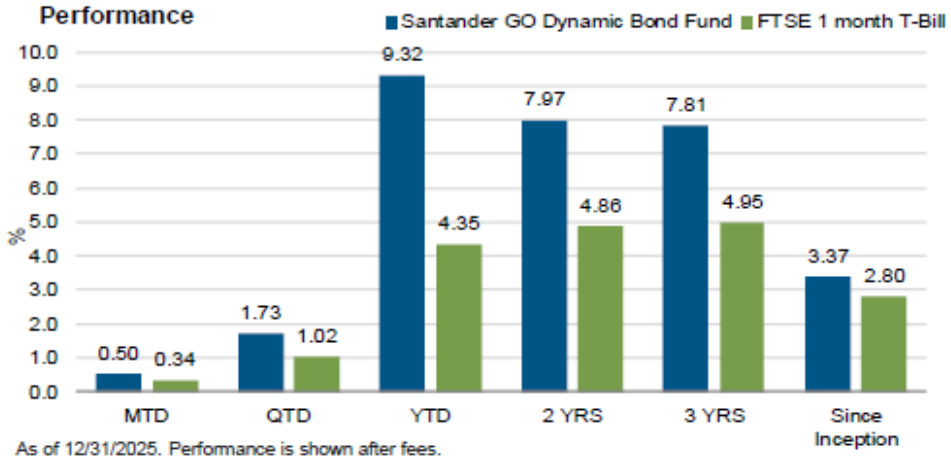

- **Easing resumed at the Fed, while global policy diverged**
  After holding rates steady for the first half of the year, the Fed restarted cuts with three 25 bp reductions in the second half. The ECB and BoE eased toward neutral ranges, while BoJ normalization pushed JGB yields to multi-decade highs.
- **Curves steepened and the term premium ended positive across major markets**
  Front-end U.S. yields fell as the Fed cut rates, while long-end yields fluctuated with supply, deficit, and trade narratives. Into year end, the 2s/10s spread remained firmly positive at roughly 70 bps (10-year ~4.17%, 2-year ~3.47%).
- **Credit spreads stayed tight amid robust risk appetite**
  Global investment grade credit returned 10.5%, despite elevated issuance—particularly from companies financing AI-related infrastructure such as data centers, power, and connectivity. High yield bonds delivered another year of solid returns, supported by continued economic outperformance.
- **Tariffs and policy uncertainty shaped market narratives**
  The U.S. raised tariff rates to levels not seen since the 1930s, fueling early-year trade concerns. While an immediate tariff-driven inflation spike did not materialize, fiscal uncertainty contributed to long-end volatility and reinforced term premium sensitivity, supporting curve steepening across major markets.
- **Risk assets enjoyed an "everything rally"**
  While equities posted strong gains (MSCI World +21.6%; EM +34.4%), fixed income was a key beneficiary of easing and attractive starting yields. Global bonds returned +8.2% in USD terms, supported by carry and rate cuts, with credit sectors outperforming— investment grade +10.5% and high yield +12.1%—delivering solid returns amid tight spreads and improved liquidity. Emerging market debt led with +13.5%, underscoring the value of diversification across global fixed income.

Key performance drivers

2025 Contributors

- Long exposure to the cash interest rate in the US, from carry
- Long exposure to US duration, as shorter-term and intermediare yields fell
- Exposure to US Agency MBS, from carry and as spreads tightened
- Long exposure to select EM FX, primarily CEMEA and LatAm currencies, from carry

2025 Detractors

- Exposure to select EM FX, primarily from Asian currencies
- Short exposure to the Swiss franc and Dollar Block, as they appreciated against the USD
- Long exposure to Australian duration, as intermediate-term yields rose
- Exposure to Japanese duration, as longer-term yields rose

Positioning and Outlook

Interest rate positioning: A focus on the front and intermediate parts of the curve
Against a backdrop of heightened rate volatility, the Fund aims to actively manage its duration and tactically adjust exposure in response to rate moves and take advantage of relative value opportunities as global growth cycles and central bank policies become less synchronized.

The Fund's overall duration moved slightly higher over the month from 3.43 years to 3.45 years, as the Fund increased exposure to US duration (now 1.76 years). The Fund maintains a de-emphasis on longer-term U.S. rates in favor of shorter-term rates as it seeks to harness potential value in the front and intermediate part of the yield curve. The Fund's long position to U.S. Agency MBS contributes substantially (1.15 years DWE) to our U.S. duration exposure, and it continues to be dynamic in adjusting exposures across the coupon stack, targeting up-in-coupon MBS. The Fund maintained its long exposure to US TIPS (0.47 years) to protect the portfolio against elevated inflation risks.
In other parts of the portfolio:

- The Fund maintained its long position in UK duration (0.38 years), given the economy's greater sensitivity to higher rates and potential for inflation to improve.
- The strategy maintained its long Australian duration (0.61 years) as a source of diversification and given the potential for rates to decline more rapidly due to higher rate sensitivity.
- The Fund retains modest exposure to EM local rates, primarily via Peru, South Africa and Brazil, where real yields remain at elevated levels vs developed markets.

Spread: Harness value from a diverse set of spread sectors, while being cautious on lower-quality issuers

- The Fund maintains exposure to non-agency mortgage-backed securities as the underlying fundamentals remain compelling:

o Within the US, the focus is on senior tranches of seasoned loans (originated before 2008), where homeowners have been making payments for over a decade and now have high levels of positive equity. We believe limited supply will help offset the impact of higher mortgage rates. However, even in a sharp economic slowdown, we expect these bonds to be relatively insulated due to strong underlying fundamentals.

- The Fund maintains an emphasis on financial sector securities within investment grade corporates, which benefit from improved fundamentals following years of increased regulation and offer attractive valuation versus the non-financial sector.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

• We continue to like systemically important banks with strong capital positions and direct support from central banks, with a focus on the most senior parts of banks' capital structures, alongside allocations to transportation credits and non-cyclical sectors, such as utilities and technology.
• Within high yield credit, the Fund maintains modest holdings, focusing on select issuers and opportunities.The Fund also has a small position in high yield CDX to hedge beta exposure given potential for higher volatility.
• The Fund maintains a modest exposure to hard currency emerging market debt, focusing on select sovereign exposure, as well as on quasi-sovereign and corporate issuers Saudi Arabia, Czech Republic, and Mexico.

Currencies: Modestly scaled positions given environment of elevated volatility
• The Fund holds a broad basket of commodity-linked currencies, where we believe valuations remain attractive, including BRL,
MXN, ZAR.
• The Fund also holds long exposures to INR, TRY and PLN, and a short exposures to SGD, CNY and TWD.
• Within developed markets, we hold long exposures in GBP and JPY, while being tactically short AUD, CAD and CHF

SCHROEDERS

Asian equities had a strong rally in 2025 alongside a broad improvement in global risk appetite, underpinned by expectations of US policy easing and still-benign liquidity conditions. A weaker US dollar has supported regional currencies and encouraged capital inflows. That said, performance dispersion remains wide beneath the headline, with North Asia leading gains on the strength of demand tied to AI related capital expenditure and valuation recovery from specific sectors driven by fundamental upside (e.g. commodity, defense, industrial leaders), while parts of the domestic Asia story, such as India and ASEAN, continue to grapple with uneven recoveries and sector-specific headwinds

Fund remains overweight in China/ Hong Kong. Despite challenging macro backdrop, we identify bottom-up investment opportunities with expectation of better earning delivery and valuation support. We are overweight in China industrial sector – prefer companies with strong global competitive moat and export capabilities, including leaders in battery, power relay, inverter, and construction machinery. Fund is also overweight in commodity with the view on likely further USD relative weakness – we like gold and copper. We like healthcare sector, focusing on companies with strong out-licensing opportunities and leadership in CDMO. We are selective in AI exposure in China - our preference is to overweight better-run private China internet companies that are potentially able to monetize through AI application. We also take balanced approach having exposure toward companies with high dividend yield with potential improvement in total shareholder return.

Korea and Taiwan continue to benefit from their pivotal roles in the global AI supply chain. Foundry and memory leaders retained their formidable competitive positions amid the global AI build-out. However, after an extended rally that has pushed Taiwan valuations toward the top of historical ranges, we are taking a more measured stance, taking profit from selective AI supply chain where we see risk reward is less favorable. We are currently UW Taiwan market and neutral in Taiwan technology – adopting selective approach. Apart from foundry, we prefer AI exposure through component companies that have higher entry barrier, including power supply, high-grade CCL, and selective globally competitive IC design house. For Korea, we are overweight in memory sector and largely neutral on the market, outside of tech, we prefer global leaders in power transformer, defense, and healthcare, where we maintain overweight positions.

India remains one of Asia's most compelling long-term growth stories, but near-term return prospects are moderated by elevated valuations and excessively optimistic consensus earnings forecasts after a strong 2023–2024. Given the still demanding valuation levels despite muted market performance year-to-date, we remain selective in the market and keep our underweight position. Within India, fund is overweight in consumer discretionary sector with expectation of GST cut supporting gradual consumption recovery; we are also OW selective high-quality private financials and real estate operators. Telecom is another sector we prefer on sustainable ARPU increase and stable competitive landscape.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

Across ASEAN, fundamentals and valuations are mixed. Fund is overweight Singapore and underweight ASEAN ex Singapore. Singapore's political stability and consistent policy framework remains appealing for long-term investors looking for some stability via total returns. We like the banking sector, which stands to benefit from sustained wealth inflows as the city further consolidates its role as a regional safe-haven and wealth management hub. For ASEAN ex Singapore, we selectively overweight in companies with strong capital position and high dividend yield with potential improvement in total shareholder return.

After the year-to-date strength, aggregate valuations for Asian equities sit modestly above long-term averages. Markets are discounting an extended period of monetary easing and sustained earnings growth, much of it tethered to AI-related themes across semiconductors in Korea and Taiwan and to selected technology and internet franchises in China. From a market perspective, key upside supports from here could include: (1) further progress toward Fed rate cuts, a softer dollar and continued accommodative monetary policy from the Asian central banks; (2) ongoing AI investment across hardware and platforms; and (3) global investors' desire to diversify beyond US mega-caps.

BNP

Market Review

Global equities were up in 2025 (22.34% for the MSCI AC World index in USD terms). Throughout 2025, global financial markets navigated a complex landscape marked by ongoing trade tensions, evolving monetary policy, and dramatic shifts in investor sentiment. Early in the year, the debut of DeepSeek, a cutting-edge Chinese AI model, sent shockwaves through the technology sector, triggering a marked sell-off in US tech stocks as investors reassessed the competitive dynamics and long-term growth prospects for artificial intelligence globally. In April, the announcement of sweeping tariffs by U.S. President Trump sparked a sharp sell-off within the U.S. stock markets which experienced the worst declines since 2020. The market started to settle and turn around with the pause of tariffs and more conscious trade policy decisions made by Trump. Throughout the year, trade disputes remained a source of instability. Meanwhile, central banks played a pivotal role: the US Federal Reserve resumed rate cuts after a pause, while the European Central Bank held its stance steady. Shifts in expectations regarding monetary easing influenced asset prices and risk appetite, with investors responding to both economic data and central bank messaging. In Asia, South Korea and China are the two best performing markets with the robust growth in technology sector particularly in AI and data center themes.

Portfolio Performance

From the start of the year until 28 November 2025, the Fund was up +19.63% (gross of fees, in USD terms) underperforming its long-term reference benchmark (MSCI ACWI) by 1.44%. The underperformance was largely attributable to the natural capital theme, which lagged the broader market. This was due to a prevailing risk-on environment, marked by a cyclical upswing and buoyant market sentiment. In particular, companies closely tied to artificial intelligence and data centres drove market gains, resulting in defensive sectors such as water, waste, and food within consumer staples continuing to underperform relative to these high-growth areas. Amongst the strongest positive contributors to relative performance were Cameco, Organo and Siemens Energy with a contribution of 103bps,94bps and 89bps respectively. The largest relative detractors were Lineage and Zoetis.

Portfolio Activity

Throughout the year, we have been actively managing the portfolio and below are the key changes we made to the portfolio to enhance resilience in 2025.

- Defensive positioning in the first half of the year: In response to the sell-off following the DeepSeek event and ongoing uncertainty surrounding tariffs, we adopted a notably defensive approach. This involved increasing our allocation to Utilities and maintaining a focus on companies with robust fundamentals, particularly by expanding our exposure to the water and waste management sectors.

- Turning to risk as Inflation Reduction Act clarity improved from May: From May onwards, as the outlook for the Inflation Reduction Act became clearer and the likelihood of a complete repeal appeared very limited, we began to take a more constructive stance. We gradually increased our holdings in high-conviction solar and wind companies. Additionally, we added to positions in grid technology, electrical equipment, and HVAC and cooling solutions for data centres—sectors poised to benefit from the rapid expansion of artificial intelligence.

- Active portfolio management during the AI sector's momentum reversal: Throughout the year, ongoing debates about a potential bubble in the AI sector contributed to considerable volatility. We maintained our disciplined buy-and-sell approach, realising profits from holdings we viewed as fully priced, whilst capitalising on market corrections to invest in high-conviction companies during periods of sell-off.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

The Fund remains well-diversified with approximately 60% in Natural Capital-related themes and 40% in Clean Energy-related themes. Regionally, just over 63% is invested in the US and Canada, roughly 29% in Europe, and the remainder in Asia and Emerging Markets.

Commentary & Outlook

The environmental theme continues to find support amidst low valuations in clean energy and the resumption of the rate-cut cycle in the US. We believe that environmental solution companies in interest rate-sensitive sectors are well positioned to continue to benefit. The signing of the One Big Beautiful Bill Act has helped reduce policy uncertainties surrounding the Inflation Reduction Act. The newly issued tax credit eligibility guidance via executive order further enhanced visibility and boosted investor confidence in the theme. Compared to harsher potential outcomes, this was a more positive result, enabling companies to plan their business strategies with greater clarity and long-term visibility. This supports more stable growth and is likely to attract increased capital flows. We have already observed multiple upgrades in the environmental sector and we believe this re-rating trend is set to continue. The US is structurally short of power as the nation is trying to address an increase in demand for power from broader electrification. In addition, artificial intelligence and demand for datacentres adds an extra layer the demand of power creating a race to secure power by large technology companies that are engaged in the artificial intelligence “arms race” to become the dominant player. Clean energy is particularly attractive as source of power that is readily and affordably deployable relative to gas, nuclear and coal that takes 6-12 years to build, connect and deploy.

Within the natural capital side, waste sector fundamentals remain strong for 2026, with pricing expected to be in the mid-single-digit range offsetting flat-to-down volumes, while margin expansion is supported by price-cost spread, efficiency gains, and easing labour turnover. Water scarcity is a significant challenge, with demand for fresh water projected to exceed supply by 40% by 2030, presenting both business risks and growth opportunities. The water sector has solid fundamentals driven by population growth, aging infrastructure, and increasing demand for sustainable water networks.

The above-mentioned securities are for illustrative purpose only and do not constitute any investment recommendation.

Luxembourg, December 31, 2025 The Investment Managers of the SICAV

The figures stated in this report are historical and not necessarily indicative of future performance.

Audit report

To the Shareholders of
SANTANDER SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of SANTANDER SICAV (the "Fund") and of each of its sub-funds as at 31 December 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2025;
- the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
- the statement of investments as at 31 December 2025; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

PricewaterhouseCoopers Assurance, Société coopérative,
2 rue Gerhard Mercator, L-2182 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu

Cabinet de révision agréé. Expert-comptable (autorisation ministérielle n°10181659)
R.C.S. Luxembourg B294273 - TVA LU36559370

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for SANTANDER TARGET MATURITY 2025 EURO where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

SANTANDER SICAV

Notes to the financial statements as at December 31, 2025

NOTE 1 - GENERAL

SANTANDER SICAV (the "SICAV") is a Luxembourg incorporated investment company (Société d'Investissement à Capital Variable) which was set up for an unlimited duration in Luxembourg in the form of a "société anonyme" on October 27, 1993, in accordance with the provisions of the amended Law of March 30, 1988 on undertakings for collective investment and the amended Law of August 10, 1915 on commercial companies. Since 2011, the SICAV is subject to the provisions of part I of the Law of December 17, 2010 (the "Law of 2010"), relating to Undertakings of Collective Investment in Transferable Securities, as amended.

Its Articles of Incorporation were published in the "Mémorial C, Recueil des Sociétés et Associations" (the "Mémorial") on November 27, 1993. They have been amended for the last time on March 5, 2025 and the changes have been published in the "Recueil Electronique des Sociétés et Associations" (RESA), (RESA_2021_203) on April 04, 2025.

The Board of Directors of the SICAV has appointed Santander Asset Management Luxembourg S.A. as Management Company of the SICAV within the meaning of Chapter 15 of the Law of 2010. Santander Asset Management Luxembourg S.A. was incorporated on November 29, 1996 as a corporation (société anonyme) under the laws of Luxembourg for an unlimited duration. It has its registered office at 43, Avenue John F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg. Its Articles of Incorporation were initially published in the Mémorial on January 13, 1997 and were last amended on 24 January 2019.

The SICAV is registered on the Register of Commerce and Companies of Luxembourg under number B 45 337. The SICAV's financial year ends on December 31 of each year.

The SICAV aims to provide investors with a choice of Sub-Funds, invested in the principal types of securities, equities and bonds of the world encompassing the strategies of capital conservation and growth and in accordance with the principle of risk-spreading.

On December 9, 2024, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER TARGET MATURITY EURO IV with an effective date as of January 27, 2025.

On December 9, 2024, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER TARGET MATURITY EURO V, with an expected date as of June 2, 2025.

On April 11, 2025, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER FINANCIAL CREDIT FUND, with an expected date as of October 15, 2025.

Please note that as of January 1, 2025, the registered address of the SICAV has been transferred to 43, Av. John F. Kennedy, L – 1855 Luxembourg, Grand Duchy of Luxembourg.

From the December 1, 2025, the Board approved to appoint CACEIS Bank, Luxembourg Branch as new depositary bank and paying agent, administrative, registrar, and corporate agent of the SICAV in replacement of J.P. MORGAN SE, Luxembourg Branch ("JPM") (the "Migration"). This change was approved by the Commission de Surveillance du Secteur Financier (the "CSSF") on 1 October 2025.

With effective date August 28, 2025, SANTNADER GO ASIAN EQUITY has been renamed into SANTANDER GO EMERGING ASIA EQUITY to better reflect the investment policy of the Sub-Fund.

With effective date August 28, 2025, SANTANDER GO GLOABL EQUITY ESG has been renamed into SANTANDER GO GLOBAL EQUITY to better reflect the investment policy of the Sub-Fund.

With effective date May 16, 2025, SANTANDER LATIN AMERICAN INVESTMENT GRADE ESG BOND has been renamed into SANTANDER LATIN AMERICAN INVESTMENT GRADE BOND to better reflect the investment policy of the Sub-Fund.

With effective date June 11, 2025, SANTANDER GO ABSOLUTE RETURN has been renamed into SANTANDER TOTAL RETURN to better reflect the investment policy of the Sub-Fund.

With effective date May 16, 2025, SANTANDER US EQUITY ESG has been renamed into SANTANDER US EQUITY to better reflect the investment policy of the Sub-Fund.

With effective date December 15, 2025, SANTANDER GO NORTH AMERICAN EQUITY has been renamed into SANTANDER GO NORTH AMERICAN EQUITY OPPORTUNITIES to better reflect the investment policy of the Sub-Fund.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 1 - GENERAL (continued)

On December 19, 2025, the Board of Directors of the SICAV resolved to put into liquidation the Sub-Fund SANTANDER GO GLOBAL ENVIRONMENTAL SOLUTIONS with an effective date as of November 28, 2025. The final redemption of the fund took place on November 26, 2025.

On December 19, 2025, the Board of Directors of the SICAV resolved to put into liquidation the Sub-Fund SANTANDER TARGET MATURITY 2025 EURO with an effective date as of January 2, 2026.

Pursuant to the Articles of Incorporation of the SICAV, the Board of Directors of the SICAV may decide to issue, within each Sub-Fund, separate classes of shares (hereinafter referred to as a “Class” or “Classes” as appropriate). The Classes of Shares currently issued by the SICAV (Class A, Class AD, Class AE, Class AEH, Class B, Class BD, Class BE, Class BEH, Class CDE, Class F, Class I, Class IE, Class IEH, Class M, Class MD, Class ME, Class MEH, Class SE, Class X and Class XE denominated in EUR, Class A, Class AD, Class AU, Class AUH, Class B, Class BUH, Class C, Class CD, Class D, Class I, Class ID, Class M, Class S, Class V and Class X denominated in USD, Class APH, Class IKP and Class RKP denominated in GBP) differ in sales and/or redemption charge structure, fee structure, investment management fee, currency, investment minimum, distribution policy, hedging policy, the investor targeted and the performance fee.

In addition to classes issued in the reference currency of the relevant Sub-Fund, classes may be available in the following currencies (currency abbreviation inserted in the relevant class name):

EURO (abbreviated E),
US Dollars (abbreviated U),
GBP (abbreviated P).

Unless otherwise provided in the Appendix of the prospectus relating to the relevant Sub-Fund:

Class A Shares may only be acquired by investors subscribing for a minimum amount of EUR 500, USD 500 or GBP 1,000 following the reference currency of the Sub-Fund.

Class AD Shares may only be acquired by investors subscribing for a minimum amount of EUR 500, USD 500 or GBP 1,000 following the reference currency of the Sub-Fund. This Class AD aims to pay dividends to the Shareholders owning such Class of Shares.

