What is this product?

Type

SANTANDER TARGET MATURITY 2029 USD (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg S.A. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of this Sub-Fund is to provide Shareholders with investment growth in the medium term, through a diversified portfolio of fixed income assets.

Investment policy: The Sub-Fund mainly invests up to 100% of its net assets in both public and private fixed income instruments in USD, including deposits and money market instruments. The Sub-Fund will mainly invest in US entities.

The fixed income securities in which the Sub-Fund invests will be issued by entities domiciled principally in OECD countries. The total exposure to emerging markets will not exceed 10% of the Sub-Fund's net assets.

The Investment Manager will seek to invest in bonds with the intention of holding them to maturity whilst actively monitoring and maintaining the portfolio of the Sub-Fund.

The Sub-Fund's credit quality will be at least of BBB- on average rating. The Sub-Fund may invest up to 50% of its net assets in securities rated lower than Baa3/BBB- by major credit rating agencies at the time of the purchase or in unrated debt.

This Sub-Fund seeks a high level of diversification to minimise risk without any predetermination in term of sectors, duration, or credit rating.

In the event that an issuer's credit rating is downgraded, the issuer's credit standing will immediately be assessed and appropriate actions for any specific instrument of the relevant issuer within the Sub-Fund may be taken. These actions could include selling the underlying holdings or retaining the holdings to maturity depending on the specific characteristics of the instrument; in either event, the decision will be based on what is in the best interest of the Shareholders of the Sub-Fund.

The Sub-Fund may invest up to 40% of its net assets in subordinated debt, including convertible bonds, which are typically issued to perpetuity with a buy-back option (i.e. callable bonds also known as a redeemable bond, being defined as a bond that the issuer may redeem before it reaches the stated maturity date) and contingent convertible bonds ("CoCos").

The Sub-Fund will not invest more than 20% of its net assets in CoCos.

The Sub-Fund does not intend to invest directly in equity securities, however the Sub-Fund may hold ordinary equity securities in the event that such ordinary equity securities are acquired by way of conversion from another security held by the Sub-Fund (e.g. a convertible or CoCos that automatically converts into equity securities of the issuer under certain circumstances). In the event such conversion occurs, the

maximum exposure to equity securities will be 15% of the Sub-Fund's net assets.

The Sub-Fund may invest up to 10% of its net assets in UCITS and/or other UCIs as defined under the heading "Units of undertakings for collective investment" of the "Investment Restrictions applicable to Eligible Assets" section of the Prospectus.

The Sub-Fund will not hold more than 20% of its net assets in ancillary liquid assets, being cash and deposits at sight (such as cash held in current accounts) for ancillary liquidity purposes in normal market conditions.

As the Term Date of the Portfolio approaches, the Sub-Fund's portfolio will be progressively composed of cash (within the limits above), deposits, short term bonds and money market instruments to preserve the Sub-Fund's Net Asset Value and to enable the Sub-Fund to be managed adopting a conservative approach. The Sub-Fund may also invest in bonds with maturity dates beyond the Term Date of the Portfolio, where deemed appropriate for portfolio management purposes and in the best interests of the Shareholders.

Upon the Term Date of the Portfolio, the portfolio will reach its maturity date and prior to this date the Board of Directors will take a decision on the future of the Sub-Fund (such options may include, but are not limited to, the liquidation of the Sub-Fund, a merger or a change of the investment policy) while continuing to manage the portfolio in order to maintain the performance. Shareholders will be informed on the future of the Sub-Fund by means of a notice.

During the 3 months following the Term Date of the Portfolio, the Sub-Fund will continue to be managed by holding cash and investing in deposits, money market instruments, short term investment grade bonds with a duration of less than 18 months and a credit quality with at least BBB- on average rating. This period may last up to 6 months (including the 3 months of deferral if any) and the Sub-Fund will be closed for subscriptions by new investors during this period.

The Sub-Fund is actively managed and it is not managed in reference to a benchmark.

Ramp up period: The Sub-Fund's portfolio will be built up until 11 May 2026.

Term Date of the Portfolio: The Term Date of the Portfolio is expected to be in December 2029.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 4 years.

Depository:

Caceis Bank, Luxembourg Branch. Copies of the Prospectus, the Key Information Document, the annual and semi-annual financial reports and the Articles of Incorporation of SANTANDER SICAV can be obtained, free of charge, at the registered office of SANTANDER SICAV (43, Avenue John F. What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 4 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

		4 years	
		If you exit after 1 year	If you exit after 4 years
Recommended holding period:		4 years	
Example Investment:		USD 10 000	
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 8 040	USD 8 700
	Average return each year	-19.60%	-3.42%
Unfavourable	What you might get back after costs	USD 10 360	USD 10 520
	Average return each year	3.60%	1.28%
Moderate	What you might get back after costs	USD 10 740	USD 11 300
	Average return each year	7.40%	3.10%
Favourable	What you might get back after costs	USD 11 130	USD 12 140
	Average return each year	11.30%	4.97%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Santander Asset Management Luxembourg S.A. is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000 per year is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	USD 139	USD 622
Annual cost impact (*)	1.4%	1.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.5% before costs and 3.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