Class B Shares may only be acquired by investors subscribing for a minimum amount of EUR 25,000 or USD 25,000 following the reference currency of the Sub-Fund.

Class BD Shares may only be acquired by investors subscribing for a minimum amount of EUR 25,000 or USD 25,000 following the reference currency of the Sub-Fund. This Class BD aims to pay dividends to the Shareholders owning such Class of Shares.

Class C Shares may only be acquired by investors subscribing for a minimum amount of EUR 300,000 or USD 300,000 following the reference currency of the Sub-Fund.

Class CD Shares may only be acquired by investors subscribing for a minimum amount of EUR 300,000 or USD 300,000 following the reference currency of the Sub-Fund. This Class CD aims to pay dividends to the Shareholders owning such Class of Shares.

Class D Shares may only be acquired by investors subscribing for a minimum amount of GBP 25,000 or USD 25,000 following the reference currency of the Sub-Fund. This Class D aims to pay dividends to the Shareholders owning such Class of Shares.

Class F Shares may only be acquired by Institutional Investors within the meaning of article 174 of the amended Law of 2010, and subscriptions will be possible for limited periods determined by the Board of Directors. This Class is launched with the intention of reaching an optimal size to make the relevant Sub-Fund efficient in the interest of its Shareholders. No minimum subscription amount is applicable to this Class, unless otherwise determined by the Board of Directors.

Class I Shares may only be acquired by Institutional Investors within the meaning of article 174 of the amended Law of 2010 relating to undertakings for collective investment subscribing for a minimum amount of USD 500,000 or EUR 500,000 following the reference currency of the Sub-Fund.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 1 - GENERAL (continued)

Class ID Shares may only be acquired by Institutional Investors subscribing for a minimum amount of USD 500,000 or EUR 500,000 following the reference currency of the Sub-Fund. This Class ID aims to pay dividends to the Shareholders owning such Class of Shares.

Class IK Shares may only be acquired by Institutional Investor subscribing for a minimum amount of GBP 500,000 or EUR 500,000 following the reference currency of the Sub-Fund. The Board of Directors of the SICAV intends to obtain certification from the United Kingdom's HM Revenue & Customs that the SICAV be considered as a reporting offshore fund ("UK reporting status") for this Class.

Class M Shares may only be acquired by Institutional Investors qualifying as feeder funds and authorised by the Board of Directors of the SICAV. No minimum subscription amount is applicable to this share class. The subscription currency will be EUR or USD following the reference currency of the Sub-Fund.

Class MD Shares may only be acquired by Institutional Investors qualifying as feeder funds and authorised by the Board of Directors of the SICAV. No minimum subscription amount is applicable to this share class. The subscription currency will be EUR or USD following the reference currency of the Sub-Fund. Class MD Shares aim to pay dividends to the shareholders owning such class of shares.

Class RK Shares may only be acquired by investors subscribing for a minimum amount of GBP 500 following the reference currency of the Sub-Fund. The Board of Directors of the SICAV intends to obtain certification from the United Kingdom's HM Revenue & Customs that the SICAV be considered as a reporting offshore fund ("UK reporting status) for this Class.

Class S are reserved for providers of independent advisory services or discretionary investment management services, or other distributors who: (i) provide investment services and activities as defined by Directive 2014/65/EU on markets in financial instruments ("MiFID II"); and ii) have separate fee arrangements with their clients in relation to those services and activities provided; and (iii) do not receive any other fee, rebate or payment payable out of the relevant Sub-Fund’s assets in relation to those services and activities.

Class V Shares may only be acquired by Institutional Investors qualifying as feeder funds established in Brazil and authorized by the Board of Directors. No minimum subscription amount is applicable to this Share Class. It seeks to systematically convert the value of its net assets to BRL via the use of derivatives including non-deliverable forwards. As BRL is a restricted currency, the Class V Shares cannot be denominated in BRL but instead will be denominated in the Reference Currency of the relevant Sub-Fund. Due to the use of currency derivatives, the NAV per Share will fluctuate in line with the fluctuations in exchange rates between the BRL and the Reference Currency of the Sub-Fund. The effects of this will be reflected in the performance of the Share Class which therefore may differ significantly from the performance of other Share Classes within the Sub-Fund. Any profit or loss as well as costs and expenses resulting from these transactions will be reflected exclusively in the NAV of this Share Class.

Class X Shares may only be acquired by Santander Asset Management Group entities and their affiliates at any time and authorized by the Board of Directors. No minimum subscription amount is applicable to this Share Class.

Where offered in a currency other than the relevant Sub-Fund’s reference currency, the Share Class currency may be hedged to the reference currency. The Share Class will be designated as such by the insertion of the abbreviation H in the relevant Class name.

As at December 31, 2025, the shares of the following Sub-Funds were offered for issue and sale:

The Articles of Incorporation of the SICAV allow the Board of Directors of the SICAV to create other additional Sub-Funds, which may be denominated in various currencies as well as, within each Sub-Fund, separate classes of shares, subject to the limits applicable thereto.

It is possible for Shareholders to convert shares from any Sub-Fund to any other existing Sub-Fund in accordance with the conditions set out in the current prospectus.

NOTE 2 - DIVIDENDS PAID

The Board of Directors of the SICAV resolved on December 15, 2025 to pay the following interim dividends per share on December 19, 2025. The ex-date of below dividends is December 16, 2025 :

SANTANDER LATIN AMERICAN CORPORATE BOND

Class CDE: 2.401531 EUR
Class X: 2.090828 USD

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The reporting currency of the SICAV is EUR.

The financial statements of the SICAV have been presented in conformity with legal and regulatory requirements in Luxembourg, applicable to Undertakings of Collective Investment in transferable securities and prepared in accordance with generally accepted accounting policies in Luxembourg. It includes the following significant accounting policies:

3.1 Valuation of assets

-each security and/or money market instrument which is quoted or dealt in on a stock exchange is valued at its latest available closing price, and where appropriate at the middle market price on the stock exchange which is normally the principal market for such security and/or money market instrument and each security and/or money market instrument dealt in on another regulated market is valued in a manner as near as possible to that for quoted securities.

-The value of securities and/or money market instruments not quoted or dealt in on a stock exchange or another regulated market and of securities and/or money market instruments which are so quoted or dealt in but in respect of which no price quotation is available or the price quoted is not representative of the securities' and/or money market instruments' fair market value shall be determined prudently and in good faith on the basis of their reasonably foreseeable sales prices.

Cash and other liquid assets are valued at their face value with interest accrued.

3.2 Net realised gain/(loss) on sales of investments

Net realised result on sales of investments is determined on the basis of the average cost of investments sold and are presented in the Statement of operations and changes in net assets.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Foreign exchange translation

Combined statements of the SICAV

The various items of the combined Statement of net assets and the combined Statement of operations and changes in net assets of the SICAV as of December 31, 2025 are equal to the total sum of the corresponding items of the Statements of net assets and Statements of operations and changes in net assets of each Sub-Fund translated into EUR at the exchange rates ruling as of December 31, 2025.

Transactions in foreign currencies

Assets and liabilities expressed in currencies other than the respective Sub-Fund's currency are translated into the respective Sub-Fund's currency at the exchange rates prevailing as of December 31, 2025. Income and expenses in currencies other than the respective Sub-Fund's currency are translated into the respective Sub-Fund's currency at the exchange rates prevailing at the transaction date.

Net realised and change in net unrealised gain or loss on foreign exchange are recorded in the Statement of operations and changes in net assets under the heading "Foreign exchange".

Exchange rates used as of December 31, 2025:

1 EUR = 0.873150 GBP
1 EUR = 1.174450 USD

3.4 Valuation of forward foreign exchange contracts

Outstanding forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the relevant valuation date and net realised and change in net unrealised appreciation or depreciation are included in the Statement of operations and changes in net assets.

3.5 Valuation of futures contracts

The futures contracts are valued on the basis of the last available price on the relevant market at the valuation date and net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.6 Valuation of options contracts

The settlement value of options traded on stock markets is based on the closing price published by the stock exchanges on which the Sub-Fund concluded the contracts. The settlement value of options that are not traded on a stock exchange is determined according to valuation rules established by the Board of Directors of the SICAV, according to uniform criteria for each type of contracts.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.7 Valuation of interest rate swap contracts

An interest rate swap contract is a bilateral agreement in which each of the parties agree to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

For Derivatives with fixed income as Underlying (the price includes the accrued interest).

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.8 Valuation of credit default swap contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the Swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual issuers.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.9 Valuation of total return swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity. To the extent the total return of the reference asset underlying the transaction exceeds or falls short of the offsetting payment, the SICAV receive a payment from or make a payment to the counterparty.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.10 Reverse repurchase agreements

A reverse repurchase agreement is an agreement by which, in exchange for a sum, the SICAV receives (purchases) transferable securities from a counterparty which agrees to repurchase them at a price and a term specified between the two parties when the agreement is concluded. A reverse repurchase agreement is similar in its effects to a loan granted by the SICAV to the counterparty, the loan being secured by transferable securities. The SICAV accounts for the repurchase agreement as if it were a loan and shows it in the Statement of net assets under the heading “Receivable on reverse repurchase agreements / Payable on reverse repurchase agreements”. A reverse repurchase agreement is generally only of short duration and is not transferable. The SICAV values this type of agreement at cost, which, when combined with accrued interest, provides an approximation of the value at which the securities will be repurchased by the counterparty.

3.11 Formation expenses

Formation expenses are amortised on a straight-line basis over a period of five years.

3.12 Income recognition

Dividends, net of any unrecoverable withholding taxes, are taken into income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

3.13 Mortgage Related Securities – To Be Announced (TBAs)

TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised.

TBA positions are disclosed in the statement of investments. The purchase of this type of security has not been settled and consequently, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Payable on investments purchased" in the statement of net assets.

Negative positions in the statement of investments reflect the Fund's sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under "Receivable on investments sold" in the statement of net assets.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.13 Mortgage Related Securities – To Be Announced (TBAs) (continued)

The realised gains/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the statement of operations and changes in net assets respectively under the headings "Net realised gains/(losses) on investments" and "Change in net unrealised appreciation/despreciation on investments".

TBAs are disclosed on the statement of net assets under the heading "Investment in securities at market value".

NOTE 7 - DEPOSITARY AND ADMINISTRATION FEES

From the December 1, 2025

It should be noted that a minimum annual fee for administration services (EUR 12,000) and a maximum fee of 0,008% for depositary services per Sub-Fund shall be payable by the SICAV to CACEIS Bank, Luxembourg Branch in remuneration of its fund accounting, valuation and depositary services in case the fees rates agreed for these services (expressed in percentage per annum) do not reach these annual minima considering the level of assets under management of the relevant Sub-Fund over the relevant period. Administration and depositary fees (rate in basis points with an annual minimum) are calculated and accrued in the funds on daily basis and payable to the Depositary, Administrative and Corporate Agent on quarterly basis.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 7 - DEPOSITARY AND ADMINISTRATION FEES (continued)

Until the December 1, 2025

In its capacity as Depositary, Administrative and Corporate Agent, J.P. MORGAN BANK SE. is entitled to receive as remuneration for the services rendered to the SICAV and the Management Company an annual fee depending on the nature of the investments of the different Sub-Funds in a range from 0.05% p.a. to 0.30% p.a. of the NAV of the assets of the different Sub-Funds. Such fee is calculated and accrued daily and is paid monthly in arrears to the Depositary by the SICAV. It should be noted that a minimum annual fee for administration services (EUR 12,000) and fiduciary services (EUR 8,000) is payable by the SICAV to J.P. MORGAN BANK SE. in remuneration of its fund accounting, valuation and fiduciary services in case the fees rates agreed for these services (expressed in basis points per annum) do not reach the annual minima. Administration and fiduciary fees (rate expressed in basis points with an annual minimum) are calculated and accrued in the Sub-Funds on daily basis and payable to the Depositary, Administrative and Corporate Agent on a monthly basis.

NOTE 8 - ANNUAL TAX

Under current law and practice, the SICAV is not liable to any Luxembourg income tax, nor are dividends paid by the SICAV liable to any Luxembourg withholding tax. However, the SICAV is liable in Luxembourg to an annual tax (hereinafter the "Subscription Tax"), payable quarterly, of 0.05% p.a. of the net assets of all classes of shares at the end of the relevant quarter; except that the Subscription Tax rate will be reduced to 0.01% p.a. in respect of the net assets attributable to such Classes of Shares which are reserved for Institutional Investors. In any event, these net assets will exclude the proportion of net assets of the respective Class of shares as of the last day of the relevant quarter represented by units or shares held in other Luxembourg undertakings for collective investment, to the extent that such units or shares have already been subject to the Subscription tax provided for by amended Law of 2010 on undertakings for collective investment, for which no Subscription tax shall be levied. No stamp duty or other tax is payable in Luxembourg on the issue of shares of the SICAV except the one required by Luxembourg law which was paid upon incorporation. Under current law and practice, no capital gains tax is payable in Luxembourg on the realised or unrealised capital appreciation of the assets of the SICAV.

NOTE 9 - STATEMENT OF CHANGES IN PORTFOLIO

A copy of the list of changes in the securities portfolio of the Sub-Funds may be obtained free of charge at the registered office of the SICAV.

NOTE 10 - TRANSACTION FEES

For the year ended December 31, 2025 the SICAV incurred transaction costs which have been defined as brokerage fees, relating to purchase or sale of transferable securities, money market instruments, derivatives, or other eligible assets. The SICAV also incurred transaction costs charges by the Custodian Agent and relating to purchase and sale of transferable securities.

Depositary transaction costs are recorded in the Statement of Operations and Changes in Net Assets under the caption "Other expenses" and are as follow:

		Brokerage fees	Depositary transaction costs	Total transaction costs
SANTANDER GO SHORT DURATION DOLLAR	USD	-	-	-

SANTANDER MULTI INDEX INCOME	EUR	230,000	Cash	JPMorgan Chase Bank, N.A.

NOTE 17 - CROSS SUB-FUND INVESTMENTS

At December 31, 2025, the total cross Sub-Fund investment amounted to EUR 16,145,232 and therefore the total combined Net Assets at year end without cross Sub-Fund investment would amount to EUR 6,021,256,175.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 18 – SWING PRICING MECHANISM

A Sub-Fund may suffer a reduction in value, known as “dilution” when trading the underlying investments as a result of net inflows or net outflows of the respective Sub-Fund. This can be due to a number factors, including but not limited to bid/offer spreads and transaction costs of underlying securities, tax-action, fiscal and other applicable trading charges, subscription and redemptions fees of underlying funds (if applicable), the prevailing liquidity and the size of the transaction in the markets in which the Sub-Funds invest in. To counter this effect and to protect shareholders’ interests the Management Company may adopt a swing pricing mechanism as part of its valuation policy. This means that in certain circum-stances the Management Company may adjust to the net asset value per Share to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

If on any Valuation Day, the aggregate net investor(s) transactions in a Sub-Fund exceed a pre-deter-mined threshold, the net asset value per Share may be adjusted upwards or downwards to reflect the costs attributable to the net capital activity of the Sub-Fund. Typically, such adjustments will increase the net asset value per Share when positive net capital activities occur in the Sub-Fund and decrease the net asset value per Share when capital activities are negative. The Management Company is re-sponsible for setting the threshold, which will be a percentage of the net assets of the respective Sub-Fund for the Valuation Day. The threshold is based on objective criteria such as the size of a Sub-Fund and the dealing costs for a Sub-Fund and should be revised from time to time and approved by the Board of Directors of the SICAV. Sub-Funds can operate a full swing pricing mechanism where the threshold is set to zero or a partial swing pricing mechanism where the threshold is greater than zero. Unless explicitly noted in the Sub-Fund appendix, the partial swing pricing mechanism applies by default.

The swing pricing mechanism may be applied across all the Sub-Funds, as disclosed in the Prospectus. The percentage by which the net asset value is adjusted (the “Swing Factor”) will be set by the Board of Directors and subsequently reviewed on a periodic basis to reflect an approximation of current dealing and other costs. The Swing Factor may vary from Sub-Fund to Sub-Fund due to different transaction costs in certain jurisdictions on the sell and the buy side but will not under normal circumstances exceed 2% of the original net asset value per Share. In exceptional circumstances, such as unusually large Shareholders’ trading activities or exceptional market conditions, and if it is deemed to be in the best interest of Shareholders, the Board of Directors reserves the right to increase the Swing Factor to a maximum of 5% of the original net asset value per Share. Whenever the Board of Directors exercises such right to increase the Swing Factor, the relevant notice shall be made available online at www.santanderassetmanagement.lu.

Swing pricing is applied on the capital activity at the level of a Sub-Fund (aggregate of inflows and outflows) and does not address the specific circumstances of each individual investor transaction. The decision to swing is based on the overall net-flows into a Sub-Fund, not per Share Class.

The net asset value per Share of each Share Class in a Sub-Fund will be calculated separately but any adjustment will be made on Sub-Fund level and in percentage terms, equally affecting the net asset value per Share of each Share Class. If swing pricing is applied to a Sub-Fund on a particular Valuation Day, the net asset value adjustment will be applicable to all transactions placed on that day. The swing pricing adjustments aim to protect the overall performance of Sub-Funds, to the benefit of existing investors. For the avoidance of doubt, any applicable performance fee will be charged on the basis of an unswung net asset value per Share.

Investors are advised that the volatility of the Sub-Fund’s net asset value might not reflect the true portfolio performance as a consequence of the application of swing pricing.

The factors and thresholds presented are applicable as of December 31, 2025, therefore they may have been subject to change during the year.

The swing price should be used for performance reporting in monthly factsheets and marketing material.

Santander GO Global High Yield Fund:

Swing threshold: 5% of the NAV

Swing factor Subs: 20 bps

Swing factor Reds: 20 bps

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 19 – SUBSEQUENT EVENTS

There are no subsequent events to disclose for the period from January 1, 2026 to the date of approval of the financial statements.

Notes to the financial statements as at December 31, 2025 (continued)

NOTE 20 - SUSTAINABLE FINANCE DISCLOSURE REGULATION (“SFDR”)

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities, except for those with the following annexes attached.

The Sub-Fund SANTANDER PROSPERITY has a sustainable investment objective within the meaning of article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") as set out in the Annex I of the Prospectus.

The following Sub-Funds promote environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") as set out in the Annex I of the Prospectus:

SANTANDER GO SHORT DURATION DOLLAR
SANTANDER EUROPEAN DIVIDEND
SANTANDER AM EURO CORPORATE BOND
SANTANDER AM EURO EQUITY
SANTANDER MULTI ASSET CONSERVATIVE GROWTH
SANTANDER MULTI ASSET AGGRESSIVE GROWTH
SANTANDER CORPORATE COUPON

SANTANDER MULTI INDEX INCOME

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the Sustainable Finance Disclosure Regulation section.

SANTANDER SICAV

Appendix: Unaudited Additional Disclosures

APPENDIX 1: GLOBAL RISK MANAGEMENT

In terms of risk management, the commitment approach has been selected in order to determine the global exposure for the following Sub-Funds:

- SANTANDER GO SHORT DURATION DOLLAR
- SANTANDER LATIN AMERICAN CORPORATE BOND
- SANTANDER GO NORTH AMERICAN EQUITY OPPORTUNITIES
- SANTANDER EUROPEAN DIVIDEND
- SANTANDER AM LATIN AMERICAN FIXED INCOME
- SANTANDER AM EURO CORPORATE BOND
- SANTANDER AM EURO EQUITY
- SANTANDER AM LATIN AMERICAN EQUITY OPPORTUNITIES
- SANTANDER MULTI ASSET CONSERVATIVE GROWTH
- SANTANDER MULTI ASSET AGGRESSIVE GROWTH
- SANTANDER CORPORATE COUPON
- SANTANDER SELECT DEFENSIVE
- SANTANDER SELECT MODERATE
- SANTANDER SELECT DYNAMIC
- SANTANDER MULTI INDEX SUBSTANCE
- SANTANDER MULTI INDEX BALANCE
- SANTANDER MULTI INDEX AMBITION
- SANTANDER GO GLOBAL EQUITY
- SANTANDER GO GLOBAL ENVIRONMENTAL SOLUTIONS (until on November 28, 2025)
- SANTANDER LATIN AMERICAN INVESTMENT GRADE BOND
- SANTANDER FUTURE WEALTH
- SANTANDER PROSPERITY
- SANTANDER TARGET MATURITY 2026 EURO
- SANTANDER TARGET MATURITY 2026 DOLLAR
- SANTANDER GO EMERGING ASIA EQUITY
- SANTANDER US EQUITY
- SANTANDER TARGET MATURITY 2025 EURO
- SANTANDER TARGET MATURITY EURO II
- SANTANDER TARGET MATURITY EURO III
- SANTANDER MULTI INDEX INCOME
- SANTANDER US EQUITY HEDGED
- SANTANDER TARGET MATURITY EURO IV
- SANTANDER TARGET MATURITY EURO V
- SANTANDER FINANCIAL CREDIT FUND

In terms of risk management, the VAR approach has been selected in order to determine the global exposure for the following Sub-Funds:

- SANTANDER SELECT INCOME
- SANTANDER TOTAL RETURN
- SANTANDER GO DYNAMIC BOND
- SANTANDER GO GLOBAL HIGH YIELD BOND

The Management Company of the Fund after a risk profile assessment, decides between the commitment approach and the VaR (99%, 1 Month) to determine the global market risk exposure.

Appendix: Unaudited Additional Disclosures (continued)

APPENDIX 1: GLOBAL RISK MANAGEMENT (continued)

The VaR limit use (minimum, maximum and average) is calculated by dividing the Daily VaR by the daily VaR limit (20% for absolute return VaR Sub-Fund).

The global market risk exposure information for the Sub-Funds using VaR for the year ending December 31, 2025, is as follows:

Sub-Fund	Global Risk calculation Method	VaR model	Reference Portfolio	VaR limit (20 days, 99% confidence)	Minimum VaR during the year	Maximum VaR during the year	Average VaR during the year	Average level of leverage reached during the year
SANTANDER SELECT INCOME	Absolute VaR	Historical VaR	No Benchmark	20%	1.88%	7.57%	4.40%	110.48%
SANTANDER TOTAL RETURN	Absolute VaR	Historical VaR	No Benchmark	20%	1.83%	13.61%	5.77%	264.21%
SANTANDER GO DYNAMIC BOND	Absolute VaR	Historical VaR	No Benchmark	20%	1.30%	3.61%	2.24%	286.81%
SANTANDER GO GLOBAL HIGH YIELD BOND	Absolute VaR	Historical VaR	No Benchmark	20%	1.85%	5.63%	3.22%	41.36%

APPENDIX 2: REMUNERATION OF THE MEMBERS OF THE MANAGEMENT COMPANY OF THE SICAV

The Management Company of the SICAV has adopted a Remuneration Policy, which is in accordance with the principles established by the law of May 10, 2016, amending the law of December 17, 2010 (“the UCITS Law”). The remuneration policy is aligned with Santander Asset Management Group’s remuneration policy, based on the principles of competitiveness and fairness.

The Management Company of the SICAV has established remuneration policies for those categories of staff, including senior management, risk takers, control functions, and any employees within the Management Company of the SICAV receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profiles of the Management Company of the SICAV, that:

-are compliant with and promote a sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profiles of the SICAV or with its Articles of Incorporation;

-are in line with the business strategy, objectives values and interests of the Management Company of the SICAV and which do not interfere with the obligation of the Management Company of the SICAV to act in the best interests of the SICAV and of its investors;

-include an assessment process based on the longer-term performance of the SICAV; and

-appropriately balance fixed and variable components of total remuneration.

The Board, in its supervisory function, is required to approve the remuneration policy and to oversee its implementation. The Board has the primary responsibility for ensuring that the ultimate goal of having sound and prudent remuneration policy and structures is not improperly circumvented. The Conducting Officers are in charge of making sure that the remuneration policy is implemented. They elaborate procedures to this effect and submit them to the Board. By virtue of the principle of proportionality, the Management Company has a remuneration committee.

Appendix: Unaudited Additional Disclosures (continued)

APPENDIX 2: REMUNERATION OF THE MEMBERS OF THE MANAGEMENT COMPANY OF THE SICAV (continued)

The Management Company offers to its employees a remuneration package that includes:

(i) a fixed salary,

(ii) a variable pay and

(iii) benefits.

The fixed salary represents the main component of the total remuneration and the payment of a variable pay is not mandatory. All employees are eligible to receive a variable pay. The Management Company only pays variable remuneration in the form of bonuses payable up-front directly in full after their allocation. By virtue of the principle of proportionality the Management Company does not pay variable remuneration in shares or in other type of financial instruments issued by the UCITS. The Management Company offers fixed salaries whose amount is based on criteria such as the level of education, the degree of seniority, the level of expertise and skills required the constraints and job experience, the relevant business sector and region. In the calculation of the variable pay, the Management Company uses an award process taking into account risk measurement while assessing performance.

An annual appraisal process is used to evaluate and measure each employee's performance against defined objectives. The performance of an employee is measured through qualitative and quantitative criteria based on various factors (i.e. business and financial results, client service, technical skills, etc.). The Management Company takes into account the individual performance of the employee and of his/her business unit as well as of the UCITS managed and of the overall of the result of the Company.

Total number of employees as of December 31, 2025 was 15 full time employees (15).

The Director position of the Management Company of the SICAV is not remunerated from the accounts of the Management Company of the SICAV. The Management Company contemplates to appoint independent director(s) in accordance with the UCITS Directive, who will only receive a fixed remuneration.

The total amount of such remuneration paid in respect of the financial year ending December 31, 2025 by the Management Company to its staff (15 beneficiaries as at December 31, 2025) and in relation to the activity taken for this Fund is EUR 1,149,317, which is comprised of a fixed remuneration of EUR 1,012,958, and a variable remuneration of EUR 136,359.

The fixed remuneration of the independent director(s) of the SICAV of the financial year ending December 31, 2025, is EUR 25,000.

The risk management function has assessed how the variable remuneration structure affects the risk profile of the Management Company. The compliance function analysed how the remuneration structure affects the Management Company's compliance with legislation, regulations and internal policies. The Management Company of the SICAV is not aware of any deficiency in the remuneration policy. Moreover, the remuneration policy has been updated on June 17, 2025.

Details of the remuneration policy of the Management Company of the SICAV, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits are available at http://www.santanderassetmanagement.lu. A paper copy will be made available free of charge upon request.

APPENDIX 3: SECURITIES FINANCING TRANSACTIONS REGULATION ("SFTR")

As at December 31, 2025, the SICAV is in the scope of the requirements of the Regulation (EU) 2015/2365 on transparency of Securities Financing Transactions and of Reuse ("SFTR"). Nevertheless, no corresponding transactions were carried out as at December 31, 2025.

Criteria

- Appropriate use of the Annex IV (for Article 8 products) and Annex V (for Article 9 products) of the Regulation 2022/1288 of 6 April 2022 supplementing Regulation (EU) 2019/2088 of the European Parliament and of the Council with regard to regulatory technical standards, as amended (the "RTS");

- Conformity of the client's Sustainable Finance Disclosure Regulation (SFDR) periodic reporting layout vis-à-vis the general principles for the presentation of information stated in the Article 2 of the RTS;

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088, as amended (the "SFDR Regulation") Art. 11 to the disclosure made in the SFDR periodic reporting;

- All relevant sections of either the Annex IV or V of the RTS, and relevant requirements as defined in the RTS, have been included and responded to;

- Consistency of the qualitative statement of sustainable indicators with the evidence obtained for the numeric information on those indicators;

- Appropriate application of the formula according to the RTS in the following questions:

  – What were the top investments of this financial product?

  – What was the proportion of sustainability-related investments?

- Consistency of the information described in the financial information of the annual report with the SFDR Periodic reporting;

- When applicable, consistency of the information described in the SFDR Periodic reporting with the information disclosed in the pre-contractual documents (Prospectus "Investment policy section" & RTS Annex II-III).

Where at least one Sub-Fund is not having sustainable investments

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 11 to the methodology related to the promotion of environmental or social characteristics (the "*Methodology for E/S characteristics*") described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);

- Appropriate design of the formulas with the Methodology for E/S characteristics (the "E/S Characteristics Formulas");

- Appropriate application of the E/S Characteristics Formulas.

Where at least one Sub-Fund is having sustainable investments according to the Article 2(17) of the SFDR RTS and opt to report a 0% Taxonomy alignment

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 2(17) to the methodology (the "*Sustainable Investments Methodology*") described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);

- Appropriate design of the formula with the Sustainable Investments Methodology (the "SFDR Sustainable Investments Formulas");

- Appropriate application of the SFDR Sustainable Investments Formulas.

Where at least one Sub-Fund is having sustainable investments according to the Article 3 of the EU Taxonomy Regulation 2020/852 and not per SFDR Article 2(17)

- Appropriate application of the methodology outlined in EU Taxonomy Regulation 2020/852;
- Appropriate design of the formula with the EU Taxonomy Regulation 2020/852 (the "EU Taxonomy Formulas");
- Appropriate application of the EU Taxonomy Formulas.

Where at least one Sub-Fund is having sustainable investments according to the Article 2(17) of the SFDR RTS and also opt to report following the EU Taxonomy

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 2(17) to the methodology (the "*Sustainable Investments Methodology*") described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formula with the Sustainable Investments Methodology (the "SFDR Sustainable Investments Formulas");
- Appropriate application of the methodology outlined in EU Taxonomy Regulation 2020/852;
- Appropriate design of the formula with the EU Taxonomy Regulation 2020/852 (the "EU Taxonomy Formulas");
- Appropriate application of the SFDR Sustainable Investments Formulas and EU Taxonomy Formulas.

Where at least one Sub-Fund is opting to report the Principal Adverse Impact

- Appropriate design of the formulas with the elements outlined in the Annex I supplementing the EU Regulation 2019/2088 (the "PAI formulas");
- Appropriate application of the PAI formulas.

Where at least one Sub-Fund has designated an index as a reference benchmark

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 11 1. (b) (ii) to the design of the formulas (the "Benchmark Formulas");
- Appropriate application of the Benchmark Formulas.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Santander GO Short Duration Dollar**

Legal entity identifier: **95980020140005538004**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: _%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **44.01%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: _%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Strategy set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (01 January 2025 - 31 December 2025). At the end of the reference period, the Strategy held 81.20% of investments with positive environmental and/or social characteristics and 44.01% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and/or social characteristics and those that meet the thresholds for being considered as sustainable investments.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Strategy promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Strategy fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Strategy incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant issuers for the reference period exhibiting such characteristics.

In summary: the Strategy met its pre-contractual committed minimums related to environmental and/or social characteristics and sustainable investments policy throughout the reference period. The Strategy applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Strategy were met is based on whether the Strategy held any positions in issuers during the reference period that would have been

prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Strategy promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the Strategy's custom universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Strategy held 81.20% of investments with positive environmental and/or social characteristics and 44.01% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

...and compared to previous periods?

	E/S Characteristics	Sustainable Investments	Environmental Taxonomy-aligned	Other Environmental	Social
31/12/2025	81.20%	44.01%	0.00%	26.91%	17.10%
31/12/2024	82.57%	45.72%	0.04%	27.32%	18.37%
31/12/2023	74.36%	40.01%	0.00%	22.64%	17.37%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Strategy partially made were comprised of any individual or combination of the following during the reference period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators which may have included the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as a company producing solar panels or clean energy technology that met the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the company is considered a sustainable investment; or (ii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to peers based on certain operational sustainability indicators. For example, scoring in the top 20% relative to peers on total waste impact contributes to a transition to a circular economy.

The actual contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the reference period. The Strategy was required to invest 10% in sustainable investments. At no time during the period did the Strategy hold sustainable investments below its committed minimum. At the end of the reference period, 44.01% of its assets were sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Strategy intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those issuers which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those issuers demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those issuers that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 – 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by issuers or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the benchmark.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Norms-based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Strategy prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Strategy considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Strategy also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee issuers based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/01/2025 - 31/12/2025

The following figures are monthly averages calculated using end-of-month holdings for the period 01/01/2025 to 31/12/2025

What was the proportion of sustainability-related investments?

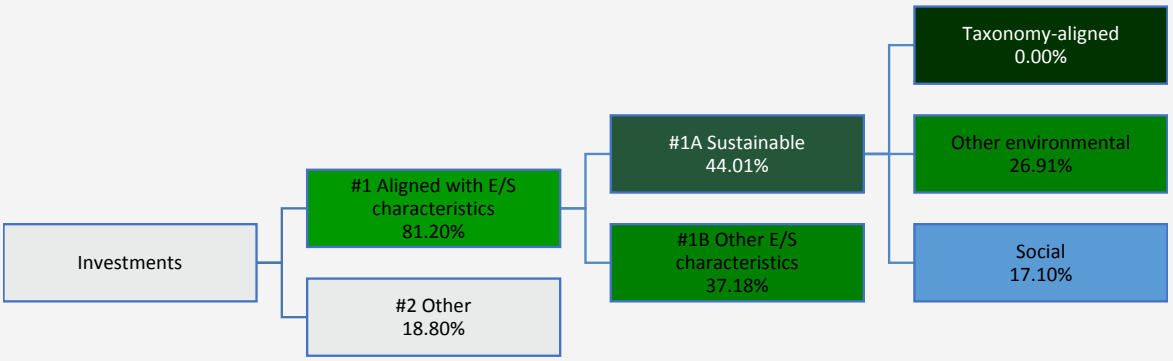

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

At the end of the reference period, the Strategy allocated 81.20% of its assets to issuers that exhibited positive environmental and/or social characteristics and 44.01% of assets to sustainable investments. The Strategy did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Strategy as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Although the Strategy promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds

(for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

The following figures are monthly averages calculated using end-of-month holdings for the period 01/01/2025 to 31/12/2025

Sector	Sub Sector	% Assets
Finance	Banking	35.27
Finance	Insurance	14.28

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. The alignment of the Sub-Fund is 0.00% based on turnover and is a by-product of the Sub-Fund's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs further illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period. Holdings of less than 1% will not be reflected in the bar graph.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☑ Yes:

☐ In fossil gas ☑ In nuclear energy

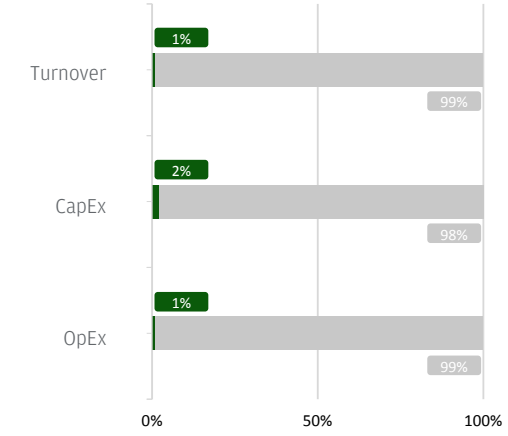

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

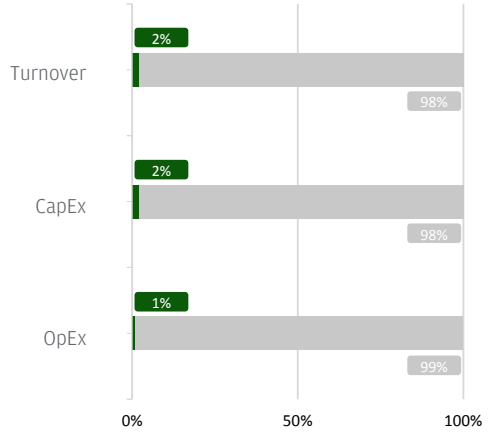

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
- Taxonomy-aligned: Nuclear
- Taxonomy-aligned (no fossil gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
- Taxonomy-aligned: Nuclear
- Taxonomy-aligned (no fossil gas and nuclear)
- Non Taxonomy-aligned

This graph represents 87% of the total investment.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Further to the above, the Strategy has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.52%, at the end of the reference period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Taxonomy-aligned
31/12/2025	0.00%
31/12/2024	0.04%
31/12/2023	0.00%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 26.91% of assets at the end of the reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria**

for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 17.10% of assets at the end of the reference period.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 18.80% of assets in “other” investments were comprised of issuers that did not meet the criteria described in response to above question entitled, “How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under “other”. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including “other” investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and/or social characteristics.
- The values and norms-based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Strategy on www.jpmorganassetmanagement.lu for further information by searching for your particular Strategy and accessing the ESG Information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub-Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander European Dividend

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.57% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 95.41%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A- in 2023, A in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
ROCHE HOLDING PAR AG	Pharmaceuticals & Med Research	6.22%	Switzerland
ALLIANZ	Insurance	4.78%	Germany
TOTALENERGIES	Energy - Fossil Fuels	4.76%	France
AXA SA	Insurance	4.66%	France

Largest Investments	Sector	% Assets	Country Name
VINCI SA	Industrial & Commercial Services	4.05%	France
SHELL PLC	Energy - Fossil Fuels	3.96%	Netherlands
NATIONAL GRID PLC	Utilities	3.71%	United Kingdom
ZURICH INSURANCE GROUP AG	Insurance	3.57%	Switzerland
RECKITT BENCKISER GROUP PLC	Personal & Household Products & Services	3.20%	United Kingdom
BRITISH AMERICAN TOBACCO	Food & Beverages	3.16%	United Kingdom
RIO TINTO PLC	Mineral Resources	2.97%	United Kingdom
NOVARTIS AG	Pharmaceuticals & Med Research	2.64%	Switzerland
IMPERIAL BRANDS PLC	Food & Beverages	2.62%	United Kingdom
DIAGEO PLC	Food & Beverages	2.57%	United Kingdom
SANOFI SA	Pharmaceuticals & Med Research	2.42%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

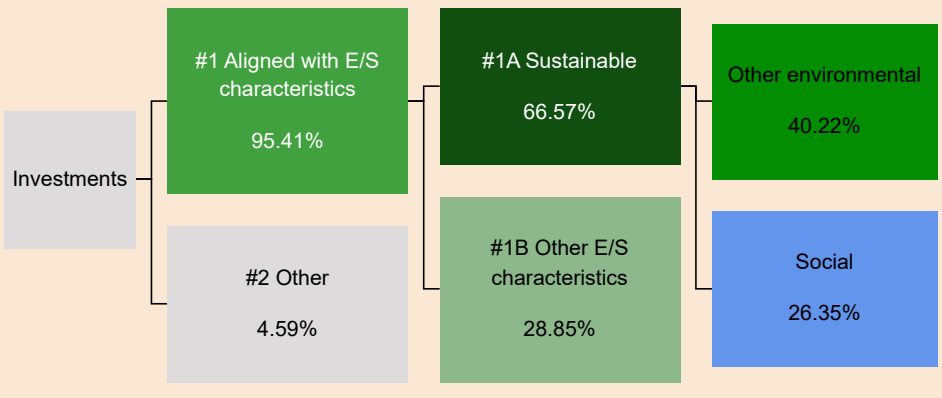

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 95.41% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 66.57%, broken down into:
  - 26.35% corresponding to socially sustainable investments.
  - 40.22% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Insurance	18.7%
Pharmaceuticals & Med Research	14.7%
Food & Beverages	13.8%
Energy - Fossil Fuels	10.2%
Utilities	6.7%
Industrial & Commercial Services	5.6%
Others	4.3%
Telecommunications Services	3.7%
Mineral Resources	3.6%
Personal & Household Products & Services	3.1%
Automobiles & Auto Parts	2.9%
Transportation	2.9%
Food & Drug Retailing	2.6%
Industr Goods	1.5%
Banking & Investment Services	1.5%
Healthcare Services & Equipment	1.4%
Applied Resources	1.3%
Software & IT Services	0.9%
Cyclical Consumer Products	0.6%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy

[ ] No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

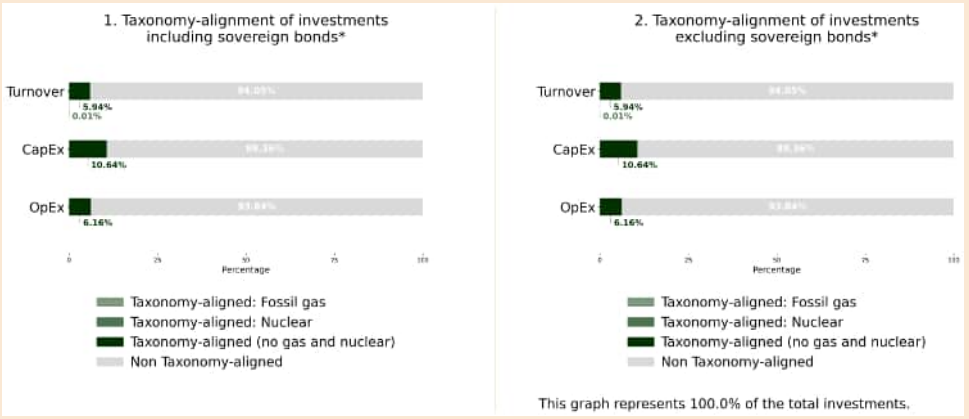

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.86% in turnover, in 3.18% CapEx and in 2.67% OpEx and in transition activities 0.1% in turnover, 0.51% in CapEx and 0.11% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 2.06% in 2022, 4.41% in 2023, 6.16% in 2024, and 5.94% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 40.22%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 26.35%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 4.59% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander AM Euro Corporate Bond

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.78% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 97.78%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A- in 2023, A- in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
AMUNDI EUR CORPORATE BOND -3Y ESG	Funds	3.93%	Luxembourg
FRANCE (REPUBLIC OF)	Government Activity	2.64%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

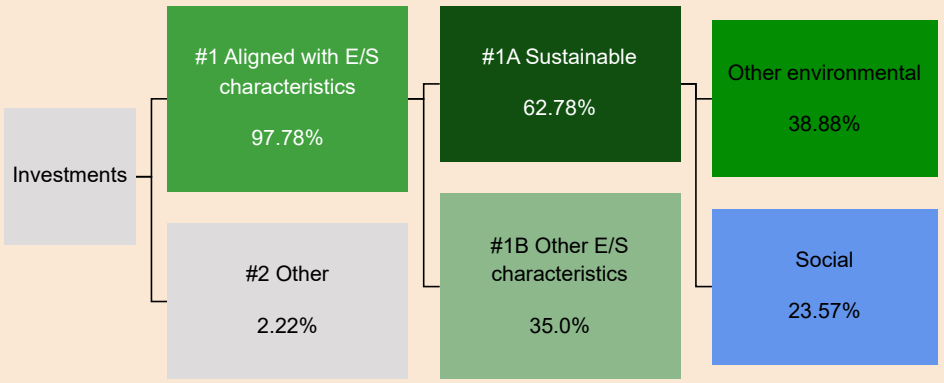

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 97.78% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 62.78%, broken down into:
  - 23.57% corresponding to socially sustainable investments.
  - 38.88% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Banking & Investment Services	34.6%
Utilities	10.8%
Food & Beverages	6.5%
Telecommunications Services	5.2%

Cyclical Consumer Services	0.7%
Food & Drug Retailing	0.7%
Technology Equipment	0.7%

Sectors	% Assets
Mineral Resources	0.6%
Applied Resources	0.6%
Chemicals	0.5%
Investment Holding Companies	0.3%
Renewable Energy	0.2%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

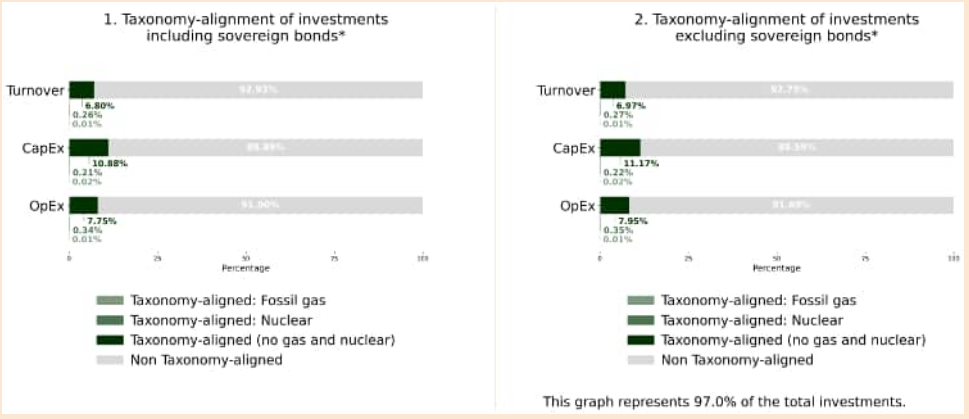

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[X] In fossil gas [X] In nuclear energy
[ ] No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 3.29% in turnover, in 4.88% CapEx and in 5.08% OpEx and in transition activities 0.29% in turnover, 0.43% in CapEx and 0.12% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 2.15% in 2022, 5.74% in 2023, 6.18% in 2024, and 7.07% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 38.88%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 23.57%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 2.22% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander AM Euro Equity

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 95.86%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A in 2023, A in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
ASML HOLDING NV	Technology Equipment	6.43%	Netherlands
BANCO SANTANDER SA	Banking & Investment Services	4.47%	Spain
SAP	Software & IT Services	3.80%	Germany
ALLIANZ	Insurance	3.39%	Germany
SCHNEIDER ELECTRIC	Industr Goods	2.98%	France

Largest Investments	Sector	% Assets	Country Name
SIEMENS N AG	Industr Goods	2.92%	Germany
IBERDROLA SA	Utilities	2.83%	Spain
MUENCHENER RUECKVERSICHERUNGS-GESE	Insurance	2.80%	Germany
AIRBUS	Industr Goods	2.73%	France
INTESA SANPAOLO	Banking & Investment Services	2.58%	Italy
DEUTSCHE TELEKOM N AG	Telecommunications Services	2.57%	Germany
AXA SA	Insurance	2.39%	France
TOTALENERGIES	Energy - Fossil Fuels	2.33%	France
UNICREDIT	Banking & Investment Services	2.33%	Italy
FRESENIUS SE AND CO KGAA	Healthcare Services & Equipment	2.15%	Germany

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

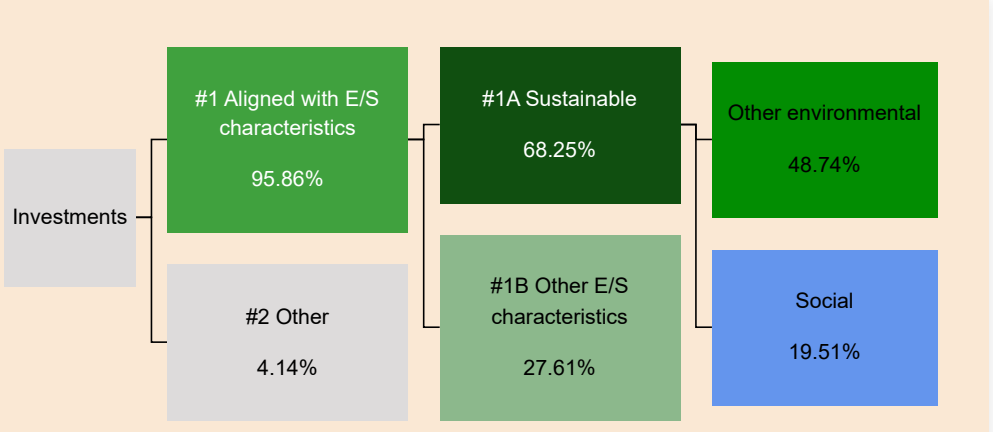

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 95.86% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 68.25%, broken down into:
  - 19.51% corresponding to socially sustainable investments.
  - 48.74% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sectors	% Assets
Banking & Investment Services	14.4%
Industr Goods	11.7%
Technology Equipment	7.6%
Insurance	7.6%
Software & IT Services	7.1%
Utilities	6.4%
Cyclical Consumer Products	4.7%
Industrial & Commercial Services	4.4%
Telecommunications Services	4.3%
Healthcare Services & Equipment	4.3%
Food & Beverages	3.2%
Energy - Fossil Fuels	2.9%
Chemicals	2.7%
Automobiles & Auto Parts	2.5%
Others	2.3%
Mineral Resources	1.9%
Retailers	1.6%
Renewable Energy	1.5%
Transportation	1.5%
Cyclical Consumer Services	1.3%
Real Estate	1.3%
Pharmaceuticals & Med Research	1.2%
Consumer Goods Conglomerates	1.1%
Food & Drug Retailing	1.0%
Personal & Household Products & Services	0.9%
Financial Technology (Fintech) & Infrastructure	0.6%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by

the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

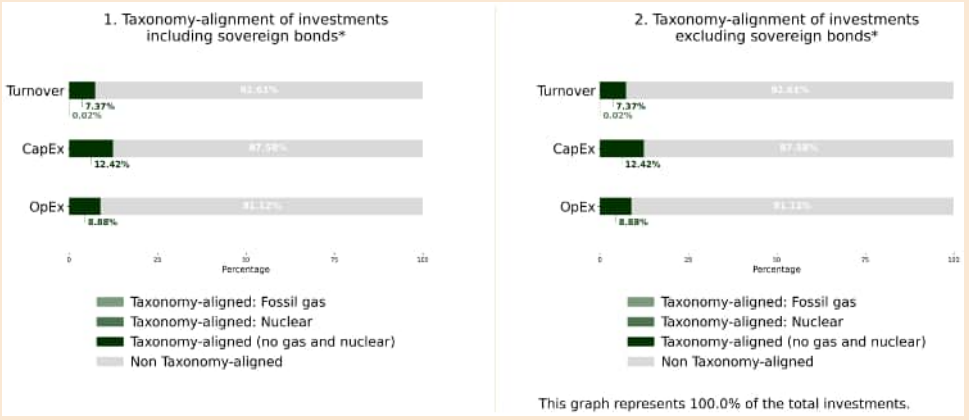

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 4.81% in turnover, in 5.55% CapEx and in 6.78% OpEx and in transition activities 0.09% in turnover, 1.11% in CapEx and 0.09% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 2.63% in 2022, 4.61% in 2023, 5.85% in 2024, and 7.39% in 2025.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 48.74%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 19.51%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 4.14% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels ("non-free", "partially free" and "free"), having excluded countries classified as "non-free".
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Multi Asset Conservative Growth

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.57% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 90.02%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
SPDR BLOOMBERG -10 Y U.S. CORPO BD	Funds	14.43%	Ireland
TREASURY NOTE	Government Activity	7.99%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

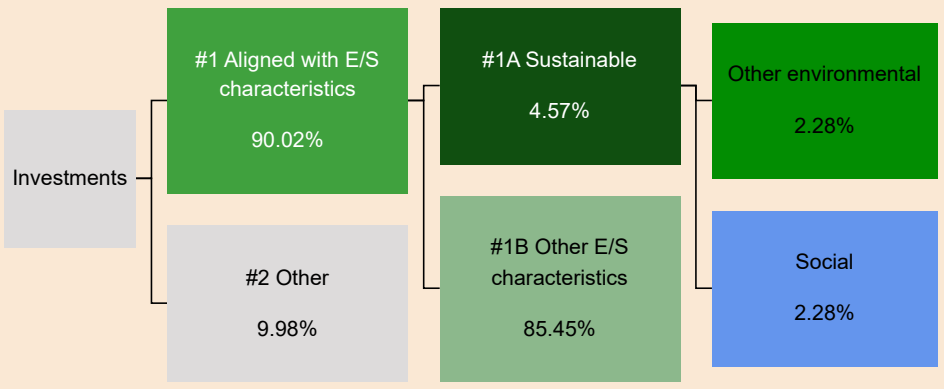

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 90.02% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 4.57%, broken down into:
  - 2.28% corresponding to socially sustainable investments.
  - 2.28% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	58.4%
Government Activity	25.3%
Others	16.3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

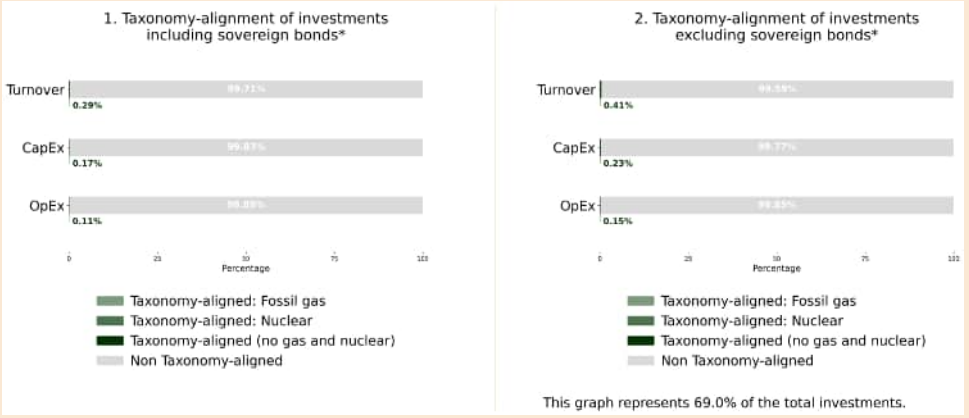

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 0.25% in turnover, in 0.08% CapEx and in 0.09% OpEx and in transition activities 0.01% in turnover, 0.02% in CapEx and 0.01% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 1.12% in 2023, 0.10% in 2024 and 0.29% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 2.28%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 2.28%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 9.98% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Multi Asset Aggresive Growth

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.85% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 94.44%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
INVESCO S&P UCITS ETF ACC	Funds	10.30%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

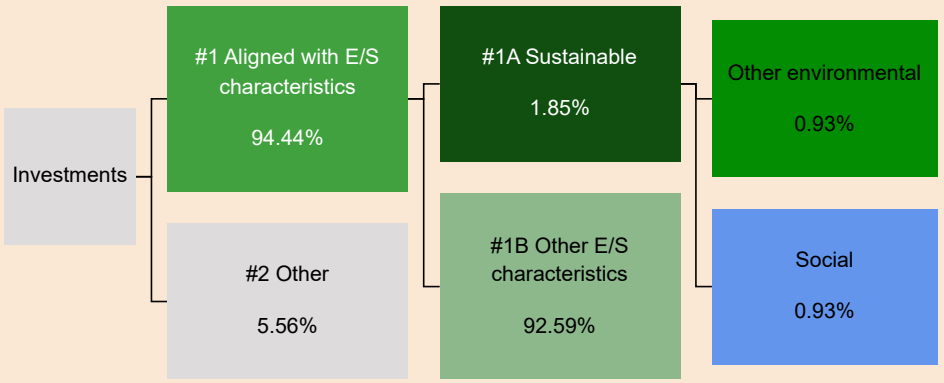

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 94.44% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 1.85%, broken down into:
  - 0.93% corresponding to socially sustainable investments.
  - 0.93% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	88.6%
Others	6.0%
Government Activity	5.3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

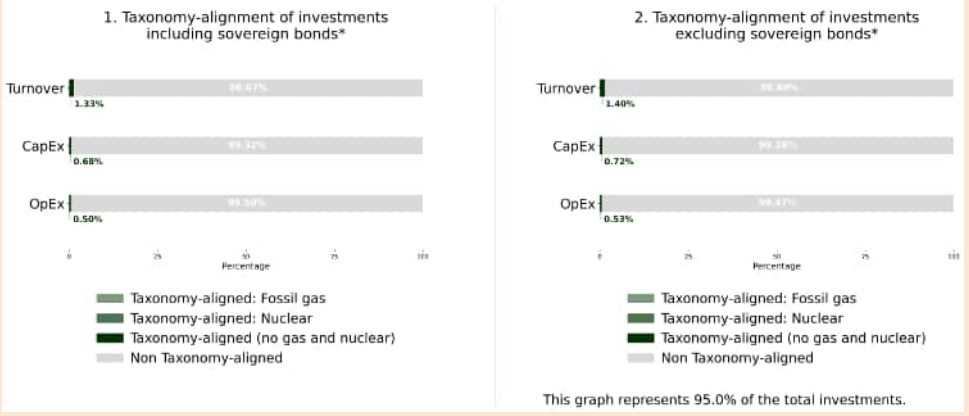

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.24% in turnover, in 0.38% CapEx and in 0.41% OpEx and in transition activities 0.07% in turnover, 0.06% in CapEx and 0.02% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 0.16% in 2023, 0.35% in 2024 and 1.33% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 0.93%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 0.93%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 5.56% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Corporate Coupon

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.29% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 97.9%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A- in 2023 A in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

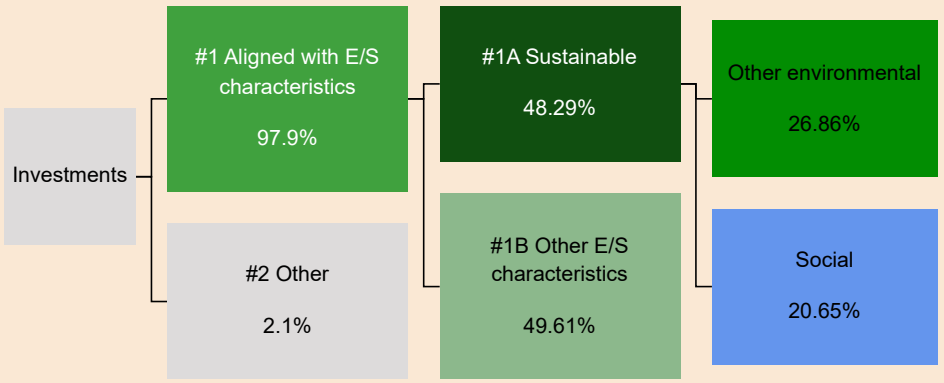

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 97.9% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 48.29%, broken down into:
  - 20.65% corresponding to socially sustainable investments.
  - 26.86% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Banking & Investment Services	53.1%
Food & Beverages	6.6%
Telecommunications Services	6.1%
Pharmaceuticals & Med Research	5.2%
Energy - Fossil Fuels	4.4%
Real Estate	4.2%
Utilities	3.7%
Healthcare Services & Equipment	2.6%
Automobiles & Auto Parts	2.4%
Cyclical Consumer Services	2.2%
Software & IT Services	2.1%
Technology Equipment	1.7%
Others	1.7%
Insurance	1.0%
Mineral Resources	0.8%
Personal & Household Products & Services	0.5%
Chemicals	0.5%
Retailers	0.5%
Transportation	0.5%
Industr Goods	0.3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

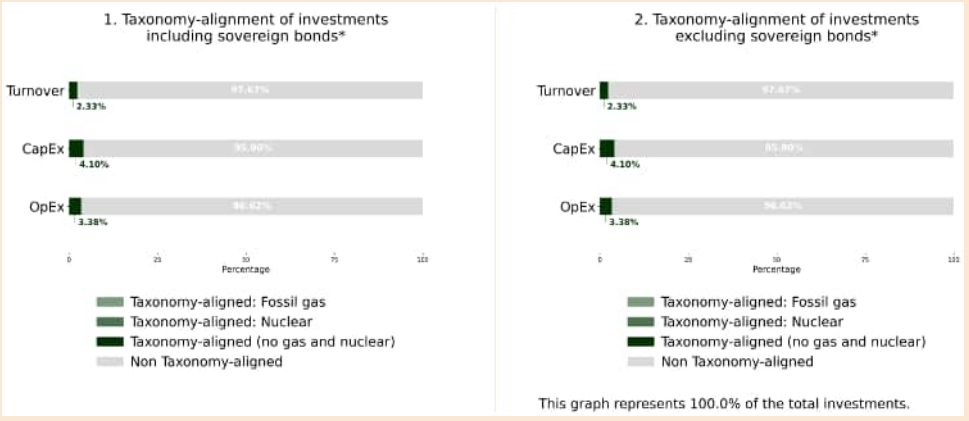

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.01% in turnover, in 2.06% CapEx and in 2.38% OpEx and in transition activities 0.06% in turnover, 0.12% in CapEx and 0.01% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 2.07% in 2022, 2.05% in 2023, 1.50% in 2024, and 2.33% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 26.86%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 20.65%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 2.1% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Select Defensive

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.67% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 94.02%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
UBS BBG EUR TREASURY -10 UCITS ETF	Funds	8.19%	Luxembourg
ISHARES GOVT BOND -5YR UCITS ETF	Funds	5.12%	Ireland

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

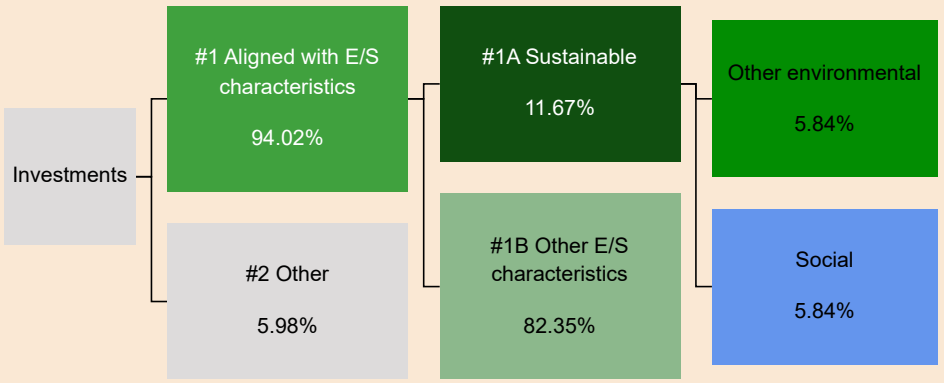

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 94.02% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 11.67%, broken down into:
  - 5.84% corresponding to socially sustainable investments.
  - 5.84% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	94.1%
Others	3.8%
Banking & Investment Services	1.3%
Government Activity	0.8%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

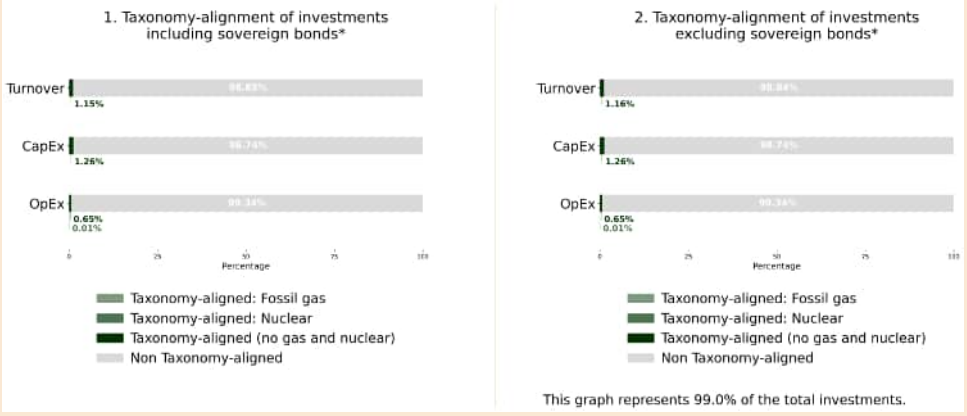

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 0.61% in turnover, in 0.5% CapEx and in 0.53% OpEx and in transition activities 0.04% in turnover, 0.08% in CapEx and 0.02% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 0.65% in 2022, 1.67% in 2023, 0.88% in 2024, and 1.16% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 5.84%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 5.84%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 5.98% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Select Moderate

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.58% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 92.55%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
UBS BBG EUR TREASURY -10 UCITS ETF	Funds	11.78%	Luxembourg

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

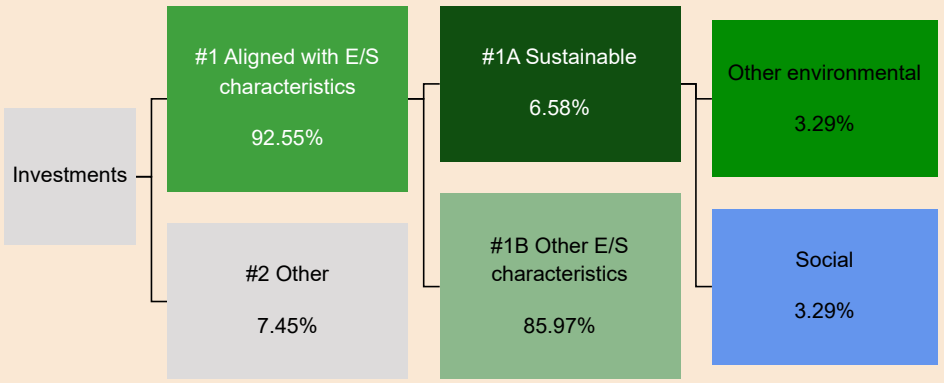

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 92.55% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 6.58%, broken down into:
  - 3.29% corresponding to socially sustainable investments.
  - 3.29% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	91.3%
Others	5.3%
Banking & Investment Services	2.6%
Government Activity	0.8%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

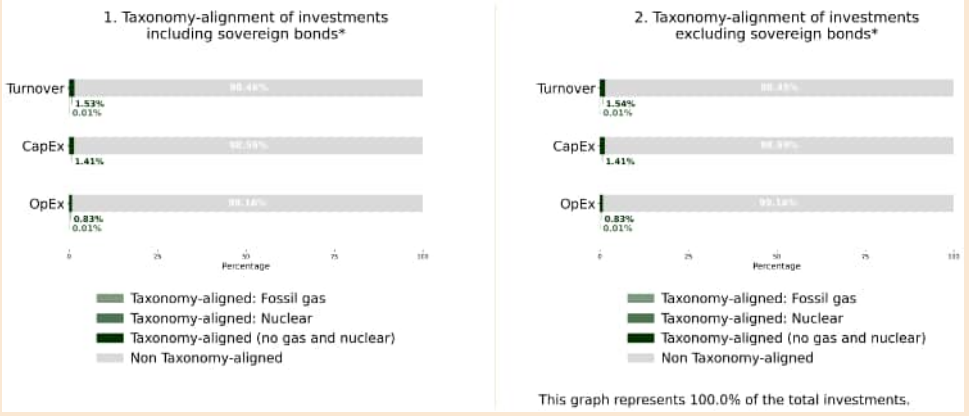

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.07% in turnover, in 0.58% CapEx and in 0.62% OpEx and in transition activities 0.06% in turnover, 0.09% in CapEx and 0.03% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 0.95% in 2022, 1.77% in 2023, 1.34% in 2024, and 1.54% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 3.29%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 3.29%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 7.45% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Select Dynamic

Legal entity identifier: 95980020140005500000

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.23% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 92.34%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2022, A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
AMUNDI S&P II UCITS ETF ACC	Funds	10.36%	Luxembourg
INVESCO S&P UCITS ETF ACC	Funds	10.02%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

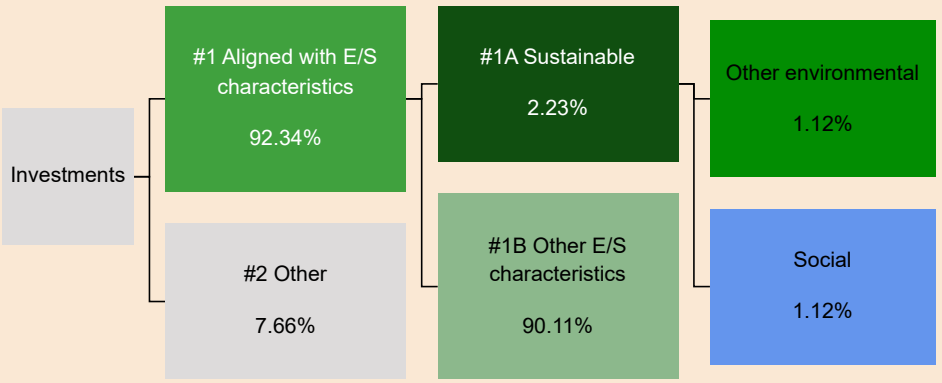

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 92.34% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 2.23%, broken down into:
  - 1.12% corresponding to socially sustainable investments.
  - 1.12% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	88.7%
Others	6.6%
Government Activity	2.4%
Banking & Investment Services	2.3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

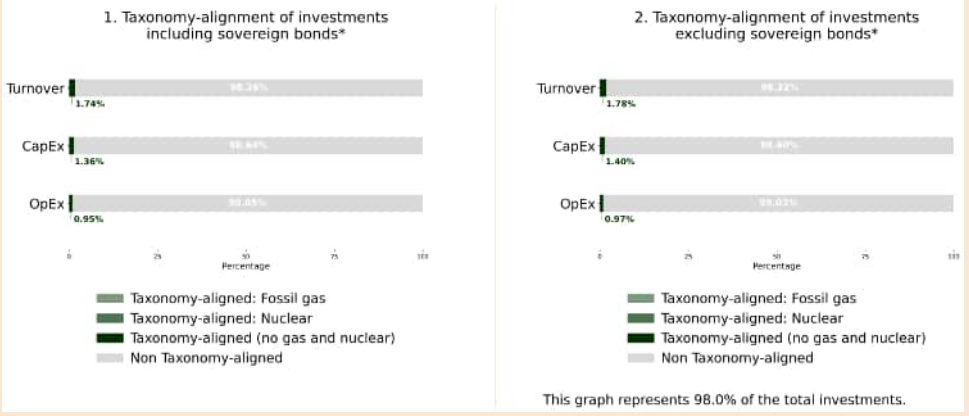

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.5% in turnover, in 0.64% CapEx and in 0.69% OpEx and in transition activities 0.08% in turnover, 0.1% in CapEx and 0.03% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 1.27% in 2022, 1.88% in 2023, 1.86% in 2024, and 1.74% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 1.12%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.12%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 7.66% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Multi Index Substance

Legal entity identifier: 959800584EXE1C3KEB87

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.85% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made **sustainable investments with a social objective:**	☒ with a social objective
	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 97.9%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A- in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

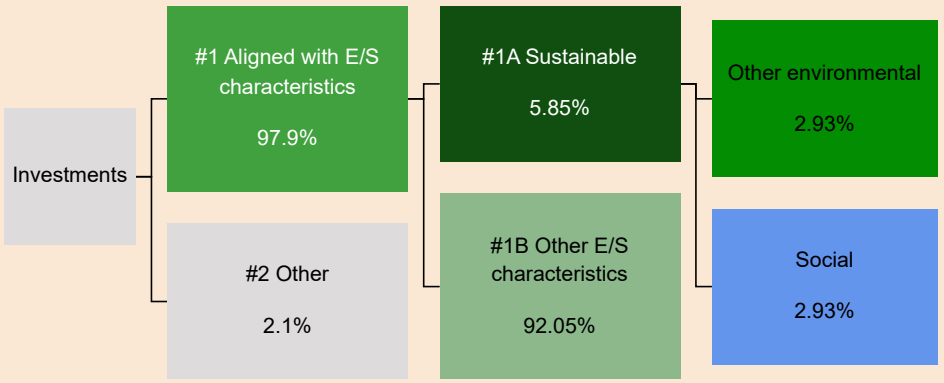

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 97.9% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 5.85%, broken down into:
  - 2.93% corresponding to socially sustainable investments.
  - 2.93% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	97.9%
Others	2.1%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

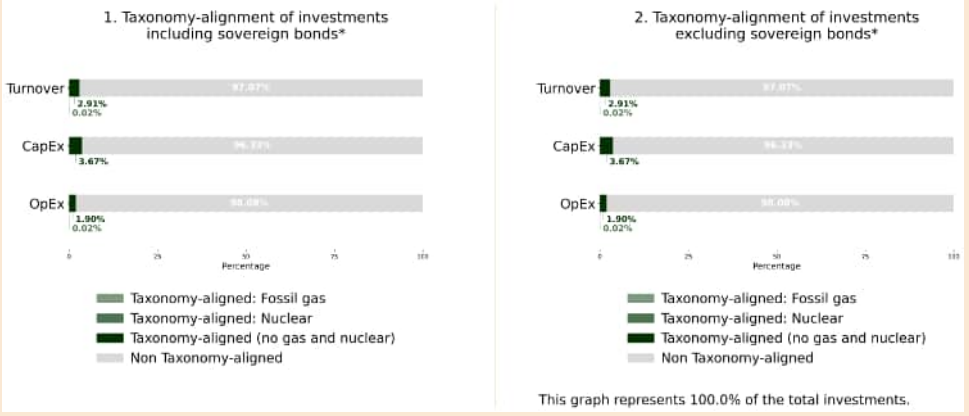

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.23% in turnover, in 1.48% CapEx and in 1.6% OpEx and in transition activities 0.09% in turnover, 0.21% in CapEx and 0.05% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 1.34% in 2023, 2.36% in 2024, and 2.93% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 2.93%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 2.93%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 2.1% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Multi Index Balance

Legal entity identifier: 9598007G946BVLPNB203

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.07% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 97.81%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

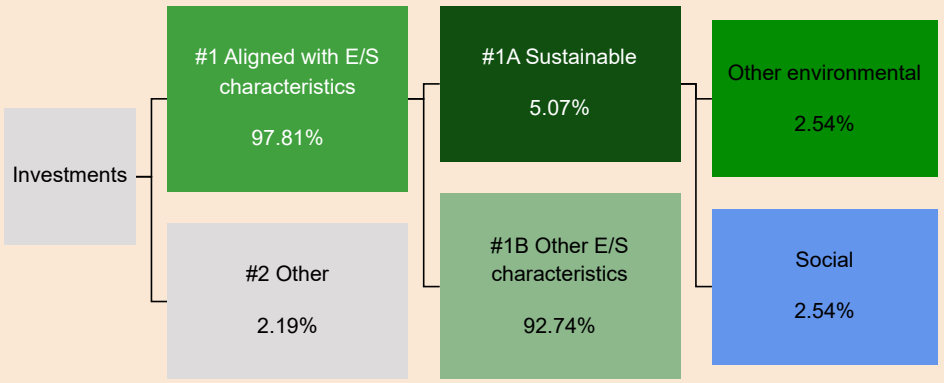

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 97.81% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 5.07%, broken down into:
  - 2.54% corresponding to socially sustainable investments.
  - 2.54% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	97.8%
Others	2.2%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

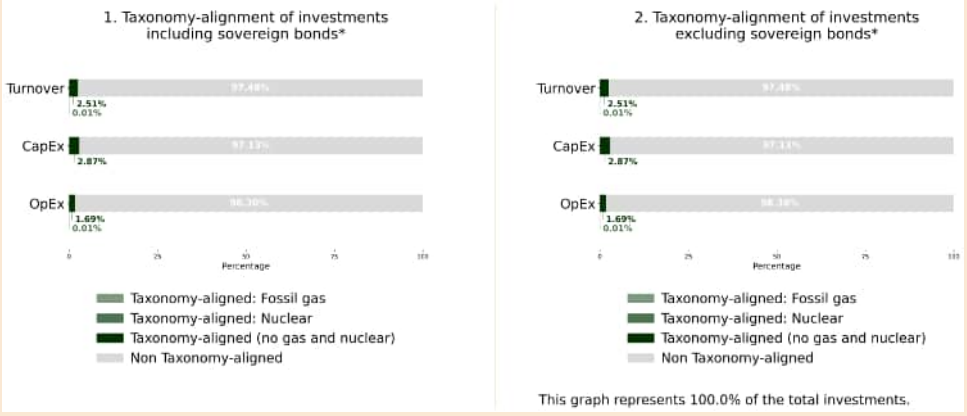

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.45% in turnover, in 1.3% CapEx and in 1.41% OpEx and in transition activities 0.1% in turnover, 0.19% in CapEx and 0.06% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 1.63% in 2023, 2.42% in 2024, and 2.53% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 2.54%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 2.54%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 2.19% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Multi Index Ambition

Legal entity identifier: 9598007G946BVLPNB203

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.04% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 97.46%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A in 2024, and A in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
AMUNDI MSCI EUROPE II UCITS ETF AC	Funds	12.11%	European Union

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

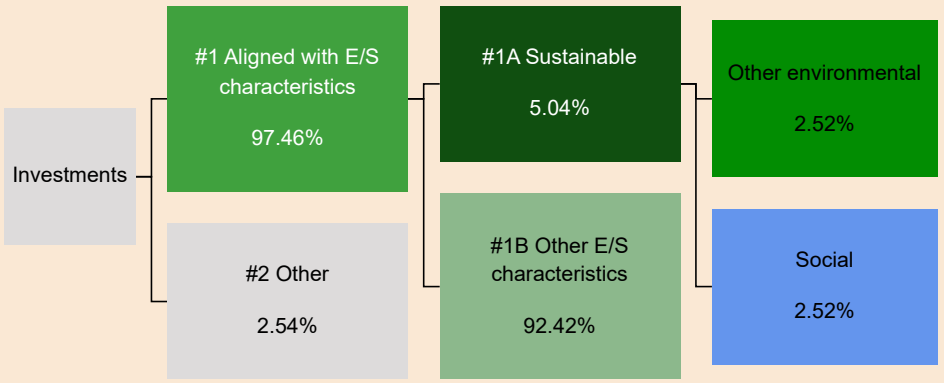

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 97.46% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 5.04%, broken down into:
  - 2.52% corresponding to socially sustainable investments.
  - 2.52% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	97.5%
Others	2.5%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

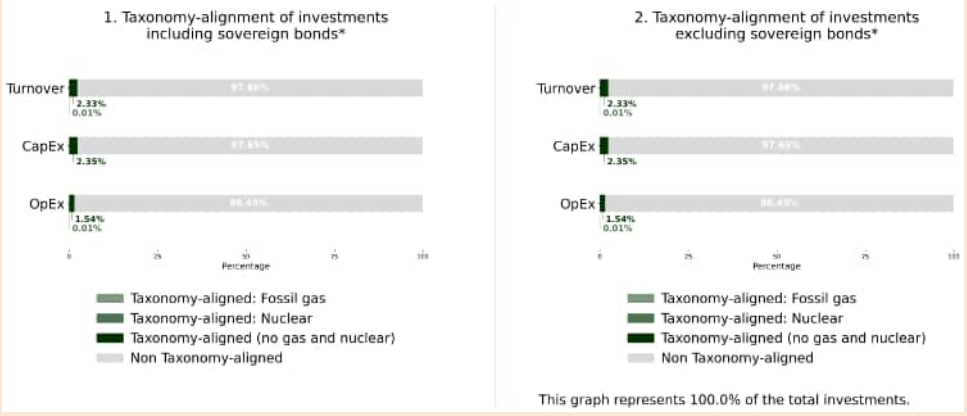

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.66% in turnover, in 1.13% CapEx and in 1.24% OpEx and in transition activities 0.1% in turnover, 0.17% in CapEx and 0.06% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 1.95% in 2023, 2.34% in 2024, and 2.34% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 2.52%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 2.52%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 2.54% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Select Income

Legal entity identifier: 9598006HEB2F274GR185

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.13% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 87.86%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
SANTANDER US EQUITY HEDGED X (USD)	Funds	2.79%	Luxembourg
AMUNDI EUR CASH CORPORATE IC	Funds	2.46%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

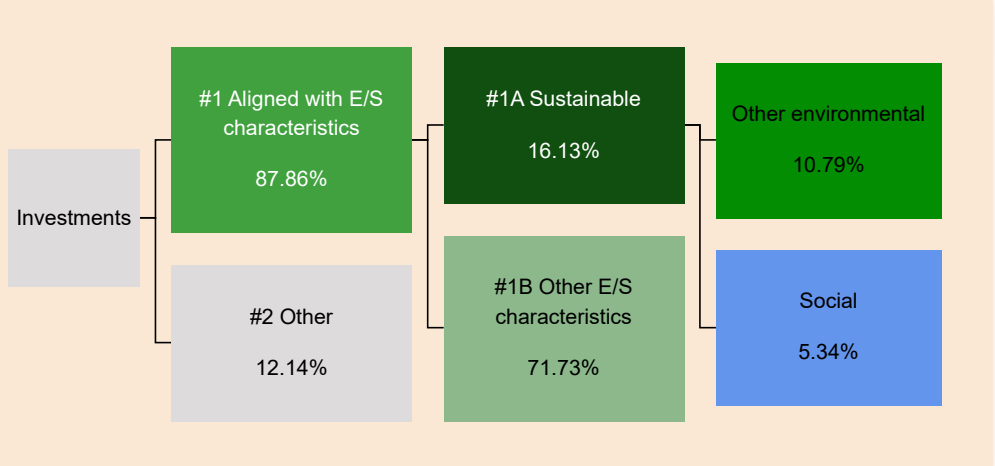

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 87.86% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 16.13%, broken down into:
  - 5.34% corresponding to socially sustainable investments.
  - 10.79% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	40.7%
Government Activity	23.8%
Others	13.7%
Banking & Investment Services	12.3%
Energy - Fossil Fuels	1.4%
Utilities	1.3%

Insurance	0.7%
Transportation	0.5%
Industrial & Commercial Services	0.5%
Healthcare Services & Equipment	0.5%
Investment Holding Companies	0.4%
Industr Goods	0.4%
Food & Beverages	0.3%
Automobiles & Auto Parts	0.3%
Cyclical Consumer Services	0.3%
Chemicals	0.3%
Software & IT Services	0.2%
Retailers	0.2%
Cyclical Consumer Products	0.2%
Pharmaceuticals & Med Research	0.1%
Food & Drug Retailing	0.1%
Financial Technology (Fintech) & Infrastructure	0.1%
Personal & Household Products & Services	0.1%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

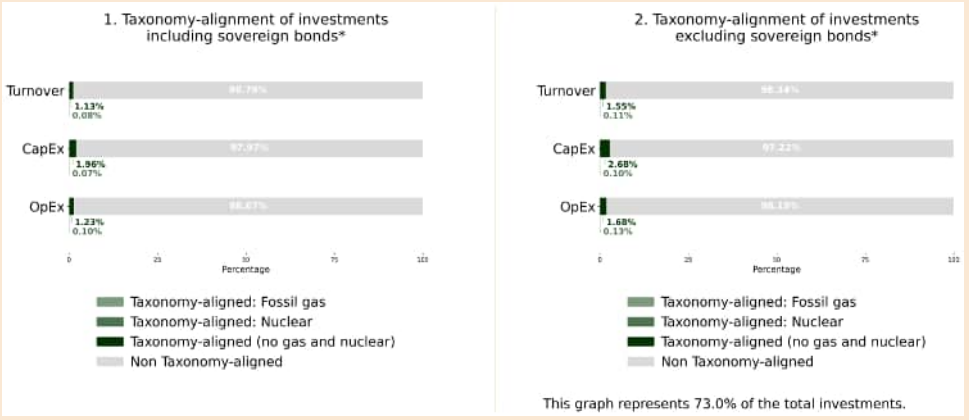

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy

[ ] No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 0.33% in turnover, in 0.69% CapEx and in 0.68% OpEx and in transition activities 0.05% in turnover, 0.15% in CapEx and 0.07% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 1.93% in 2023, 1.51% in 2024, and 1.21% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 10.79%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 5.34%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 12.14% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Latin American Investment Grade Bond

Legal entity identifier: 2221005XUWXMGGGB3M32

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.29% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. Until the end of May 2025, this included 0% exposure to companies with more than 15% revenues derived from conventional weapons. Following an update to the investment policy at the end of May 2025, the exclusion related to conventional weapons no longer applies. The Sub-Fund maintained 0% exposure to companies with more than 25% revenues derived from coal mining production, more than 25% revenues derived from coal power generation production, more than 30% revenues derived from unconventional fossil fuels, 0% revenues derived from controversial weapons, 0% revenues derived from tobacco production and/or 15% revenues derived from tobacco participation. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was B on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- ESG Rating at the issuer level: based on the above-mentioned methodology, the ESG Rating of each issuer has been periodically monitored and those issuers with the best ESG rating were selected (better than the benchmark, J.P. Morgan CEMBI Broad Diversified Latin America IG Index, defined in the Sub-Fund's prospectus).
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 88.35%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2021, A- in 2022, A- in 2023, A- in 2024, and B in this reported reference period.
- ESG Rating at the issuer level: the ESG Rating of issuers included in the Sub-Fund has remained better than the defined benchmark.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 75% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.

- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

period which is: 1/01/2025 - 31/12/2025

Largest Investments	Sector	% Assets	Country Name
SUZANO AUSTRIA GMBH	Applied Resources	3.61%	Brazil
CENCOSUD SA RegS	Food & Drug Retailing	2.87%	Chile

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

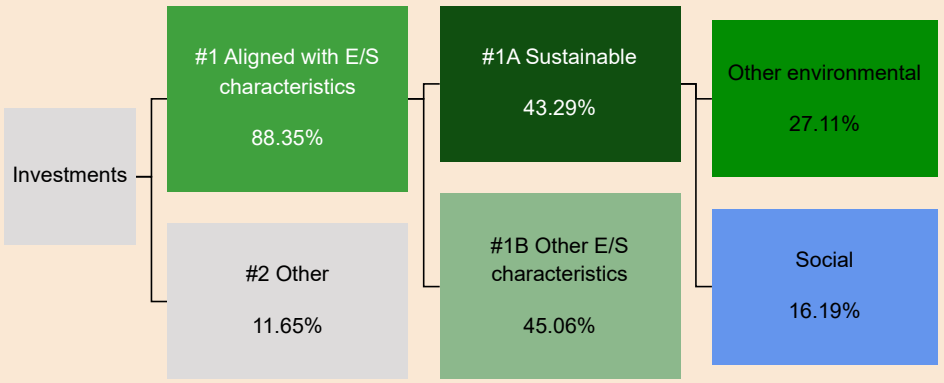

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 75% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 88.35% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 5% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 43.29%, broken down into:
  - 16.19% corresponding to socially sustainable investments.
  - 27.11% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Banking & Investment Services	19.1%
Utilities	18.8%
Mineral Resources	9.8%
Applied Resources	9.7%
Chemicals	6.7%
Industrial & Commercial Services	5.5%
Food & Drug Retailing	4.3%
Food & Beverages	4.1%
Telecommunications Services	3.8%
Real Estate	3.6%
Consumer Goods Conglomerates	2.6%
Investment Holding Companies	2.5%
Government Activity	2.4%
Insurance	1.7%
Energy - Fossil Fuels	1.6%
Automobiles & Auto Parts	1.5%
Cyclical Consumer Services	1.0%
Institutions, Associations & Organizations	0.9%
Others	0.6%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

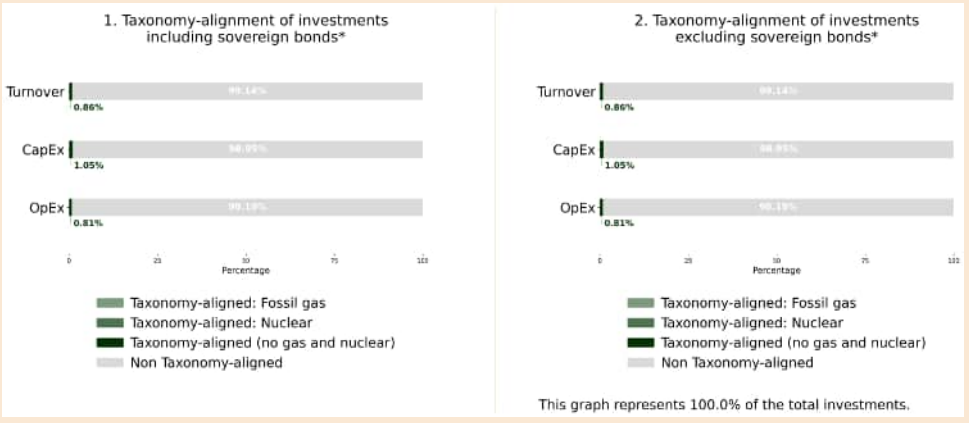

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 0.23% in turnover, in 0.59% CapEx and in 0.47% OpEx and in transition activities 0.14% in turnover, 0.16% in CapEx and 0.13% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 0.47% in 2022, 1.16% in 2023, 0.51% in 2024, and 0.86% in 2025.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 27.11%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 16.19%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 11.65% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, tobacco production and/or a significant revenue derived from non-conventional fossil fuels, coal-mining power generation and/or conventional weapons activities have been excluded. Following an update to the investment policy at the end of May 2025, the exclusion related to conventional weapons no longer applies, while other exclusions remained unchanged.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

- The Investment Manager has periodically monitored that the underlyings of the Sub-Fund have an ESG Rating above the defined benchmark J.P. Morgan CEMBI Broad Diversified Latin America IG Index.

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Future Wealth

Legal entity identifier: 222100U8QAL5OT5ATQ18

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.67% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 95.26%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

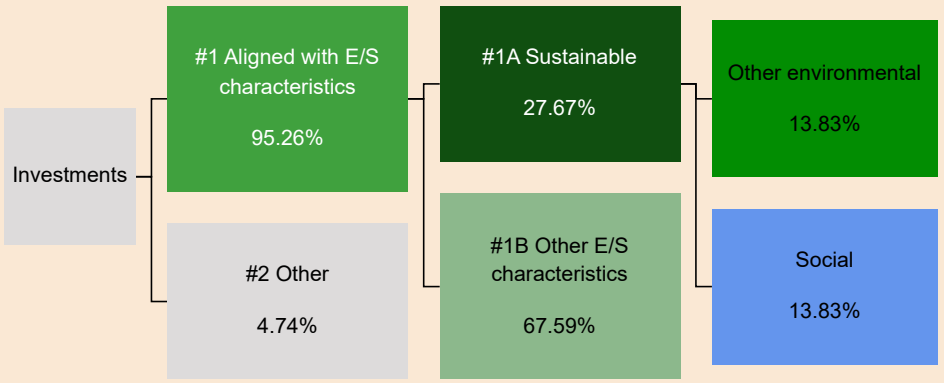

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 95.26% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 27.67%, broken down into:
  - 13.83% corresponding to socially sustainable investments.
  - 13.83% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	97.0%
Others	3.0%
Software & IT Services	0.0%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

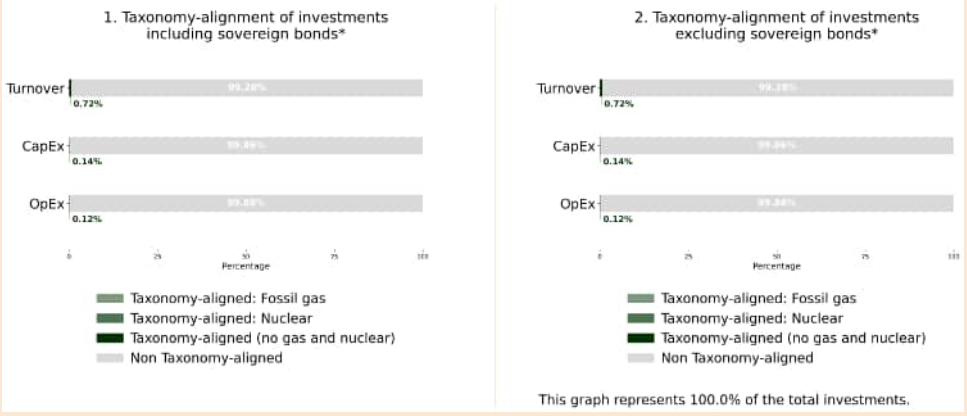

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 0.92% in turnover, in 0.19% CapEx and in 0.19% OpEx and in transition activities 0.03% in turnover, 0.02% in CapEx and 0.01% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 4.66% in 2023, 1.16% in 2024, and 0.72% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 13.83%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 13.83%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 4.74% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Santander Pensiones

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1, to 4aof Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Prosperity

Legal entity identifier: 213800WJFHHC61MCKV72

Sustainable Investment Objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes ●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 95.16% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund complied with its social sustainable investment objective by only investing in companies whose activities are grouped around three themes: Health & Wellness, Education & Financial Inclusion, and Food & Nutrition. These three major societal challenges in which the Sub-Fund has invested have been mainly focused on the following UN Sustainable Development Goals (SDGs): No Poverty, Good health and Wellbeing, Quality education, Gender equality, Decent work and economic growth, and Reduced inequalities.

Specifically, the Sub-Fund has met its objective by investing in companies that improve our society by obtaining at least 30% of their revenues from activities related to the above-mentioned SDGs. These companies also qualify as social sustainable investment as they did not cause any significant harm to any other sustainable objective and followed good governance practices.

The remaining investments that did not qualify as social sustainable investments have not altered the achievement of the Sub-Fund's objective, and their purpose was to provide liquidity to the portfolio and hedging for the efficient management of interest rate, currency, and credit risks. The Sub-Fund complied with its social sustainable investment objective by only investing in companies whose activities are grouped around three themes: Health & Wellness, Education & Financial Inclusion, and Food & Nutrition. These three major societal challenges in which the Sub-Fund has invested have been mainly focused on the following UN Sustainable Development Goals (SDGs): No Poverty, Good health and Wellbeing, Quality education, Gender equality, Decent work and economic growth, and Reduced inequalities.

Specifically, the Sub-Fund has met its objective by investing in companies that improve our society by obtaining at least 30% of their revenues from activities related to the above-mentioned SDGs. These companies also qualify as social sustainable investment as they did not cause any significant harm to any other sustainable objective and followed good governance practices.

The remaining investments that did not qualify as social sustainable investments have not altered the achievement of the Sub-Fund's objective, and their purpose was to provide liquidity to the portfolio and hedging for the efficient management of interest rate, currency, and credit risks.

Sustainability indicators measure how the sustainable objetvices of this financial product are attained.

How did the sustainability indicators perform?

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy and complied with the exclusions defined under the Climate Transition Benchmark (CTB).
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues. This includes issuers that are found to be in breach of the UN Global Compact principles or the OECD Guidelines for Multinational Enterprises.
- Percentage of revenues aligned with the Sub-Fund themes indicator: the Sub-Fund has invested in companies that have had at least 30% of its revenues related to the SDGs based on the information provided by the Investment Manager's ESG data provider based on the analysis of issuers' operations, products, services, policies, and practices and their net contribution – positive and adverse – to addressing the Sub-Funds social themes or that, according to the Investment Manager's assessment, have provided a relevant contribution to solve the above described societal challenges, that could be reinforced by the Investment Manager's engagement with the relevant companies.

… And compared to previous periods?

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Percentage of revenues aligned with the Sub-Fund themes indicator: it has remained 30% as reported in the previous reference period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the positive contribution to the social objective of the Sub-Fund did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: any exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels production, controversial weapons, tobacco production, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements. This ESG rating combines quantitative and qualitative criteria in a positive and/or negative sense in order to obtain a clear and complete view of each asset in its overall performance in the ESG area, generating an ESG rating within each type of issuer.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels production, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

If any of the thresholds was not met, the Investment Manager considered that the investment is causing an adverse impact and the DNSH principle is not ensured. Therefore, the issuer was not considered as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by

adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information.

Specifically, it meets the minimum of 80% sustainable investment, which fully corresponds to socially sustainable investments. The percentage of socially sustainable investment of this Sub-Fund is 95.16% of the total of the Sub-Fund.

This percentage has been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not Sustainable includes investents which do not qualify as sustainable investments

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Pharmaceuticals & Med Research	12.8%
Real Estate	12.5%
Healthcare Services & Equipment	8.8%
Personal & Household Products & Services	8.7%
Food & Beverages	8.4%
Technology Equipment	6.5%
Academic & Educational Services	6.5%
Software & IT Services	6.0%
Telecommunications Services	5.8%
Banking & Investment Services	4.7%
Industrial & Commercial Services	4.5%
Others	3.6%
Utilities	2.8%
Industr Goods	1.9%
Cyclical Consumer Services	1.8%
Chemicals	1.7%
Cyclical Consumer Products	1.7%
Renewable Energy	1.2%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

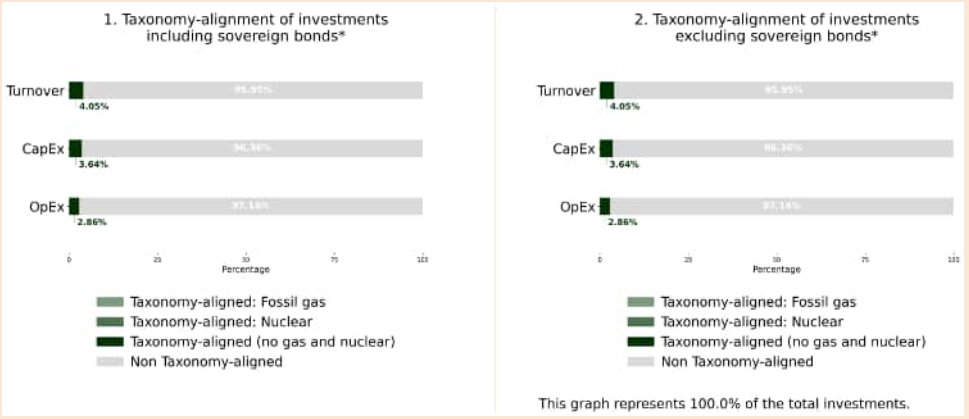

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 2.36% in turnover, in 1.57% CapEx and in 1.93% OpEx and in transition activities 0% in turnover, 0.18% in CapEx and 0.01% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 3.05% in 2023, 3.69% in 2024, and 4.05% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Sub-Fund did not make any sustainable investments with an environmental objective.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 95.16%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund had an average 3.67% share of investments which did not qualify as sustainable investments throughout the reference period. These investments included in "#2 Not sustainable" have not altered the achievement of the Sub-Fund's sustainable investment objective, and their purpose is to provide liquidity to the portfolio and hedging for the efficient management of interest rate, currency, and credit risks.

What actions have been taken to attaing the sustainable investment objective during the reference period?

During the reference period, the following actions have been taken to attain the sustainable investment objective of the Sub-Fund:

- The Investment Manager has defined the socially sustainable investable universe of the Sub-Fund by periodically selecting companies whose business intend to generate positive social outcomes and contribute to the Sub-Fund's themes: Health & Wellness, Education & Financial Inclusion, and Food & Nutrition. In this sense, the Investment Manager has reviewed that each eligible company have had at least 30% of its revenues related to the SDGs associated with the Sub-Fund themes, or that according to the Investment Manager's assessment, provide a relevant contribution to solve the Sub-Funds' themes.
- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions, including those defined under the Climate Transition Benchmark (CTB):
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons as defined by applicable international treaties and conventions, tobacco cultivation and production, coal mining, coal-based power generation and fossil fuels have been excluded.
  - Issuers involved in controversies considered critical have been excluded from the Sub-Fund's investment universe. This includes issuers that are found to be in breach of the UN Global Compact principles or the OECD Guidelines for Multinational Enterprises.
  - Issuers whose activities may have caused significant adverse impacts on sustainability factors according to the Investment Manager's methodology that have not been mitigated by applying engagement actions have been excluded.
  - Issuers that have a poor governance performance in accordance with the Investment Manager's ESG score methodology have been excluded to guarantee adequate governance practices.

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

The Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the sustainable objective of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability.

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Target Maturity 2025 Euro

Legal entity identifier: 213800DWGL9SKQ9J2V62

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.17% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 93.57%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2023, A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors within its investment process. The Investment Manager considered that the investment strategy of the Sub-Fund did not allow for a full integration of the PAI indicators as it expects to hold the underlying bonds to maturity, limiting the potential mitigating actions derived. However, the Sub-Fund used the mandatory PAI indicators as part of the Do Not Significant Harm screen to demonstrate that an investment qualifies as Sustainable Investment as previously explained in this report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
GERMANY (FEDERAL REPUBLIC OF)	Government Activity	9.98%	Germany
SPAIN (KINGDOM OF)	Government Activity	9.94%	Spain
EUR CASH(COMMITTED)	Others	7.31%	European Union
NETHERLANDS (KINGDOM OF)	Government Activity	7.07%	Netherlands
BELGIUM KINGDOM OF (GOVERNMENT)	Government Activity	6.72%	Belgium
EUROPEAN UNION	Government Activity	5.81%	Supranational
SPAIN (KINGDOM OF)	Government Activity	5.54%	Spain
PORTUGAL (REPUBLIC OF) RegS	Government Activity	5.54%	Portugal
FRANCE (REPUBLIC OF)	Government Activity	5.19%	France
PORTUGAL (REPUBLIC OF) RegS	Government Activity	4.99%	Portugal
FRANCE (REPUBLIC OF)	Government Activity	4.99%	France
PORTUGAL (REPUBLIC OF) RegS	Government Activity	4.98%	Portugal
ITALY (REPUBLIC OF) RegS	Government Activity	4.84%	Italy

Largest Investments	Sector	% Assets	Country Name
BELGIUM KINGDOM OF (GOVERNMENT)	Government Activity	4.15%	Belgium
BPCE SA RegS	Banking & Investment Services	3.41%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

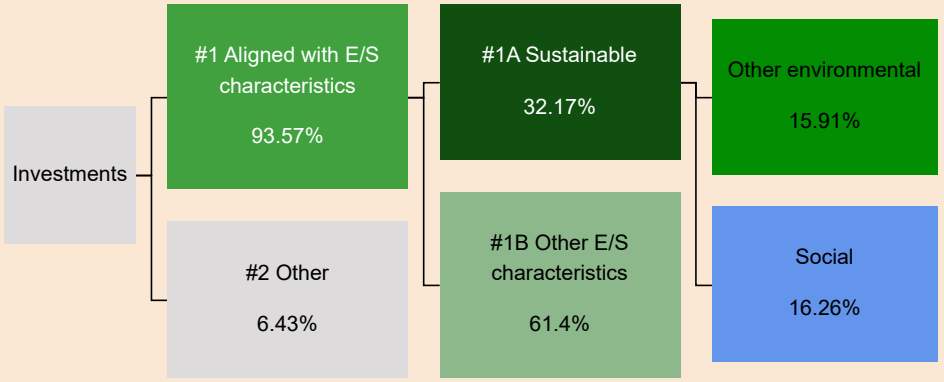

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 93.57% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 32.17%, broken down into:
  - 16.26% corresponding to socially sustainable investments.
  - 15.91% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sectors	% Assets
Government Activity	37.3%
Banking & Investment Services	29.5%
Utilities	5.5%

Sectors	% Assets
Real Estate	4.8%
Others	4.7%
Transportation	4.6%
Automobiles & Auto Parts	2.9%
Food & Beverages	2.6%
Energy - Fossil Fuels	2.2%
Food & Drug Retailing	2.0%
Industr Goods	1.5%
Cyclical Consumer Products	0.9%
Telecommunications Services	0.8%
Software & IT Services	0.8%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

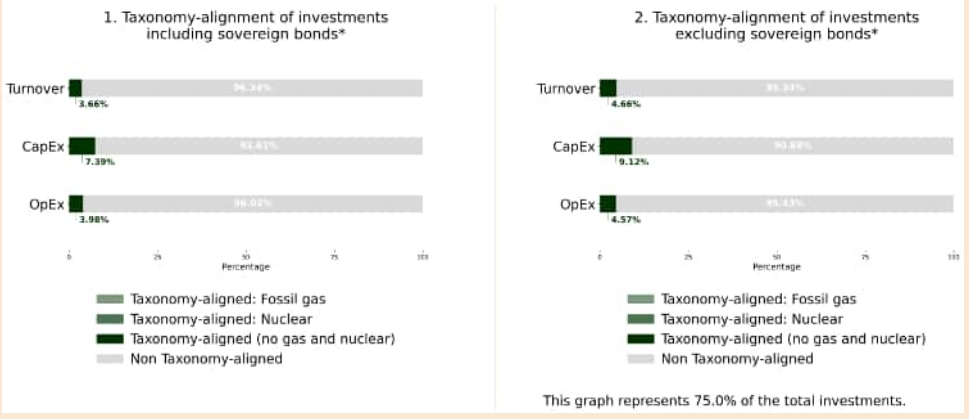

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.01% in turnover, in 2.96% CapEx and in 1.85% OpEx and in transition activities 0.2% in turnover, 0.35% in CapEx and 0.06% in OpEx over the reference period.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 7.32% in 2023, 7.62% in 2024, and 3.66% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 15.91%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 16.26%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 6.43% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Target Maturity Euro II

Legal entity identifier: 213800PW972JZ4RWG390

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.86% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made **sustainable investments with a social objective:**	☒ with a social objective
	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 93.52%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors within its investment process. The Investment Manager considered that the investment strategy of the Sub-Fund did not allow for a full integration of the PAI indicators as it expects to hold the underlying bonds to maturity, limiting the potential mitigating actions derived. However, the Sub-Fund used the mandatory PAI indicators as part of the Do Not Significant Harm screen to demonstrate that an investment qualifies as Sustainable Investment as previously explained in this report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
EUR CASH(COMMITTED)	Others	5.43%	European Union
SPAIN (KINGDOM OF)	Government Activity	3.37%	Spain
SPAIN (KINGDOM OF)	Government Activity	3.37%	Spain

NATIONAL GRID PLC MTN RegS	Utilities	2.12%	United Kingdom
AMERICAN TOWER CORPORATION	Real Estate	2.12%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

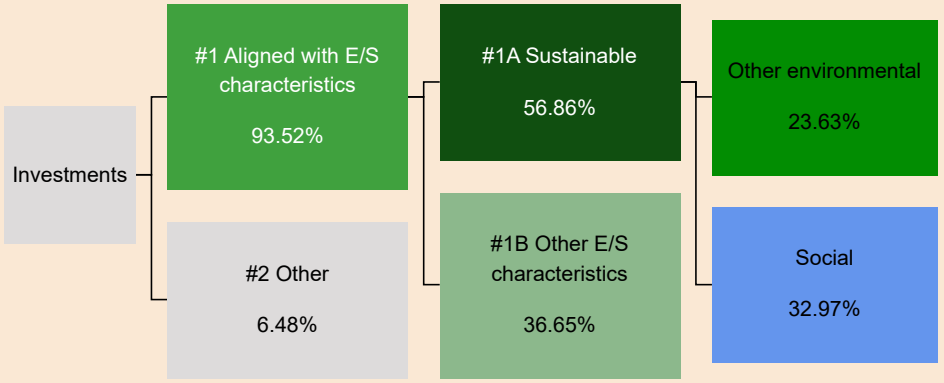

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 93.52% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 56.86%, broken down into:
  - 32.97% corresponding to socially sustainable investments.
  - 23.63% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sectors	% Assets
Banking & Investment Services	41.3%

Sectors	% Assets
Government Activity	6.6%
Real Estate	6.5%
Energy - Fossil Fuels	6.0%
Utilities	5.8%
Others	5.0%
Telecommunications Services	4.4%
Transportation	4.0%
Automobiles & Auto Parts	3.3%
Technology Equipment	3.1%
Insurance	2.1%
Uranium	2.0%
Industrial & Commercial Services	2.0%
Cyclical Consumer Services	2.0%
Food & Beverages	1.9%
Healthcare Services & Equipment	1.9%
Mineral Resources	1.0%
Investment Holding Companies	1.0%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy

☒ No

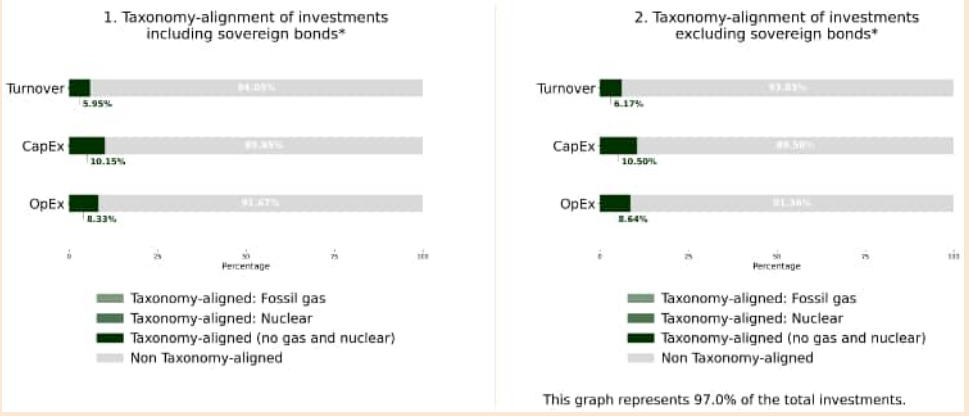

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 2.32% in turnover, in 3.74% CapEx and in 4.91% OpEx and in transition activities 0.34% in turnover, 0.74% in CapEx and 0.22% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 5.42% in 2024, and 5.95% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 23.63%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 32.97%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 6.48% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Multi Index Income

Legal entity identifier: 213800ZZDSJ7BUR7SO54

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 3.37% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 96.65%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

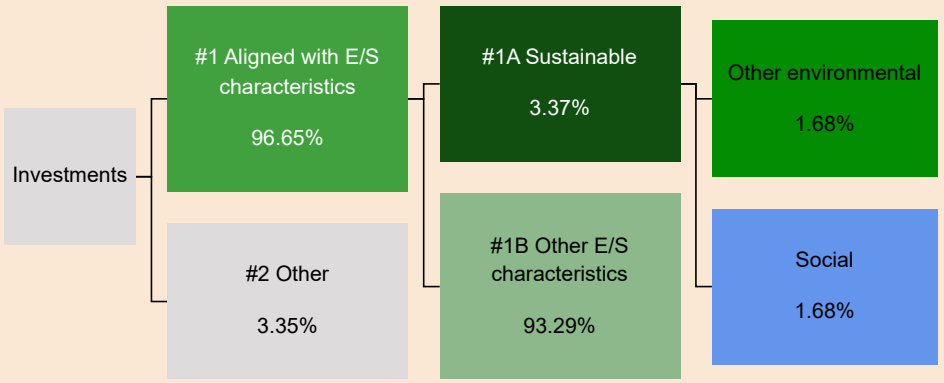

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 96.65% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 3.37%, broken down into:
  - 1.68% corresponding to socially sustainable investments.
  - 1.68% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Funds	96.7%
Others	3.3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[X] In fossil gas [X] In nuclear energy
[ ] No

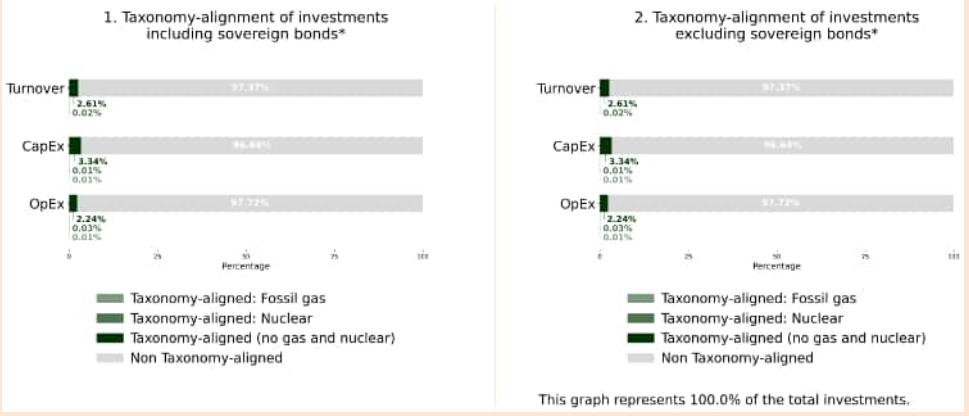

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.63% in turnover, in 1.73% CapEx and in 1.73% OpEx and in transition activities 0.17% in turnover, 0.2% in CapEx and 0.11% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 3.12% in 2024, and 2.64% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 1.68%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.68%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 3.35% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Target Maturity Euro IV

Legal entity identifier: 213800LDJYZDE1WBKB16

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.0% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 95.86%.

- ***… And compared to previous periods?***

It does not apply as there is no previous periodic report.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and

consumer welfare by contributing to the creation of products and services that meet human needs.

- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors within its investment process. The Investment Manager considered that the investment strategy of the Sub-Fund did not allow for a full integration of the PAI indicators as it expects to hold the underlying bonds to maturity, limiting the potential mitigating actions derived. However, the Sub-Fund used the mandatory PAI indicators as part of the Do Not Significant Harm screen to demonstrate that an investment qualifies as Sustainable Investment as previously explained in this report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 27/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
TELEFONICA EUROPE BV RegS	Telecommunications Services	2.08%	Netherlands

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

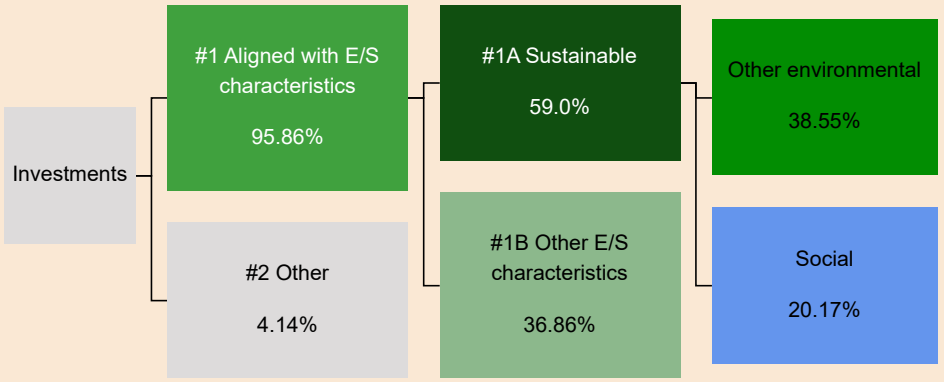

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 95.86% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 59.0%, broken down into:
  - 20.17% corresponding to socially sustainable investments.
  - 38.55% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sectors	% Assets
Banking & Investment Services	39.1%
Utilities	11.7%
Automobiles & Auto Parts	6.9%
Insurance	6.6%
Transportation	6.1%
Telecommunications Services	5.7%
Food & Beverages	4.2%
Industrial & Commercial Services	3.5%
Cyclical Consumer Services	3.1%

Sectors	% Assets
Energy - Fossil Fuels	3.0%
Investment Holding Companies	2.5%
Mineral Resources	2.3%
Others	1.9%
Healthcare Services & Equipment	1.1%
Software & IT Services	1.0%
Real Estate	1.0%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

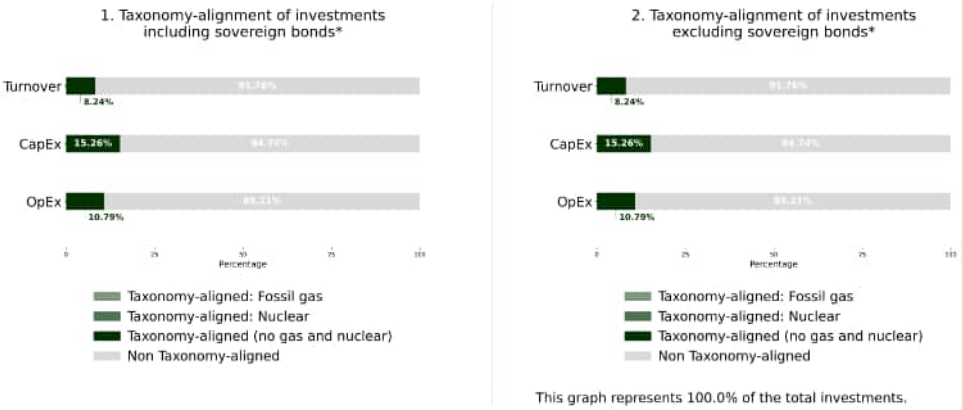

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 4.6% in turnover, in 8.73% CapEx and in 7.66% OpEx and in transition activities 0.28% in turnover, 0.51% in CapEx and 0.23% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

It does not apply as there is no previous periodic report.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 38.55%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 20.17%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 4.14% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels ("non-free", "partially free" and "free"), having excluded countries classified as "non-free".
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Target Maturity Euro V

Legal entity identifier: 213800M7XPZ42HQBOE19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.2% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 96.19%.

- ***… And compared to previous periods?***

It does not apply as there is no previous periodic report.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and

consumer welfare by contributing to the creation of products and services that meet human needs.

- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors within its investment process. The Investment Manager considered that the investment strategy of the Sub-Fund did not allow for a full integration of the PAI indicators as it expects to hold the underlying bonds to maturity, limiting the potential mitigating actions derived. However, the Sub-Fund used the mandatory PAI indicators as part of the Do Not Significant Harm screen to demonstrate that an investment qualifies as Sustainable Investment as previously explained in this report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 03/06/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
EUR CASH(COMMITTED)	Others	3.90%	European Union
BANCO SANTANDER SA MTN RegS	Banking & Investment Services	2.13%	Spain
JEFFERIES FINANCIAL GROUP INC MTN RegS	Banking & Investment Services	2.12%	United States

AMERICAN TOWER CORPORATION MTN	Real Estate	1.92%	United States
GENERAL MILLS INC	Food & Beverages	1.91%	United States
COOPERATIEVE RABOBANK UA RegS	Banking & Investment Services	1.91%	Netherlands
GOLDMAN SACHS GROUP INC/THE MTN RegS	Banking & Investment Services	1.90%	United States
UNICREDIT SPA MTN	Banking & Investment Services	1.87%	Italy
CTP NV MTN RegS	Real Estate	1.71%	Netherlands
AMERICAN HONDA FINANCE CORPORATION	Banking & Investment Services	1.64%	United States
IBERDROLA INTERNATIONAL BV RegS	Utilities	1.62%	Spain
NYKREDIT REALKREDIT A/S	Banking & Investment Services	1.61%	Denmark
OMV AG NC9 RegS	Energy - Fossil Fuels	1.61%	Austria

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

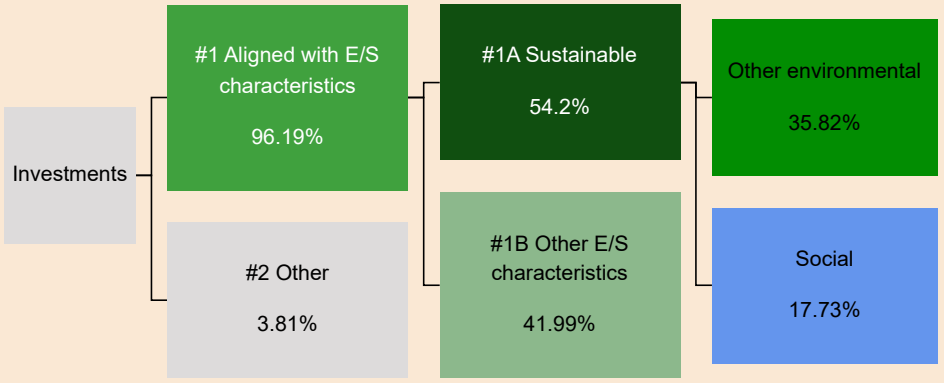

- ***What was the asset allocation?***

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 96.19% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 54.2%, broken down into:
  - 17.73% corresponding to socially sustainable investments.
  - 35.82% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Banking & Investment Services	35.3%
Utilities	11.4%
Real Estate	7.5%
Telecommunications Services	6.7%
Food & Beverages	5.2%
Investment Holding Companies	5.2%
Energy - Fossil Fuels	3.8%
Others	3.8%
Insurance	3.3%
Automobiles & Auto Parts	2.5%

Sectors	% Assets
Cyclical Consumer Services	2.5%
Healthcare Services & Equipment	2.0%
Transportation	1.5%
Food & Drug Retailing	1.5%
Industr Goods	1.5%
Mineral Resources	1.5%
Industrial & Commercial Services	1.4%
Cyclical Consumer Products	1.3%
Software & IT Services	1.2%
Government Activity	0.8%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

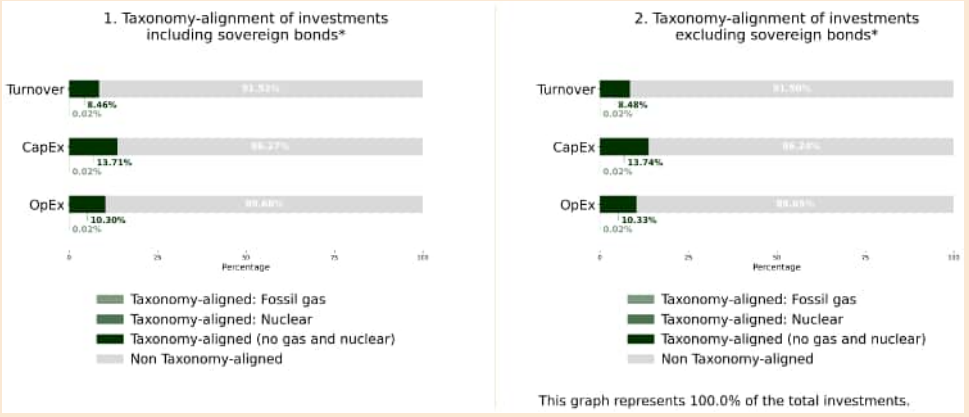

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[X] In fossil gas [ ] In nuclear energy
[ ] No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 3.65% in turnover, in 6.23% CapEx and in 5.7% OpEx and in transition activities 0.17% in turnover, 0.41% in CapEx and 0.14% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

It does not apply as there is no previous periodic report.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 35.82%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 17.73%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 3.81% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Go Global Equity

Legal entity identifier: 22210032M38AT2R34U68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.1% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes the following Environmental and Social characteristics:

- The mandate promotes certain minimum environmental and social safeguards through applying exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society and incompatible with sustainable investment strategies, such as exposure to controversial behaviour, controversial weapons, and fossil fuels.
- The mandate's weighted water and waste footprints were better than that of the General Market Index. The Sub-fund's weighted carbon footprint (scope level 1, 2 and 3 upstream) was 20% better than the General Markets Index.
- The mandate's weighted average ESG score was at least better than that of the General Market Index.
- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The mandate was limited to a maximum exposure of 2% to investments with an elevated sustainability risk , based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The mandate avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the mandate.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on average positions and latest available data as at 31/12//2025.

- The portfolio contained on average 0.00% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
- The mandate's weighted score for water and waste footprint were respectively 84.61% and 12.23% better than the general market index. The mandate's weighted carbon footprint (scope level 1, 2 and 3 upstream) was 33.64% better than that of the General Markets Index.
- The mandate's weighted average ESG score was 15.90 against 18.42 for the general market index. A lower score means a lower risk. against for the general market index. A lower score means a lower risk.
- 0.00% of the holdings in portfolio had an elevated sustainability risk profile. 5. 0.00% of the companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators in comparison with the previous reference period is shown below:

- The weighted score for carbon footprint (% better than the general market index): this indicator has been 83.64% as of 2025, 41.87% as of 2024, 68.40% as of 2023 and 74.63% as of 2022.
- The weighted score for water footprint (% better than the general market index): this indicator has been 84.61% as of 2025, 94.07% as of 2024, 93.32% as of 2023 and 90.69% as of 2022.
- The weighted score for waste footprint (% better than the general market index): this indicator has been 12.23% as of 2025, 91.52% as of 2024, 89.79% as of 2023 and 89.17% as of 2022.
- The percentage of companies in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises has remained 0.00% throughout the reference periods.
- The percentage of holdings with an elevated sustainability risk profile has remained 0.00% throughout the reference periods.
- The weighted average ESG Score has been 15.90 as of 2025, 18.14 as of 2024, 18.20 as of 2023 and 17.66 as of 2022.
- The percentage of investments on exclusion list has remained 0.00% throughout the reference periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investments contributed to the UN Sustainable Development Goals ("SDGs"), that have both social and environmental objectives. These are 17 goals that are globally recognised and include environmental goals such as climate action, clean water, life on land and water and social goals such as zero hunger, gender equality, education, etc. Robeco has developed a proprietary framework based on the UN SDGs through which an issuer's contribution to such SDGs is determined through a 3-step process. This process starts with a sector baseline on which a company's products are analysed to examine contribution to the society and environment. Further, the operational processes involved in creating such products is checked along with any controversies/litigation claims and remediation actions taken which are perused before a final SDG score is determined. The final score ranges between high negative (-3) to high positive (+3) and only those issuers which achieve positive SDG scores (+1, +2 and, +3) are regarded as Sustainable Investments.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, sustainable investments score positively on Robeco's SDG Framework, and therefore do not cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Mandatory principal adverse impact indicators are considered through the Investment Manager's SDG Framework, either directly or indirectly, when identifying sustainable investments for the mandate. In addition, voluntary environmental and social indicators are taken into account, depending on their relevance for measuring impacts on the SDGs and the availability of data. A detailed description of the incorporation of principal adverse impacts is available via the Investment Manager's Principal Adverse Impact Statement published on the its website (https://www.robeco.com/files/docm/docu-robeco-principal-adverse-impact-statement-2024-en.pdf). In this statement, the Investment Manager sets out its approach to identifying and prioritizing principal adverse impacts, and how principal adverse impacts are considered as part of Robeco's investment due diligence process and procedures relating to research and analysis, exclusions and restrictions and/or voting and engagement. This description also explains how principal adverse impact indicators are considered by the SDG Framework.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 (upstream) Green House Gas emissions via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and artic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for the carbon footprint via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and artic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for the Green House Gas intensity of investee companies via engagement and exclusions. The Investment Manager's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and artic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and artic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consomption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy comsumption per High Impact Climate sector was considered via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024. For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments. Robeco’s Exclusion policy covers the exclusion of palm oil producers in which a minimum percentage of RSPO certified hectates of land at plantations as detailed in Robeco's exclusion policy.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco’s Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco’s Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occured. If this

enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to contraversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision ‘Besluit marktmisbruik’ art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes “Acceleration to Paris” and “Net Zero Carbon Emissions”.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered. PAI 6, table 3 regarding insufficient whistleblower protection was considered. PAI 7, table 3 regarding incidents of discrimination was considered. PAI 8, table 3 regarding exessive CEO pay ratio was considered via engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both the Investment Manager's Exclusion Policy and SDG Framework. The Exclusion Policy includes an explanation of how the Investment Manager acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behavior of companies. The Investment Manager continuously screens its investments for breaches of these principles. In case of a breach, the company will be excluded or engaged with, and is not considered a sustainable investment. The Investment Manager's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, it checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandate considered principal adverse impacts on sustainability factors as referred to in Annex I of the SFDR Delegated Act.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
  - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.48% of the net assets, compared to 3.58% of the benchmark.
  - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.00% of the net assets, compared to 0.48% of the benchmark.
  - The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.23% of the net assets, compared to 1.83% of the benchmark.
  - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.00% of the net assets, compared to 0.25% of the benchmark.
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
  - The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 1,481,502 tons, compared to 433,528 tons for the benchmark.
  - The carbon footprint of the portfolio (PAI 2, table 1) was 2,180 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.
  - The green house gas intensity of the portfolio (PAI 3, table 1) was 1,949 tons per EUR million revenue, compared to 1,513 tons per EUR million revenue for the benchmark.
  - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.48% of the net assets, compared to 3.58% of the benchmark.
  - The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 46.77% of the net assets, compared to 51.95% of the benchmark.
  - The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources for the mandate was 43.41% of the net assets, compared to 55.09% of the benchmark.
  - The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.35 GWh, compared to 0.42 GWh for the benchmark.
  - The share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (PAI 4, Table 2) was 5.42% of the net assets, compared to 11.22% of the benchmark.
  - The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.23% of the net assets, compared to 1.83% of the benchmark.
  - The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.04 tons of the benchmark.
  - The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 25.56 tons, compared to 43.12 tons of the benchmark.
  - The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13, Table 1) was 36.22%, compared to 35.06% for the benchmark.
- Via the environmental footprint performance targets of the mandate, the following PAIs were considered:
  - The carbon footprint of the portfolio (PAI 2, table 1) was 2,180 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.

- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.23% of the net assets, compared to 1.83% of the benchmark.
- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.04 tons of the benchmark.
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 25.56 tons, compared to 43.12 tons of the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors are taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
  - The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 1,481,502 tons, compared to 433,528 tons for the benchmark.
  - The carbon footprint of the portfolio (PAI 2, table 1) was 2,180 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.
  - The green house gas intensity of the portfolio (PAI 3, table 1) was 1,949 tons per EUR million revenue, compared to 1,513 tons per EUR million revenue for the benchmark.
  - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.48% of the net assets, compared to 3.58% of the benchmark.
  - The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 46.77% of the net assets, compared to 51.95% of the benchmark.
  - The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources for the mandate was 43.41% of the net assets, compared to 55.09% of the benchmark.
  - The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.35 GWh, compared to 0.42 GWh for the benchmark.
  - The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.23% of the net assets, compared to 1.83% of the benchmark.
  - The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.04 tons of the benchmark.
  - The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 25.56 tons, compared to 43.12 tons of the benchmark.
  - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.00% of the net assets, compared to 0.48% of the benchmark.

In addition, based on a yearly review of the Investment Manager's performance on all mandatory and selected voluntary indicators, holdings of the Sub-fund that cause adverse impact might be selected for engagement. More information is available via the Investment Manager's Principal Adverse Impact Statement.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
NVIDIA CORP	Technology Equipment	5.70%	United States
MICROSOFT CORP	Software & IT Services	5.14%	United States
APPLE INC	Technology Equipment	4.51%	United States
ALPHABET INC CLASS A	Software & IT Services	4.30%	United States
AMAZON COM INC	Retailers	3.31%	United States
VISA INC CLASS A	Software & IT Services	2.69%	United States

Largest Investments	Sector	% Assets	Country Name
ELI LILLY	Pharmaceuticals & Med Research	2.57%	United States
JPMORGAN CHASE	Banking & Investment Services	2.57%	United States
ASTRAZENECA PLC	Pharmaceuticals & Med Research	2.29%	United Kingdom
MARSH & MCLENNAN INC	Insurance	2.17%	United States
RELX PLC	Software & IT Services	2.11%	United Kingdom
THERMO FISHER SCIENTIFIC INC	Healthcare Services & Equipment	2.09%	United States
ABBVIE INC	Pharmaceuticals & Med Research	2.07%	United States
SONY GROUP CORP	Technology Equipment	2.07%	Japan
UNITEDHEALTH GROUP INC	Healthcare Services & Equipment	1.99%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

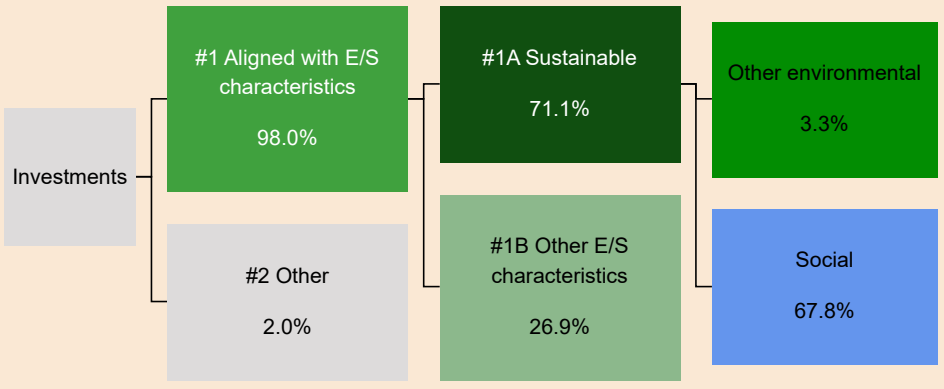

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 75% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 98% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 50% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 71.1%, broken down into:
  - 67.8% corresponding to socially sustainable investments.
  - 3.3% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

Sectors	% Assets
Software & IT Services	22.2%
Technology Equipment	20.9%
Pharmaceuticals & Med Research	8.9%
Banking & Investment Services	8.7%
Retailers	6.3%
Healthcare Services & Equipment	3.2%
Industr Goods	3.1%
Energy - Fossil Fuels	2.9%
Industrial & Commercial Services	2.3%
Insurance	2.2%
Personal & Household Products & Services	2.0%
Mineral Resources	2.0%
Others	2.0%
Renewable Energy	2.0%
Cyclical Consumer Services	1.8%
Telecommunications Services	1.8%
Real Estate	1.7%
Transportation	1.7%
Chemicals	1.5%
Consumer Goods Conglomerates	1.2%
Cyclical Consumer Products	0.9%
Automobiles & Auto Parts	0.8%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

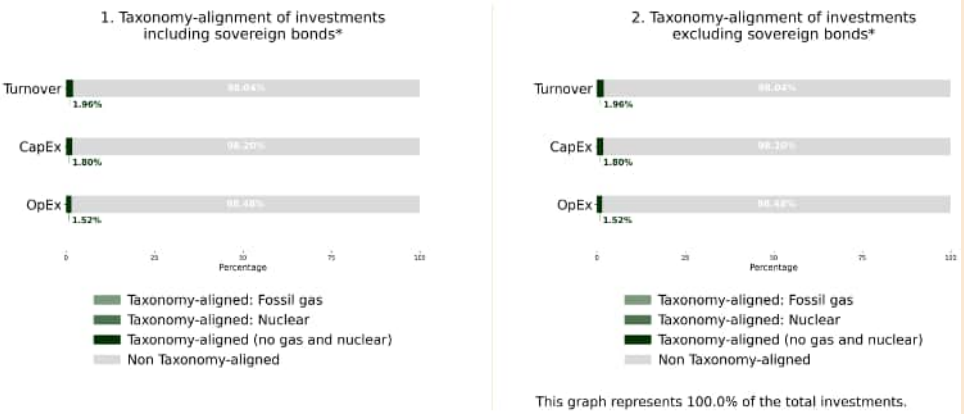

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The proportion of investments made in enabling activities has been 1.2% in turnover, in 0.5% CapEx and in 0.78% OpEx and in transition activities 0.03% in turnover, 0.04% in CapEx and 0.01% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 0.66% in 2022, 1.02% in 2023, 1.15% in 2024, and 1.96% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 3.3%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 67.8%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The mandate may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the mandate were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 32 holdings were under active engagement either within the Investment Manager's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. The Carbon profile was more than 30% lower than that of the reference index. 0.00% of the assets was invested in holdings with an elevated risk profile.

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

  Not Applicable

- ***How did this financial product perform compared with the broad market index?***

  Not Applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2, and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (UE) 2020/852

Product name: Santander Target Maturity Euro III

Legal entity identifier: 2138001YITBC1N3O2O34

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes

●○ ☒ No

☐ It made **sustainable investments with an environmental objective:**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.4% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical. That is to say, exposure to events significantly that impact the environment and/or society or presents serious business risks to the company, reflecting a high recurrence of incidents, extremely poor management of ESG risks, and a clear unwillingness by the company to address these issues.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section. Each underlying's ESG Rating has been calculated based on the ESG characteristics described in the previous question and considering the sectorial materiality defined by the Investment Manager.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 95.99%.

- ***… And compared to previous periods?***

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as previously reported.
- Controversy indicator: it has remained 0% as previously reported.
- Average ESG rating of the Sub-Fund: this indicator has been A- in 2024, and A- in this reported reference period.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted has remained at least 51% compared to previous periods.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.

- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors within its investment process. The Investment Manager considered that the investment strategy of the Sub-Fund did not allow for a full integration of the PAI indicators as it expects to hold the underlying bonds to maturity, limiting the potential mitigating actions derived. However, the Sub-Fund used the mandatory PAI indicators as part of the Do Not Significant Harm screen to demonstrate that an investment qualifies as Sustainable Investment as previously explained in this report.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1/01/2025 - 31/12/2025

The top investments in the table below have been presented as an average of the quarters stated in the reference period.

Please note that, for the sake of clarity, the values under 'Sectors' refer to the category Business Sector defined in the Thomson Reuters Business Classification System.

Largest Investments	Sector	% Assets	Country Name
A1 TOWERS HOLDING GMBH	Industrial & Commercial Services	2.15%	Austria
EASYJET FINCO BV MTN RegS	Transportation	2.14%	United Kingdom
FLOENE ENERGIAS SA	Utilities	2.13%	Portugal
ENEL SPA RegS	Utilities	2.12%	Italy

BANQUE FEDERATIVE DU CREDIT MUTUEL MTN RegS	Banking & Investment Services	2.10%	France
TRATON FINANCE LUXEMBOURG SA RegS	Industr Goods	2.09%	Luxembourg

Largest Investments	Sector	% Assets	Country Name
DIGITAL EURO FINCO LLC RegS	Real Estate	2.09%	United States
REPSOL INTERNATIONAL FINANCE BV RegS	Energy - Fossil Fuels	2.08%	Spain
SSE PLC RegS	Utilities	2.07%	United Kingdom
ACEA SPA MTN RegS	Utilities	2.06%	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

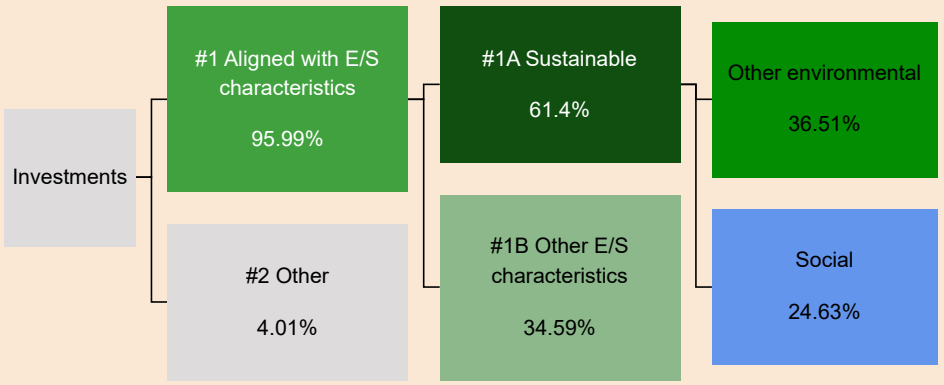

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 95.99% calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 61.4%, broken down into:
  - 24.63% corresponding to socially sustainable investments.
  - 36.51% corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

— The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
— The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sectors	% Assets
Banking & Investment Services	43.6%

Sectors	% Assets
Utilities	16.2%
Telecommunications Services	7.6%
Automobiles & Auto Parts	7.1%
Real Estate	5.2%
Transportation	4.2%
Energy - Fossil Fuels	3.1%
Industrial & Commercial Services	2.1%
Industr Goods	2.1%
Uranium	2.0%
Others	1.7%
Investment Holding Companies	1.5%
Food & Beverages	1.4%
Healthcare Services & Equipment	1.1%
Cyclical Consumer Services	1.0%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and witching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

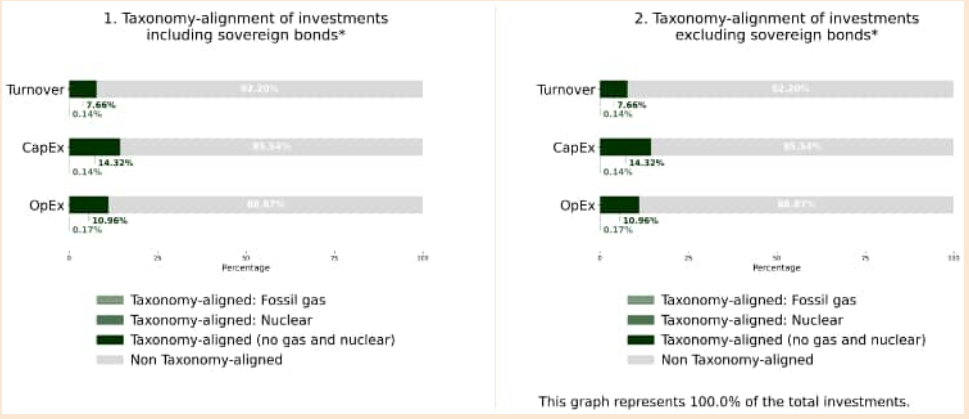

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy [1]?***

[X] Yes
[ ] In fossil gas [X] In nuclear energy
[ ] No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

Taxonomy-aligned activities are expressed as a share of:

- **Turnover** reflecting the share of revenue from green activities of investee companies.

- **Capital expenditure** (CapEx)showing the green investments made by investee companies, e.g for a transition to a green economy.

- **Operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The proportion of investments made in enabling activities has been 3.9% in turnover, in 5.84% CapEx and in 5.87% OpEx and in transition activities 0.07% in turnover, 0.86% in CapEx and 0.26% in OpEx over the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. However, the percentage of investments aligned with the EU Taxonomy compared to the previous reference periods has been 7.23% in 2024 and 7.81% in 2025.

---

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 36.51%.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 24.63%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 4.01% share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
  - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
  - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
- Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
  - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
  - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager’s own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at:

https://www.santanderassetmanagement.lu/document-library/policies

Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at:

https://www.santanderassetmanagement.com/sustainability

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SANTANDER GO GLOBAL ENVIRONMENTAL SOLUTIONS Legal entity identifier: 213800115BDICDFT5J73

ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made a minimum of **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **93.72%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made a minimum of **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average based on the AUM, and the latest available data is as at 2025-09-30 since the fund was closed 2025-11-28.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental/social characteristics promoted by this financial product are based on the investment in companies that participate in the transition to a sustainable world by focusing on challenges related to the environment across global markets, primarily climate change and nature degradation.

This includes, but is not limited to, companies that provide through their products, services or processes, solutions to aquatic and terrestrial ecosystems, the circular economy, as well as renewable energy production, energy technology & materials, and energy infrastructure & mobility.

Theme One: Renewable Energy Production. This theme relates to decarbonising the energy system throughproductionofrenewableenergyandcarboncapture.Examplesincludecleanpower,hydrogen production,andrenewableinstallation.

Theme Two: Energy Technology & Materials. This theme relates to digitalising the energy system through electrification, efficiency and technology. Examples include batteries for electric vehicles, environmentaldataanalytics,andcriticalrawmaterials.

ThemeThree:EnergyInfrastructure&Mobility.Thisrelatestodecentralisingtheenergysystem through new infrastructure, distributed energy, and battery storage. This includes electric vehicle charging, hydrogenmobilityandmicroeMobility.

ThemeFour:OceanHealth&CleanWater.Thisrelatestoaquaticecosystems,whichsustainthelives ofb illionsofpeople,regulateclimate,produceshalfouroxygen.Examplesincludedesalination,smart irrigationandwaterflowcontrol.

ThemeFive:SmartAgriculture&FoodInnovation.Thisrelatestoterrestrialecosystems,whichprovide thebasisforlifethroughfoodsupply,habitatsfororganismsandbiodiversity.Examplesincludeanimal health,smartfarmingandforestrymanagement.

Theme Six: Circular Economy & Eco -Design. This relates to the circular economy, which includes reducing, re- using and recycling materials to reduce waste and pollution. Examples include biodegradableplastics,textilerecyclingandwastemanagement.

- *What were the objectives of the sustainable investments that the financial product partially ma de and how d id the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology of the investment manager, as defined in the main part of the Prospectus, integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. The se criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;

2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

   a) Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodi versity loss;

   b) Social: no poverty, zero hunger, food security, healthy lives and well- being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.

3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through these criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

4. A company with best -in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the Investment Manager ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through these criteria can for example contribute to the following objectives:

a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;

b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm "DNSH" principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology to assess all companies against these requirements, promoted by the financial product.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti- bribery matters .

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective ?

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account ?

The investment manager ensures that throughout its investment process, the financial product takes into account all the principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the Investment Manager's Global Sustainability Strategy (GSS) into its investment process: RBC policy, ESG integration guidelines, Stewardship, the forward -looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts and guides the investment manager's ESG integration process. The proprietary ESG scoring framework of the investment manager includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. The result of this assessment leads to the exclusion of companies that are not aligned with the SDGs.

The Forward -looking perspective of the investment manager defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the "3Es" (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team of the investment manager regularly identifies adverse impacts through ongoing research, collaboration with other long -term investors, and dialogue with NGOs and other experts.

As regards the sustainable investments that the financial product intends to make, the following principal adverse sustainability impacts are taken into account:

Corporate mandatory indicators:

1. Green House Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non -renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:
Environment
4. Investments in companies without carbon emission reduction initiatives
Social
4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicators
15. GHG intensity
16. Investee countries subject to social violations

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment universe of the financial product is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on F undamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager Sustainability Centre on the basis of internal analysis and informatio n provided by external experts, and in consultation with the Investment Manager's CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an "exclusion list" and will not be available for investment. Existing investments should be divested from the portfolio according to an internal proced ure. If an issuer is at risk of violating any of the principles, it is placed on a "watchlist" monitored, as appropriate.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of p rincipal adverse sustainability impacts and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. The result of this assessment leads to the exclusion of companies that are not aligned with the SDGs.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the research, portfolios and commitments are aligned on three issues, the "3Es" (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Investment Manager regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the Investment Manager's RBC Policy, ESG Integration Guidelines, and Engagement Policy which include the following provisions:

- Exclusion of issuers that are in violation of international norms and conventions and issuers that

  The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

  The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

  Any other sustainable investments must also not significantly harm any environmental or social objectives.

  are involved in activities presenting an unacceptable risk to society and/or the environment;
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts;
- Ensuring all securities included in the portfolio have supportive ESG research.

Based on the above approach, and depending on the composition of the financial product's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. Green House Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:
- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).**

In which economic sectors were the investments made ?

Sectors	% Assets
Consumer Discretionary	0.69%
Consumer Staples	1.98%
Energy	3.33%
Financials	0.57%
Health Care	5.91%
Industrials	40.06%
Information Technology	16.01%
Materials	13.83%
Real Estate	2.18%
Utilities	14.51%
None	0.94%

*Source of data: BNP Paribas Asset Management, based on the AUM as at the end of October 2025.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and that contribute to the environmental objectives' climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control and/or the protection and restoration of biodiversity and ecosystems are disclosed in the two graphs below.

The Investment Manager is improving its Taxonomy-alignment data collection to ensure the accuracy and suitability of its Taxonomy sustainability-related disclosures. Further subsequent prospectus and Taxonomy-alignment commitments updates will be made accordingly.

Economic activities that are not recognised by the Taxonomy Regulation are not necessarily environmentally harmful or unsustainable. In addition, all activities that can make a substantial contribution to environmental as well as social objectives are not yet part of the Taxonomy Regulation or subject to such Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.¡

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

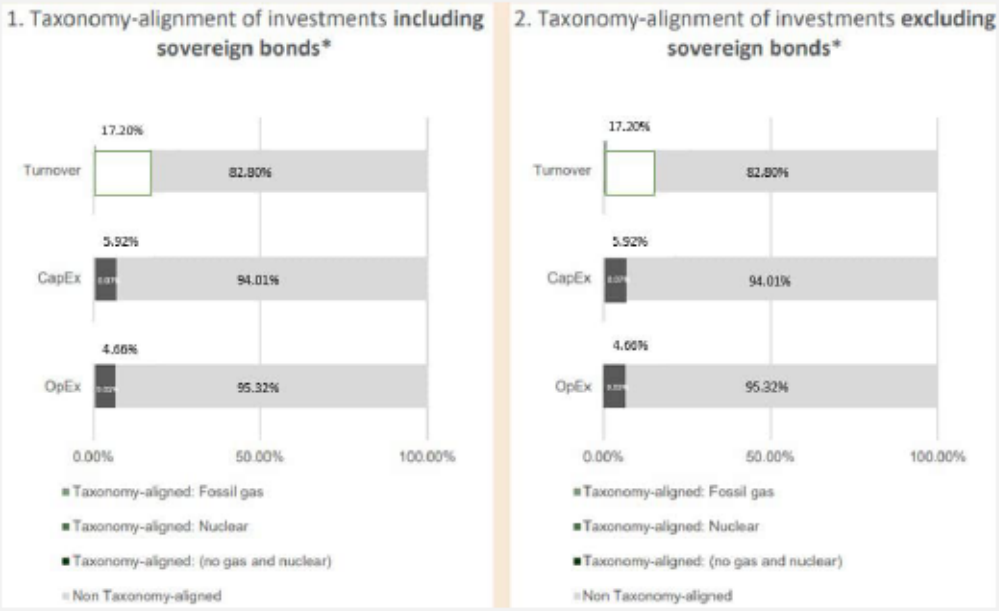

○ ***Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?***

✖ Yes:

✖ In fossil gas ☐ In nuclear energy

☐ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomyalignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm an EU Taxonomy objective –see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low- carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- *What was the share of investments made in transitional and enabling activities?*

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0 .02% for transitional activities and 4.40% for enabling activities.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

	Revenue
2024*	17.33%
2025**	17.20%

*Figures reported in 2024 are c alculated based on the positions as at the end of 2024.
**Figures reported in 2025 were calculated as a quarterly weighted average with the last available data 2025- 09-30.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **64.28%.**

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy .

What was the share of socially sustainable investments?

Socially sustainable investments represent **48.31%** of the financial product .

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include:

- the proportion of assets that are not used to meet environmental or social characteristics promoted by the financial product. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons,

asbestos,...),asthesecompaniesaredeemedtobeinviolationofinternationalnorms,orto causeunacceptableharmtosocietyand/ortheenvironment.

What actions have been taken to meet the environmental and/or social characteristicsduringthereferenceperiod?

- The financial product shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons,asbestos...),asthesecompaniesaredeemedtobeinviolationofinternationalnorms,or tocauseunacceptableharmtosocietyand/ortheenvironment.MoreinformationontheRBCPolicy, and in particular criteria relating to sectoral exclusions, can be found on the website of the investment manager: https://www.bnpparibas-am.com/en/sustainability/sustainability-documents/
